Chapter 231: Acquiring Centennial Spirit Medicine, Breakthrough in Soaring Snake Technique, Lifespan of 300\_2

"Once consumed, it's likely to be torn apart by the violent medicinal power."

"Only a Body Cultivator might be able to withstand such medicinal power."

"So for me, this kind of violent medicinal power is just right."

Jiang Fan was delighted.

He activated the Soaring Snake Technique.

Every muscle's Soaring Serpent Rune began to tremble, as if they were serpents riding clouds and mist, absorbing the Heaven and Earth Spiritual Qi, constantly refining his muscles and physique.

With his body as the center, it seemed to form a vortex of spiritual energy.

This rapidly increased the concentration of spiritual energy in the wooden house.

He felt his progress in cultivating the Soaring Snake Technique was accelerating.

It seemed as if each muscle in his body was merging with a Soaring Serpent Rune.

If every part of his body indeed merged with the Soaring Serpent Rune, then he would have reached the late stage of the Qi Cultivation Chapter.

By then, his body's strength would surely leap to a whole new level.

More importantly, his lifespan would definitely break past limits again.

It should be noted that his lifespan was already at 230 years.

Even a Foundation Establishment Cultivator's lifespan is just that.

If he advanced further, who knows to what extent his lifespan would increase.

However, Jiang Fan didn't have time to think about these things now.

Because he had completely submerged himself in the cultivation process of the Soaring Snake Technique.

Vaguely, it seemed as if the spiritual energy in the room formed into Soaring Serpents, flowing in and out of his body.

Like riding on clouds and mist, extremely mystical.

...

In the blink of an eye, three months passed.

Since the Golden Core Zhenren, Daoist Yunlai, led a large group of Foundation Establishment cultivators away to Cyan Forest Market, this caused Yunlai City's high-end combat power to diminish, reducing its deterrent power.

The entire Yunlai City was left with only a few Foundation Establishment cultivators guarding it.

So currently, Yunlai City became even more chaotic.

After all, Loose Cultivators are not virtuous by nature.

To achieve immortality, to cultivate, they would do anything.

Because of this, the number of murder cases near Yunlai City increased tens of times compared to before.

From time to time, you'd see Loose Cultivators battling.

If it were before, under the suppression of Daoist Yunlai and others, Loose Cultivators wouldn't dare to be so reckless.

Afraid of being suppressed by the forces of Yunlai City.

But now, with Daoist Yunlai and others gone, the Foundation Establishment cultivators left behind to guard the city didn't dare leave easily, just staying within the city.

Therefore, they turned a blind eye to the fighting outside the city.

As long as it didn't affect their cultivation, they didn't care.

However, for Jiang Fan and Su Weiwei, this bit of chaos didn't matter.

Given their current strength, they were entirely capable of handling this situation.

At this moment, in the quiet room of the wooden house.

Jiang Fan sat cross-legged on the ground, running the Soaring Snake Technique.

Over these three months, he had completely absorbed the medicinal liquid of the Blood Essence Flame Fruit.

Of course, the results were impressive, significantly advancing his progress in the Qi Cultivation Chapter of the Soaring Snake Technique.

Every muscle on his body had integrated with a Soaring Serpent Rune.

If one could practice introspection, one would see each muscle on Jiang Fan's body merged with the Soaring Serpent Rune, shining brightly, exuding incredible power.

A divine beast cub's aura spread out.

Boom~~

At that moment, when the last muscle on Jiang Fan's body merged with a Soaring Serpent Rune, it seemed that the runes on his 639 muscles fused into one, forming a Rune Array.

Soaring Snake Technique, Qi Cultivation Chapter Perfection!

This could be considered a Tier One Late Stage Body Cultivator.

Even compared to ordinary Body Cultivators, who knows how many times stronger.

"Finally succeeded."

Jiang Fan clenched his fist, having spent three months and a full four thousand Luck Points, finally integrating every muscle with a Soaring Serpent Rune, advancing to a Tier One Late Stage realm.

He sensed his body had undergone a vast transformation.

Every inch of muscle was filled with explosive power.

A punch contained the massive force of over 100,000 catties.

Far beyond what he could compare before.

Of course, it wasn't just an increase in power.

Even his speed and reaction time had improved tremendously.

It could be said that even without using his spiritual power.

Relying solely on physical strength, he could crush many Qi Cultivation Stage Cultivators.

It was just like a divine beast cub.

However, the increase in combat power meant little to Jiang Fan.

The truly important thing was the increase in his lifespan.

He felt his body brimming with immense life force, breaking the human lifespan limit again.

Thinking of this, he opened his virtual panel.

[Name: Jiang Fan]

[Realm: Ninth-Layer Qi Cultivation (30%)]

[Profession: Top-grade Talisman Master (90%)]

"My lifespan actually increased to 300 years?!"

"An increase of 70 years."

Upon seeing the data, Jiang Fan was thrilled.

After all, even a Foundation Establishment Cultivator could only live for 250 years.

But he, could live for 300 years, his lifespan surpassing that of a Foundation Establishment Cultivator.

If he advanced to Foundation Establishment, his lifespan might surge even further, possibly exceeding that of a Golden Core Zhenren.

It's fair to say that the Soaring Snake Technique, this ancient technique, is indeed profound and boundless.

Once successfully cultivated, it grants an extended lifespan.

But not everyone can cultivate it successfully.

If he hadn't used Luck Points to grasp the secrets of the Soaring Serpent Rune, he might not have been able to cultivate this technique successfully.

Even in the Ancient Era, cultivators who obtained the Soaring Snake Technique and successfully cultivated it were few and far between.

Of course, besides the advancement in the Soaring Snake Technique, his cultivation also improved significantly.

But as he reached the Ninth-Layer Qi Cultivation Stage, the Primordial Spiritual Power to be condensed increased even more.

Moreover, living in the slum area without the support of a Spirit Vein, his cultivation progress slowed.

However, compared to other Loose Cultivators, he was progressing rapidly.

"My physique and spiritual sense are almost perfected."

"Once the Primordial Spiritual Power within is perfected, I can begin attempting Foundation Establishment."

Jiang Fan clenched his fist.

He felt he was getting closer to the Foundation Establishment Realm.

To be honest, merely having Qi Cultivation Stage cultivation, there was little sense of security in the Ten Thousand Beasts Mountain Range.

Such strength made long-distance travel very difficult.

In the face of crisis, all one could do was flee.

Only by becoming a Foundation Establishment Cultivator could one possess some self-defense capability.

After another period of seclusion to solidify his cultivation, Jiang Fan emerged from the quiet room.

"Husband, something major happened in Yunlai City."

At this moment, Su Weiwei said to Jiang Fan with a serious expression.

She had just received extremely important news outside, which is why she rushed back immediately.

"Something major? What is it?"

Jiang Fan asked.

"It's said that Daoist Yunlai and others encountered issues in that Nascent Soul Cave Mansion."

"Originally, many Golden Core Zhenren joined forces, attempting to break the Tier Four Array of the cave mansion."

"Who would have thought, these Golden Core Zhenren underestimated that Tier Four Array and were instantly trapped within."

"Now, the Golden Core Zhenren of various forces are imprisoned inside, their fates unknown."

"So now, the entire Yunlai City has become turbulent and uneasy."

"Some suspect that Daoist Yunlai might have perished inside."

Su Weiwei said solemnly, sharing all the information she knew.

"Haha, a bunch of fools."

"This is the Wood Locking Earth Array set by Daoist Wan Hua."

"Even though it's ancient and in disrepair, without being a Tier Four Array Master, randomly meddling with the Restriction Array will likely lead to a dead end. Those Golden Core Zhenren are probably doomed."

The Ten Thousand Transformations Pill Furnace burst into laughter upon hearing this.
