

## Fortune 201

### Chapter 201: Obtaining a Fifth-Grade Opportunity, Upper-Grade Wood Pill

In no time, Jiang Fan silently and effortlessly returned to the Nameless Valley.

Boom~~

At this moment, a message surged into the depths of his sea of consciousness: "Facing the fierce and ruthless cultivators of the Great Sun Sword Sect, you rose up in counterattack, slew the enemy, narrowly escaped death, and survived. You have gained four thousand Luck Points and a Fifth-Grade Opportunity."

Upon sensing this message, Jiang Fan immediately felt delighted and very satisfied.

He sensed that the luck surrounding him seemed even more significant, gaining the protection of destiny.

To be honest, he originally only had two thousand Luck Points left.

Now, with an additional four thousand, the number of Luck Points increased to six thousand.

For him, the more Luck Points the better, naturally.

However, the most important thing right now is the Fifth-Grade Opportunity.

He never expected to gain such an astonishing opportunity this time; clearly, his fortune had arrived.

Thinking of this, Jiang Fan didn't hesitate and with a thought, immediately clicked on the opportunity light point.

The next second, a wave of opportunity information came again: "In ten days, at midnight during the third watch, go to the northeast, thirteen kilometers away under a large tree, to obtain the Fifth-Grade Opportunity."

"Is it really that simple?"

Upon sensing this message, Jiang Fan blinked his eyes, feeling quite puzzled.

He didn't expect obtaining the Fifth-Grade Opportunity to be this simple.

But he didn't think too much about it; anyway, the truth would be revealed in ten days.

He hoped this Fifth-Grade Opportunity wouldn't disappoint him.

"Right, there are also the storage bags of these five Great Sun Sword Sect cultivators."

"I wonder what treasures are inside."

Jiang Fan immediately took out all five storage bags, opened them one by one, and scanned them with his spiritual sense.

Instantly, the treasures within the storage bags appeared before him.

"No way, there are actually so many spirit stones."

"Now, I'm truly rich."

Jiang Fan's eyes lit up; he discovered that the quantity of spirit stones within the storage bags reached ten thousand.

After all, the other party also belonged to Great Sun Sword Sect, and they were late-stage Qi Cultivation.

Having one or two thousand spirit stones was quite normal.

Adding up the five cultivators, the spirit stones exceeded ten thousand. current on

To know, he originally had eight thousand spirit stones; adding the twenty-seven thousand spirit stones he gained from selling high-grade detoxification talismans, his total spirit stones reached forty-five thousand.

Honestly, such a quantity of spirit stones could completely buy a Foundation Establishment Pill.

Even for an ordinary cultivator family's spirit stone reserves, this wasn't common at all.

If someone were to eliminate him, it would indeed be an overnight fortune.

"Wait, aren't these top-grade elixirs, Wood Pills?"

"There are actually three bottles?!"

Jiang Fan was overjoyed.

He also discovered that within the storage bags, there were three bottles of top-grade elixirs.

The so-called Wood Pill, refined from spirit medicines such as Summer Mushroom Grass, Profound Ginseng, Wind Chime Flower, and so on.

After consuming, it contains huge medicinal power, very suitable for enhancing the spiritual power of late-stage Qi Cultivation cultivators.

Even just one pill could increase the cultivation of a late-stage Qi Cultivation cultivator by several months.

A bottle of Wood Pills is valued at least one thousand spirit stones.

The problem is, even with spirit stones, obtaining top-grade elixirs like this is not a certainty.

Because in Cyan Forest Market, most top-grade elixirs are scooped up by sect cultivators.

Even with spirit stones, loose cultivators find it hard to buy these top-grade elixirs.

Previously, Jiang Fan was in such a situation.

Despite carrying a large number of spirit stones, many treasures were unattainable.

This also proved the scarcity of resources in Cyan Forest Market.

However, this was something unavoidable.

After all, it's just an ordinary market.

It's very suitable for those new to the cultivation realm, but not so much for late-stage Qi Cultivation loose cultivators.

So, to advance further, one can only go to those Golden Core Immortal Cities.

Such cultivation cities are suitable for late-stage Qi Cultivation loose cultivators to survive.

Simultaneously, the probability of establishing a foundation is greater.

Unfortunately, crossing three thousand kilometers across the Ten Thousand Beasts Mountain Range to reach Yunlai City proves too challenging.

"With these three bottles of top-grade elixirs, it seems my advancement to the eighth layer of Qi Cultivation is not far."

Jiang Fan felt very satisfied.

Of course, aside from these three bottles of top-grade elixirs, he also found ten bottles of middle-grade elixirs and various auxiliary-type pills, including Detoxification Pills and Recovery Pills.

Additionally, there were numerous talismans and three pieces of top-grade magical artifacts.

In conclusion, they truly lived up to being sect disciples, far richer than ordinary loose cultivators.

"Let's try the Wood Pill first."

Thinking of this, Jiang Fan sat cross-legged, took out a Wood Pill, and immediately swallowed it.

Meanwhile, he circulated the Mixed Element Talisman Scripture, quickly digesting the top-grade elixir.

Instantly, a surge of pure medicinal power emerged, quickly digested, transformed into pure energy, and rushed into the elixir field and sea of qi.

He saw strands of primordial spiritual power being rapidly nurtured within his body.

This made his cultivation progress rapidly.

Originally needing several months of hard cultivation for spiritual power, now with one Wood Pill, it appeared in an instant.

It's imaginable how crucial elixirs are for cultivators.

They are simply accelerators for cultivation.

.....

In the blink of an eye, another seven days passed.

Jiang Fan had stayed in the Nameless Valley for cultivation and hadn't gone to Cyan Forest Market.

After all, obtaining so many cultivation resources suddenly requires ample time to devour and digest.

Especially gaining the Wood Pills meant he temporarily didn't need other cultivation resources.
