

## Fortune 254

Chapter 254: Foreseeing the Future, Gaining Opportunities Without Leaving Home\_2

Ordinary Celestial Thunder Talismans wouldn't be this powerful.

However, under the activation of the Primordial Talisman, the Beginner Celestial Thunder Talisman gathered nine complete bolts of celestial thunder, and then unleashed them simultaneously, the destructive power of which was quite impressive.

And this is merely at the beginner level.

If one's skill level improves further, the destructive power would increase even more.

"Back in the day, the Tier Two Demon Beast had me running for my life."

"But now, it lies dead at my hands."

Jiang Fan clenched his fists, feeling an overwhelming sense of safety and power.

After being in the Cultivation Realm for so long, he finally felt a sense of safety.

No longer like a mere ant, mindlessly killed by a stronger cultivator.

Undoubtedly, only by advancing to Foundation Establishment can one truly be considered a skilled cultivator in the Cultivation Realm, able to carve out a place for oneself.

"Worthy of being my husband, truly powerful."

Beside him, Su Weiwei watched Jiang Fan with awe, feeling how formidable this Tier Two Black-Scaled Beast had truly been.

Even now, dead, the aura emanating from it was still intimidating.

Every scale on its body would be difficult for a common Qi Cultivation Stage Cultivator to break.

But in the face of her husband's Power of Celestial Thunder, it was as fragile as tofu.

Even the Six-winged Poison Bee felt this power, trembling with fear, hiding behind Su Weiwei.

You can imagine, her husband's current combat capabilities are simply extraordinary.

Whoosh!

At that moment, Jiang Fan waved his hand, immediately picking up the storage bags from the five Five Elements Pill Sect cultivators.

His Spiritual Sense scanned them lightly, instantly perceiving all the treasures within.

"I've struck gold, truly struck gold this time."

"So many Centennial Spirit Medicines."

"There are at least seven or eight of them."

Jiang Fan's eyes lit up with excitement.

Even for Foundation Establishment cultivators, Centennial Spirit Medicines are quite valuable.

Even without refining them into elixirs, consuming the spirit medicines can rapidly enhance one's internal spiritual power.

Not to mention, he possesses the Ten Thousand Transformations Pill Furnace.

Completely able to cleanse the toxins and impurities from the spirit medicines.

Thus, without needing to refine them into elixirs, directly consuming them can also enhance internal spiritual power.

Even if he sells them, these Centennial Spirit Medicines are worth at least tens of thousands of spirit stones.

"Spiritual Liquid, three gourds full of Spiritual Liquid."

"Where did these guys get so much Spiritual Liquid from?"

"Haha, all the gains from their trip to the Lingxi Secret Realm now belong to me."

"Seeking Fortune and Avoiding Evil, indeed seeking fortune and avoiding evil."

Jiang Fan felt utterly delighted inside.

He didn't even have to go someplace; merely staying in this Nameless Valley was enough.

This group of Five Elements Pill Sect cultivators voluntarily brought their gains to him.

It's simply an opportunity falling from the sky.

No wonder the Fortune-Telling Talisman told him to stay in the Nameless Valley.

Perhaps it was waiting for these Wealth-Bringing Boys to come over.

He could completely imagine the sacrifices that the disciples of the Five Elements Pill Sect made to obtain these treasures.

They not only had to face the pursuit of Tier Two Demon Beasts but also fend off other cultivators' covetousness.

It was a journey filled with hardships.

Risking even their lives.

But, who would have thought, all their hard-earned gains ended up in his hands?

It's completely like making wedding clothes for someone else.

"Also, there's the Foundation Establishment Spirit Medicine Golden Jade Ganoderma."

"Plus this Tier Two Demon Beast's Demon Core."

"These can be used as the main ingredients for Foundation Establishment Pills."

"If these main ingredients are taken out, they can at least be exchanged for one or two Foundation Establishment Pills."

Jiang Fan rubbed his chin.

Although he has already advanced to Foundation Establishment and no longer needs Foundation Establishment Pills, Su Weiwei has yet to reach Foundation Establishment.

So he must plan ahead and prepare Foundation Establishment Pills.

This way, when Su Weiwei advances to the Ninth-Layer Qi Cultivation, there's no need to worry about Foundation Establishment resources.

Even though he doesn't need so many Foundation Establishment Pills.

But Foundation Establishment Pills are strategic resources, and he can exchange them with other Foundation Establishment cultivators for some precious spirit medicines.

Of course, besides these treasures, the storage bag contains several talismans, elixirs, magical artifacts, spirit stones, etc.

Though they don't compare to those treasures.

Altogether, they still value at least tens of thousands of spirit stones.

Undoubtedly, the treasures from these Five Elements Pill Sect cultivators made him immeasurably wealthy overnight.

The benefits obtained were indeed abundant.

Boom~~

At that moment, a message came from deep within Jiang Fan's consciousness: "After a fierce battle, you defeated the Tier Two Demon Beast Black-Scaled Beast along with five cultivators from the Five Elements Pill Sect, overcoming a life-and-death tribulation, you gained ten thousand Luck Points."

What?!

Perceiving this message, Jiang Fan sensed that his Luck Points had significantly increased, the Fortune-Telling Talisman gently trembled, he never expected to gain so many Luck Points, reaching the tens of thousands.

Clearly, the Luck Points from these five cultivators from the Five Elements Pill Sect were substantial.

After defeating them, their Luck Points transferred to him.

Previously, he consumed many Luck Points by refining the Primordial Talisman Pen and engraving the Celestial Thunder Talisman, but now it's all replenished, which satisfies him greatly.

"Crazy, truly crazy."

"You didn't even leave the valley, merely staying here."

"And yet you obtained a Foundation Establishment Spirit Medicine—Golden Jade Ganoderma?"

"And even acquired a large amount of Centennial Spirit Medicine and Spiritual Liquid."

"Is there any justice in this world?!"

Seeing this, even the Ten Thousand Transformations Pill Furnace was at a loss for words, not knowing quite what to say.

Initially, it thought this kid wasted the opportunity by staying in the Lingxi Secret Realm and not going out to find fortunes, considering it a sheer waste of the opportunity.

Who would have guessed, this guy not only seized the chance to advance to Foundation Establishment, but almost immediately post-breakthrough, he encountered a group of Wealth-Bringing Boys.

The opposite side obediently delivered their gains from the Lingxi Secret Realm.

It's unimaginable how much effort this kid saved in collecting spirit medicines.

Even Tier Two Demon Beasts came to die.

Offering not only their Demon Cores but also a vast amount of demon beast meat.

It's akin to pies falling from the sky.

Now it couldn't help but recall its past adventures with Daoist Wan Hua.

At that time, Daoist Wan Hua was tirelessly seeking spirit medicines and various resources, risking his life.

Not only having to guard against the dangers in the depths of secret realms but also against the covetousness of other Tribulation Cultivators, in short, each opportunity sought was a matter of life and death, like walking on thin ice.

Unlike this guy, staying at the same spot, with loads of cultivators voluntarily delivering opportunities.

The difference between people is simply too vast.

Utterly unreasonable.

"That shows my luck is good."

Jiang Fan said with a smiling face.

Good luck?

This is beyond good luck, it's defying the heavens.

Could this guy be heaven's illegitimate child?

The Ten Thousand Transformations Pill Furnace was very annoyed.

It simply couldn't explain this scenario, exceeding its understanding.

"Husband, you were indeed right earlier."

"Not fighting is fighting."

"Never expected other cultivators would indeed bring opportunities."

"If we went on adventures, we might not have gained so many treasures."

"Moreover, encountering unpredictable dangers."

Su Weiwei expressed with deep sentiment.

She felt her husband was truly far-sighted, often able to perceive the early advantages.

If they had indeed gone to seek spirit medicines earlier, they might have been hunted by those Tier Two Demon Beasts of the secret realm world.

Or possibly become the enemies of other cultivators.

Stalked by countless Tribulation Cultivators.

How could they have received such treasures delivered?

It's the perfect example of prey stalking the cicada, unaware of the praying mantis.

"Let's clean up this Tier Two Demon Beast's corpse first."

"Its flesh and various materials are quite valuable."

Jiang Fan chuckled.

He waved his hand, conjured a fireball, and threw it at those cultivators, instantly turning them into ashes.

This way, the bodies are suitably disposed of.

So that even Five Elements Pill Sect cultivators couldn't track them.

And he's not afraid of revenge from Five Elements Pill Sect.

After all, this is the Lingxi Secret Realm, only Qi Cultivation Stage cultivators can enter here.

Even if they want to find clues, there's no way.
