

## **Fortune 215**

Chapter 215: Hundred-Year-Old Cyan Dragon Ginseng, Increases Lifespan by 60

"Right, and those three storage bags of the late-stage Qi Cultivation cultivators."

"I wonder what treasures are inside."

At this moment, Jiang Fan also recalled his gains from today and immediately took out the three storage bags, opening them to take a look.

Inside, a dazzling array of treasures was revealed.

First were the Spirit Stones, the total from the three individuals exceeded six thousand Spirit Stones.

It has to be said, they were quite wealthy indeed.

Basically, each person had around two thousand Spirit Stones.

One can estimate that these Spirit Stones were stolen goods, who knows how many Loose Cultivators fell victim.

If added to the Spirit Stones he obtained earlier, his total reached fifty-one thousand Spirit Stones, quite an astonishing amount.

Such wealth would certainly tempt even Foundation Establishment cultivators, possibly to the point of robbery.

"Wait, isn't this the map of the Ten Thousand Beasts Mountain Range?"

Jiang Fan's eyes lit up as he immediately discovered a map of the Ten Thousand Beasts Mountain Range, clearly drawing a route to Yunlai City. This map was indeed precious.

Who knows how many cultivators sacrificed themselves to find such a safe path.

Perhaps only Foundation Establishment Clans could obtain it.

Ordinary Loose Cultivators could hardly have such an opportunity.

Originally, with Wu Feng and others dead and fleeing, without the map, he had no way of finding the path to Yunlai City and could only rely on continuous exploration.

But with this map, even relying solely on his strength, he could still reach Yunlai City.

To Jiang Fan, this was simply an invaluable treasure.

"It's a pity there's no top-grade elixir."

Jiang Fan helplessly lamented.

Originally, he hoped to find some top-grade elixirs to enhance his cultivation.

But it seemed now that Wu Feng and others were quite poor, without even a single top-grade elixir.

Perhaps even if they did obtain a top-grade elixir, they must have consumed it already, leaving none overnight.

Besides that, he also acquired three top-grade magical artifacts and a large number of talismans.

Additionally, there were some spirit rice and demon beast meat.

No doubt, these foods were enough for him and Su Weiwei to indulge for years.

Even staying in the Ten Thousand Beasts Mountain Range for several years would not be an issue.

"Cities for cultivators are still better."

"Otherwise, even with Spirit Stones, they can't be spent at all."

Jiang Fan felt a bit frustrated.

Clearly, he was a wealthy figure, but now appeared impoverished.

Possessing tens of thousands of Spirit Stones, if they couldn't be spent, they're just ordinary stones, of little use.

There's no doubt that for cultivators, elixirs, spirit medicine, and treasures were much more important.

"Husband, what should we do next?"

Su Weiwei asked Jiang Fan with some worry.

Originally, they were part of a large army of Loose Cultivators, feeling quite secure.

Even if something happened, they could support one another.

But now, encountering the robbery by a Tier Two Golden-Scaled Beast, only the two of them remained alive.

Even wanting to return to Cyan Forest Market was impossible now.

For they had traveled over a thousand kilometers away.

Also, returning now, who knows what condition Cyan Forest Market was in.

It might be under the outbreak of war from the Golden Core Sect, and returning might be self-imprisonment and seeking death.

"Don't worry."

"Even if it's just the two of us left, we can still reach Yunlai City."

Jiang Fan confidently replied with assurance.

This wasn't blind confidence, but a belief in his capabilities.

After all, his cultivation was at the eighth layer of Qi Cultivation, considered invincible among his peers.

As long as he didn't encounter any demon beasts above Tier Two, there would be no issue.

Moreover, his Fortune-Telling Talisman could predict fortune and misfortune.

So even if arriving at unknown places, he could detect fortune and misfortune in advance and take precautions.

Plus, he had the map of the Ten Thousand Beasts Mountain Range.

If he couldn't safely reach Yunlai City, no one could.

...

By noon the next day.

Su Weiwei stayed in the original cave to rest.

Meanwhile, Jiang Fan headed to the location of the Seventh-Grade Opportunity.

Following the guidance of the opportunity, he soon arrived at the valley.

He looked around, thinking the valley had nothing extraordinary, surrounded by dense trees.

Yet lingering threads of powerful demon beast aura seemed to remain.

No doubt, the valley was occupied by a strong demon beast.

But the beast guarding the valley seemed to be absent at this moment.

He happened to evade its presence.

Following the opportunity, Jiang Fan reached the opportunity site.

Looking down, he spotted a cyan ginseng growing from the soil, resembling a Cyan Dragon, enveloped with rich Spiritual Qi.

"No way, this is the Hundred-Year-Old Cyan Dragon Ginseng!"

Jiang Fan's eyes lit up in excitement.

Indeed deserving of a Seventh-Grade Opportunity, he found a Centennial Spirit Medicine.

Though named Cyan Dragon Ginseng, it bears no connection to actual Cyan Dragons.

Its appearance resembles a Cyan Dragon, hence the name.

It's said that Centennial Spirit Medicine could enhance a cultivator's cultivation and was also a Body Tempering Spirit Medicine.

Body Cultivators coveted such spirit medicines.

"Consuming this Hundred-Year-Old Cyan Dragon Ginseng could elevate my body cultivation realm further."

"Certainly advancing the Soaring Snake Scripture to the middle stage."

Jiang Fan clenched his fist.
