Chapter 250: Refining the Primordial Talisman Pen, Celestial Thunder Talisman_2

"Hmm, since you have advanced to the Foundation Establishment Realm, you are qualified to receive the complete Mixed Element Talisman Scripture."

The Primordial Talisman Pen lightly moved, its tip touched Jiang Fan's forehead.

Boom~~

Instantly, a golden light plunged deep into the depths of Jiang Fan's sea of consciousness.

He sensed the emergence of many books in his sea of consciousness.

These books not only contained the Mixed Element Talisman Scripture but also the refining techniques for Tier Two, Tier Three, and Tier Four Talismans, and even other secret techniques.

Moreover, the Mixed Element Talisman Scripture reached the Nascent Soul level.

As for techniques after Divinity Transformation, there were none.

"Elder Fu, it seems like the techniques after Divinity Transformation are missing."

Jiang Fan inquired.

"Just cultivating to the Nascent Soul Realm, who knows how many years it will cost you."

"Yet you're already thinking about techniques after Divinity Transformation."

The Primordial Talisman Pen said with a tone of annoyance, "Honestly, I don't have the Mixed Element Talisman Scripture for after Divinity Transformation because it is stored in a Secret Realm World of the Primordial Talisman Sect, which is also the last Inheritance Land of the Primordial Talisman Sect."

It indicated that it only possessed techniques up to the Nascent Soul level.

To find the subsequent techniques, one must search in the Inheritance Land.

"The Primordial Talisman Sect still has an Inheritance Land?"

Jiang Fan blinked.

"Of course."

"Although the Primordial Talisman Sect has indeed declined, even a broken ship has three nails."

"This Inheritance Land is the foundation of the Primordial Talisman Sect."

"Not only does it store countless secret manuals of the Primordial Talisman Sect, but also heaps of elixirs and spirit medicines."

"If obtained, it could completely rebuild the Primordial Talisman Sect."

"However, you would need to become a Nascent Soul Cultivator at least before entering the Inheritance Land."

The Primordial Talisman Pen explained.

Become a Nascent Soul Cultivator?

Upon hearing this, Jiang Fan was at a loss for words; it seemed that the so-called Inheritance Land of the Primordial Talisman Sect was unattainable, like a carrot dangling in front of a donkey.

In the short term, the Primordial Talisman Sect could not provide much assistance.

"However, Elder Fu, given your severe injuries."

"Isn't there any way to aid in your recovery?"

At this moment, Jiang Fan sensed the condition of the Primordial Talisman Pen's body, notably marked by cracks, as if it were about to completely shatter.

If he hadn't thoroughly refined the Primordial Talisman Pen, he wouldn't have known the poor state it was in.

No wonder the Primordial Talisman Pen needed to sleep for so long.

If it weren't a top-grade spiritual treasure, it might have already perished.

"It's difficult, truly difficult."

"To fully repair me, a special material is required."

"That's the Tier Five material, Primordial Stone Essence."

"Unfortunately, this material has long since become extinct and is almost impossible to find."

The Primordial Talisman Pen said helplessly.

Of course, it wished to heal its injuries and restore its full power.

But unfortunately, the injuries were too severe.

Without the corresponding material, recovering would be unlikely.

"What? It requires Tier Five materials to recover?"

"You might never have the chance to recover in this lifetime."

The Ten Thousand Transformations Pill Furnace replied in exasperation.

It was fully aware of how precious Tier Five materials were, treasures attainable only by Divinity Transformation level entities.

Even Daoist Wan Hua, as a Nascent Soul Cultivator, couldn't find a single Tier Five material.

It was evident how precious Tier Five materials were.

"There's no choice, if they cannot be found, then this is the fate of this old life."

The Primordial Talisman Pen replied helplessly.

It sought a qualified successor to grow quickly.

Thus, not only could the lineage of the Primordial Talisman Sect be inherited.

But perhaps in the future, it might help find Primordial Stone Essence to completely heal its injuries.

"Elder Fu, don't worry."

"If there's an opportunity, I will surely help you find Primordial Stone Essence."

Jiang Fan said confidently.

He believed he was Great Blessings Equal to Heaven, extremely lucky.

Given the chance, finding Primordial Stone Essence wouldn't be too big of an issue.

"Then I'll take your word for it."

"But the injuries on this old body are too severe."

"I have bestowed upon you numerous transmissions of the Primordial Talisman Sect, consuming much of my strength."

"Therefore, I shall enter slumber once more."

"Given your talent, as long as resources are ample, achieving Nascent Soul is a guarantee."

"I hope you are cautious before advancing to the Nascent Soul."

The Primordial Talisman Pen feared Jiang Fan might face tribulations and perish midway.

If that were the case, the Primordial Talisman Sect might be lost forever.

"Elder Fu, no one is more cautious than me."

Jiang Fan chuckled.

"Hmm."

Upon hearing this, the Primordial Talisman Pen was satisfied; with a swish, it transformed into a golden light and instantly merged into Jiang Fan's body, becoming a part of him.

This is the result of refining a top-grade spiritual treasure, allowing unity of man and artifact.

Only a spiritual treasure has such capability.

Instantly, the Primordial Talisman Pen fell into slumber once more.

"This is the Foundation Establishment Chapter of the Mixed Element Talisman Scripture?"

At that moment, Jiang Fan began to understand the contents of the Foundation Establishment Chapter, making him more knowledgeable about cultivating at the Foundation Establishment Realm; previously, he was completely bewildered.

The Foundation Establishment Realm, like the Qi Cultivation Realm, possesses nine levels.

The initial three levels are the Early-stage Foundation Establishment, the middle three levels are the Mid-stage Foundation Establishment, and the final three levels are the Late-stage Foundation Establishment.

Because of this, cultivating the Foundation Establishment Chapter enables the engraving of nine Life Talismans.

With each additional Life Talisman, his techniques increase.

Simultaneously, it enhances his foundation.

For a talisman cultivator, mastering more talismans means greater power.

He sat cross-legged on the ground.

He activated his Foundation Establishment Spirit Sense and instantly introspected.

He immediately perceived the depths of his elixir field and sea of qi, and the Primordial Talisman.

Compared to before, its size was several times larger.

Like a planet, it slowly rotated.

It seemed that each rotation could convert a drop of spiritual power into liquid form.

The surface area of the Primordial Talisman was also larger, capable of engraving more powerful and complex talismans.

"Since I have become a Foundation Establishment Cultivator, I must engrave a Tier Two talisman."

"For Foundation Establishment Cultivators, increasing Foundation Establishment-level attack techniques is necessary."

"After all, offense is far more effective than defense."

In the depths of Jiang Fan's sea of consciousness flowed several Tier Two talismans, contemplating which Tier Two talisman would most enhance his combat power.

But due to the sheer number of Tier Two talisman types, he developed a selection dilemma.

Nevertheless, he still found the most suitable Tier Two talisman for himself—the Celestial Thunder Talisman.

This talisman can gather the power of celestial thunder between heaven and earth.

Once activated, its destructive power is immensely terrifying.

Not only does it constrain demon cultivators and evil cultivators, but it also restrains various demons.

Even demon beasts are extremely fearful of the power of celestial thunder.

Thus, this Supreme Yang and Firm power have a perfect synergy with him.

And among countless cultivators, thunder cultivators are scarce.

After all, mastering the power of celestial thunder is not easy.

Because it involves drawing thunder into one's body, without a special constitution or robust physique, it would lead to lethal strikes from celestial thunder.

But once mastered, one becomes an extraordinarily powerful cultivator.

Surely, countless cultivators will be terrified of them.

"Let's engrave the Celestial Thunder Talisman then."

Without a second thought, Jiang Fan immediately consumed a full five thousand Luck Points.

At that moment, he entered an epiphany state and began to activate his Primordial Spiritual Power.

Strands of Primordial Spiritual Power started engraving on the Primordial Talisman.

The Tier Two Celestial Thunder Talisman, being one of the most complex Tier Two talismans.

In the past, many disciples of the Primordial Talisman Sect wanted to engrave the Celestial Thunder Talisman.

However, due to its complexity, few could succeed.

Furthermore, failure would lead to backlash, potentially severely damaging the Primordial Talisman, harming one's foundation.

So few disciples of the Primordial Talisman Sect dared to attempt it.

But for Jiang Fan, this posed no issue.

With the aid of Luck Points, his success rate in engraving the Celestial Thunder Talisman was one hundred percent.

Rumble~~

As the patterns of the Celestial Thunder Talisman appeared on the surface of the Primordial Talisman, resonating with the power of celestial thunder, strands of purple lightning emerged.

Boom!

When the final stroke was completed, the Celestial Thunder Talisman was successfully engraved, instantly sparking with lightning.

The entire Primordial Talisman seemed enveloped by celestial thunder, transforming into a thunder ball.
