

Fortune 247

Chapter 247: Divine Power: Emperor's Gaze, 500-Year Lifespan

Boom~~

With the appearance of the first drop of liquid spiritual power, Jiang Fan seemed to have broken through a bottleneck, as the mist-like spiritual power deep within his Elixir Field and Sea of Qi began to transform under the guidance of the Primordial Talisman, continually merging together.

The second drop of liquid spiritual power, the third drop, the fourth drop, the fifth drop...

Jiang Fan sensed that deep within his Elixir Field and Sea of Qi, drop after drop of gray liquid spiritual power appeared, exuding an extremely rich aura, seemingly resonating with the forces of heaven and earth.

Compared to before, the quality of the current Primordial Spiritual Power was more than ten times stronger.

A single drop of liquid spiritual power could not compare to how many mist-like spiritual powers it could crush.

From the beginning, the two were incomparable to each other.

This was akin to a qualitative change.

Centered around his body, the spiritual Qi around him surged like a flood, entering his body, speeding up the transformation into liquid spiritual power.

"It's still not enough."

Jiang Fan decisively devoured the entire gourd of spiritual liquid.

Instantly, these spiritual liquids transformed into vast energy, pouring deep into the Elixir Field and Sea of Qi.

This also caused the spiritual power deep within the Elixir Field and Sea of Qi to undergo drastic changes.

The Primordial Talisman kept spinning, like a greedy black hole, devouring every drop of energy.

At the same time, it emitted a faint golden glow.

Who knows how much time passed, and in the depths of his Elixir Field and Sea of Qi appeared a full hundred drops of Primordial Spiritual Power.

It is known that an ordinary cultivator ascending to Foundation Establishment, could fully suffice with ten drops of liquid spiritual power.

Yet Jiang Fan now had ten times that amount.

It can be seen how solid his foundation was, far beyond what other cultivators could imagine.

At this moment, the mist-like spiritual power within him had completely transformed into liquid spiritual power.

Drops of spiritual power flowing through all his meridians.

This caused the strength in his body to increase tenfold without stopping.

"The Spiritual Power Barrier has been crossed."

"Next is the Spiritual Sense Barrier."

Jiang Fan activated the Mixed Element Talisman Scripture and sensed a surge of energy entering deep into his consciousness sea.

The originally mist-like spiritual power instantly transformed, becoming drops of liquid spiritual power.

The speed of transformation was extremely rapid.

It's unknown how many times faster it was compared to the transformation of spiritual power.

Boom!

A sound like thunder reverberated deep within his consciousness sea, as if it were the sound of creation.

He sensed his spiritual sense momentarily shot out of his crown chakra.

Out-of-body spiritual sense!

At this moment, he seemed to see his soul floating in mid-air, like an out-of-body soul experience.

From a third party perspective, he saw himself seated cross-legged on the ground, body radiating golden light.

This was truly a god's-eye view.

"Is this Foundation Establishment Spirit Sense?"

Jiang Fan felt incredulous.

He knew that a Qi Cultivation Stage cultivator's spiritual sense was very weak, at most just able to perceive the surrounding environment and perform simple introspection, and nothing more.

However, upon ascending to the Foundation Establishment Realm, that was out-of-body spiritual sense.

The power of the soul could leave his body, perceiving the surrounding environment.

The range of perception expanded tenfold and more.

It also allowed him to sense more information and intelligence, wondrous and infinite.

He could even use the power of spiritual sense to simply manipulate the forces of heaven and earth.

Honestly, such a feeling was very wonderful, as if one wholly controlled the surrounding environment.

Bong!

At this moment, Jiang Fan withdrew his spiritual sense, permeating it into his body.

He discovered that his introspection ability had increased tenfold and more.

Previously, his introspection ability could only simply perceive the condition of some parts of the body.

But regarding more detailed parts, he was completely oblivious.

This was akin to an upgrade from a 5x microscope to a 50x microscope.

He could perceive even more minute details.

"Are these the meridians within the body?"

"It seems there are not only nine main meridians."

"Apart from the nine main meridians, there are also 108 secondary meridians."

Jiang Fan's eyes gleamed.

Having received the legacy of the Primordial Talisman Sect, he naturally knew certain intricacies of Foundation Establishment Cultivator cultivation.

Upon ascending to the Foundation Establishment Realm, the liquid spiritual power within would continually connect the secondary meridians.

Once 108 secondary meridians were connected, that would be Foundation Establishment Perfection.

Then he'd be capable of challenging the Golden Core Realm.

However, regarding secondary meridians, only cultivators who have condensed Foundation Establishment Spirit Sense can perceive them.

Qi Cultivation Stage cultivators can only perceive nine main meridians.

Of course, to connect so many secondary meridians, the time and resources required are immense.

This is also why Golden Core Zhenren are so rare.

Rumble~~~

At this moment, Jiang Fan sensed his soul suddenly shudder, seemingly resonating with heaven and earth.

A profound dao sound suddenly resounded from nowhere.

Like the first thunderous sound at the creation of heaven and earth.

At this moment, a mysterious energy descended from the depths of the void.

"This is the third hurdle of Foundation Establishment, Heaven and Earth Baptism."

Jiang Fan sensed a vast mysterious energy rushing in like a flood, instilling into his body. Such energy was so immense, so violent.

If the body's resilience wasn't strong enough, it might be utterly exploded by this energy.

So some elderly cultivators, due to aging and frail body, even after passing the first two hurdles, when they arrive at the third hurdle, they still can't withstand it and face a dead end.
