

Fortune 217

Chapter 217: Wanted by the Wu Family, Chaos Spreads to Yunlai City

But the Soaring Snake Technique helped him break through the limits of human lifespan, allowing him to gradually gain a lifespan akin to a Divine Beast. It's just the beginning, yet he has already increased his lifespan so much.

Even taking a life-extending elixir wouldn't be able to achieve such results.

"My cultivation has also risen to 80%."

"Seems like reaching Ninth-Layer Qi Cultivation isn't far off."

Jiang Fan glanced at his cultivation progress, feeling quite satisfied.

In these three months of rigorous cultivation, his cultivation has progressed with remarkable speed.

Of course, this is thanks to the Hundred-Year-Old Cyan Dragon Ginseng.

If it weren't for this Centennial Spirit Medicine, his cultivation progress would have been much slower.

If he goes to Yunlai City and purchases some top-grade elixirs, then advancing to Ninth-Layer Qi Cultivation is as good as certain.

"However, over these three months, the greatest improvements have been the Conceal Breath Talisman and the Protective Talisman."

Jiang Fan touched his chin.

He spent a considerable amount of Luck Points to enhance the skill level of his two Life Talismans to Perfection Level.

This also gave a tremendous boost to the power of these two Life Talismans.

The first is the Conceal Breath Talisman, which, at Perfection Level, allows him to reach a level of blending with nature, meaning his presence blends naturally with the surroundings, causing enemies to unwittingly overlook him.

As if he himself were inherently a part of nature.

His presence becomes significantly reduced.

Others naturally overlook his presence, as if he were naturally a part of the environment.

Using the Perfection Level Conceal Breath Talisman, he has evaded numerous crises in the Ten Thousand Beasts Mountain Range.

Especially in cases when encountering Tier Two Demon Beasts, he relied on the power of the Conceal Breath Talisman to hide.

Thus, those Tier Two Demon Beasts couldn't detect his existence.

Even the power of the Conceal Breath Talisman can apply to other cultivators, helping them hide their presence.

Then there's the Protective Talisman.

At Perfection Level, it can instantly form a nine-layer Spiritual Energy Shield.

In terms of defense, compared to before, it's several times stronger.

Even if a group of Ninth-Layer Qi Cultivation cultivators attack together, they wouldn't think of breaking his nine-layer Spiritual Energy Shield.

Even for cultivators who are newly entering Foundation Establishment stage, breaking his Spiritual Energy Shield would not be a trivial matter.

Thus, after enhancing the power of the Protective Talisman to Perfection Level, he felt a genuine sense of security.

It was as if his body were covered with a turtle shell.

No matter if attacked, he can easily fend off the adversary.

The opponent wouldn't think of ambushing him.

...

The next morning.

Jiang Fan thoroughly consolidated his cultivation, becoming familiar with his surge of power.

He felt the abundance of energy and powerful explosive force within him.

Compared to before, his combat strength had indeed increased tremendously.

"Husband, is Yunlai City almost there?"

Su Weiwei eagerly asked.

After all, they've been in the Ten Thousand Beasts Mountain Range for a full three months.

In these three months, they have hardly seen any other human cultivators.

Mostly they were traveling and avoiding demon beasts.

Thus, she greatly looked forward to reaching a human city once again; after all, humans are social creatures.

"Yes, judging by the map, we are not far from Yunlai City."

"We should be able to reach Yunlai City today."

Jiang Fan nodded.

"Then let's head out now."

Su Weiwei exclaimed, eager to set out.

She wanted to reach Yunlai City immediately.

Whoosh!

The two didn't need to pack anything and immediately set off towards Yunlai City.

Several hours passed.

Jiang Fan and Su Weiwei finally arrived at Yunlai City.

They found the city situated on a vast plain, arising from the ground, surrounded by white clouds.

From a distance, this magnificent city was shrouded in mystery, appearing elusive.

The entire city seemed to be enveloped by an array barrier.

Occasionally, it flickered with waves of energy.

Finally, they saw numerous human cultivators.

In the sky, a flying ship occasionally appeared, swiftly heading to Yunlai City, making traffic quite busy.

Occasionally, a Foundation Establishment cultivator could be seen flying with their sword.

Compared to Cyan Forest Market, the bustling atmosphere was unmatched.

"Husband, it seems there are also slums near Yunlai City."

Su Weiwei noticed that many cultivators weren't entering Yunlai City but went to large slum areas on the outskirts instead, right near Yunlai City.

These seem to have been established by loose cultivators, with houses lined up but in an orderly fashion.

A certain amount of space was left between houses.

It seemed to follow a unified plan.

Unlike Cyan Forest Market, where there were barely any gaps between houses, completely forming high-rise blocks.

Overall, the slums appeared cleaner and more orderly.

"Yes, although Yunlai City is known as the City of Independent Cultivators, it has Tier Three Spirit Veins."

"The city can only accommodate a limited number of loose cultivators."

"Even the Spiritual Qi from Tier Three Spirit Veins cannot be supplied unlimitedly to all loose cultivators."

"Thus, most independent cultivators aren't eligible to live inside Yunlai City, only residing in the outer slums."

Jiang Fan spoke solemnly.

He had heard some news about Yunlai City.

Initially, all loose cultivators could live inside Yunlai City.

But over time, the number of loose cultivators grew.

Even Yunlai City couldn't accommodate so many people.
