

## Fortune 190

### Chapter 190: Promotion to Seventh-Layer Qi Cultivation\_2

This increased the number of Soldier Bees to eighteen.

Some of them naturally foraged in the wild.

However, some were hidden around the valley, acting as sentinels.

If any strangers approached, they would immediately convey the message to inform Su Weiwei.

Then she could avoid disaster in advance.

This is why Jiang Fan felt so reassured leaving Su Weiwei alone in the valley.

Having advanced to the Third-Layer Qi Cultivation, Su Weiwei was no longer the ordinary mortal woman she once was; she had become a qualified cultivator.

In comparison with cultivators of the same rank, she was undoubtedly much stronger.

Moreover, she didn't need extensive combat experience.

As long as the Spirit Beasts she controlled were strong enough, that would suffice.

"Fortunately."

"I only encountered a group of small fry."

"It was a close call but not dangerous."

Jiang Fan said casually.

He didn't want Su Weiwei to worry too much.

And indeed, for him, it was just a group of small fry, not really dangerous.

"That's good to hear."

"The meal is ready; let's eat together."

Su Weiwei nodded, knowing that her husband surely encountered tribulation cultivators outside.

She felt deeply moved, as the Cultivation Realm was indeed incredibly dangerous.

Even going on a long journey, one could encounter such a disaster.

Without strength, it is simply impossible to move an inch within the Cultivation Realm.

Thankfully, her husband's talent and cultivation were strong, allowing him to barely survive in the Cultivation Realm.

She resolved to diligently cultivate, at least to not be a burden to her husband.

"Hmm."

Jiang Fan and Su Weiwei then entered the wooden house.

...

As night fell, after a hearty meal.

Dong!

Suddenly, a message appeared deep in Jiang Fan's sea of consciousness: "Encountered a tribulation cultivator on the road; you fought to the death and ultimately won, overcoming a deadly calamity, earning two thousand Luck Points."

Sensing this message, Jiang Fan was quite satisfied.

Although he didn't gain any opportunities this time, obtaining two thousand Luck Points was still not bad.

Opportunities can't always be obtained each time.

It still depends on the right time and place and human harmony.

And more Luck Points are always better.

"By the way, I wonder what treasures those five tribulation cultivators had on them."

With a thought, Jiang Fan immediately took out five Storage Bags.

After all, the opponents were all late-stage Qi Cultivation cultivators, and they were tribulation cultivators, so their wealth must not be comparable to ordinary cultivators, so he was very much looking forward to it.

He meticulously took inventory.

He obtained a total of five thousand Spirit Stones.

Three top-grade magical artifacts.

Thirty lower-grade talismans, fifteen middle-grade talismans, and three top-grade talismans.

Besides that, he obtained five bottles of middle-grade Spirit Gathering Pills, one bottle of top-grade Spirit Gathering Pills, three bottles of Detoxification Pills, and so on.

Also, there were some Spirit Rice and Demon Beast Meat.

And then there was nothing else.

The harvest was decent, but not as expected.

Overall, the total number of Spirit Stones he had now reached twelve thousand.

This was indeed an extremely astonishing wealth.

Ordinary loose cultivators are unlikely to have so many Spirit Stones.

Having one or two thousand Spirit Stones would be considered quite wealthy.

After all, the vast majority of loose cultivators would quickly spend their Spirit Stones on purchasing elixirs, talismans, magical artifacts, etc., no matter how many Spirit Stones they have.

"This is just a small matter."

"The most important thing is to enhance one's cultivation."

"If I advance to the Seventh-Layer Qi Cultivation, my strength will surely be greatly enhanced."

Jiang Fan took a deep breath as he entered the Cultivation Room.

Then he took out twenty drops of Spiritual Liquid from the Storage Bag.

He sat cross-legged on the ground.

Being familiar with consuming Spiritual Liquid, he didn't hesitate.

Boom~~

In an instant, Jiang Fan swallowed a drop of Spiritual Liquid into his body while operating the Mixed Element Talisman Scripture.

Immediately, this drop of Spiritual Liquid transformed into massive energy, surging deep into the Elixir Field and Sea of Qi, absorbed by the Primordial Talisman, then converted into strands of Primordial Spiritual Power.

The originally empty spirit vein was now instantly filled with strands of Primordial Spiritual Power.

Just this one drop of Spiritual Liquid alone could offset an unknown number of days of hard cultivation.

"Still not enough."

"After consuming all this Spiritual Liquid, I should probably achieve perfection in Sixth-Layer Qi Cultivation."

Jiang Fan sensed the Primordial Spiritual Power within him was still insufficient.

So he didn't hesitate, immediately swallowing the remaining nineteen drops of Spiritual Liquid.

Immediately, his entire body was enveloped by the energy transformed from the Spiritual Liquid.

His whole body felt like it was wrapped in a warm spring, incredibly warm.

At the same time, the Primordial Spiritual Power within him increased at a speed visible to the naked eye.

If it were a common cultivator, they might not endure the sudden surge of spiritual power.

But for Jiang Fan, it was inconsequential.

Booming~~~~

He sensed the six meridians in his body were instantly filled with Primordial Spiritual Power, flowing through them like rivers.

At this moment, he felt an unprecedented strength coursing through him.

A massive surge of Spiritual Qi came rushing toward him, forming a Spiritual Energy Vortex centered on his body.

"To advance to Seventh-Layer Qi Cultivation, it's necessary to connect the six meridians, forming a closed loop."

"Then, using the spiritual power from these six meridians, to break through to the seventh meridian."

"This is why, for ordinary loose cultivators, even the first step is a significant hurdle for them."

"Not knowing how much time is consumed just to form a closed loop in the six meridians."

"Moreover, due to the low level of cultivation technique, resulting in poor quality and scarcity of spiritual power, breaking through the late-stage Qi Cultivation is even more impossible because of it."

"However, for me, all these are not issues."

Jiang Fan's eyes glowed with determination, well aware of how to advance to Seventh-Layer Qi Cultivation.

He understood why so many loose cultivators in the slums were stuck at Sixth-Layer Qi Cultivation, unable to advance.

This was because, from the start, their foundation was weak.

As a result, their basic foundation was not solid, causing a bottleneck that grew wider.

Unless by great fortune obtaining high-tier elixirs or spirit medicine, leveraging medicinal power to aid in overcoming the bottleneck, they might never break through in their lifetime.

But he was different.

Not only did he have the Earth Spirit Root talent, but he also cultivated the Mixed Element Talisman Scripture, with exceedingly high-quality and vast spiritual power, making breaking through the late-stage Qi Cultivation bottleneck effortlessly easy.

As long as there is enough spiritual power within, advancement is only a matter of course.

Thinking of this, Jiang Fan didn't hesitate, operating the Mixed Element Talisman Scripture.

The Primordial Talisman deep in the Elixir Field and Sea of Qi continued to rotate, like a planet.

Strands of Primordial Spiritual Power, under the guidance of the Primordial Talisman, began to connect each meridian, forming a loop and becoming one.

This was like six rivers converging, making the power of the rivers unprecedentedly strong.

In the next instant, the Primordial Spiritual Power within him rushed towards the seventh meridian.

Dong!

With just a slight touch, the bottleneck of the seventh meridian was instantly shattered.

The massive Primordial Spiritual Power contained irresistible force.

It was impossible to resist it.

Seventh-Layer Qi Cultivation!

For ordinary loose cultivators, it was a bottleneck as formidable as the grand canyon, but for Jiang Fan, it was easy and didn't even count as a bottleneck.

Of course, credit must be given to the twenty drops of Spiritual Liquid.

Spending six thousand Spirit Stones was worth it.

After all, nothing is more precious than time.

If Spirit Stones can solve the problem, then it is not a problem.

"Succeeded."

"Finally advanced to become a Seventh-Layer Qi Cultivation cultivator."

Jiang Fan was overjoyed.

He sensed that after advancing to Seventh-Layer Qi Cultivation, the Primordial Spiritual Power within him immediately skyrocketed, and compared to before, the total amount of spiritual power had doubled.

The reason for this change was not just about connecting the seventh meridian.

It was also because advancing to late-stage Qi Cultivation widened each meridian in length and width within.

Therefore, the capacity for spiritual power naturally increased.

Thus, the disparity between late-stage Qi Cultivation and mid-stage Qi Cultivation cultivators was vast.

Moreover, it wasn't just the spiritual power within that surged.

Even the strength of his spiritual sense had doubled compared to before.

The Primordial Talisman deep in the Elixir Field and Sea of Qi also expanded significantly.

Now the Primordial Talisman could accommodate the seventh Life Talisman.
