

Fortune 273

Chapter 273: Found an Ancient Teleportation Array and Left the Ten Thousand Beasts Mountain Range_2

It was precisely under the backing of that Golden Core Demon Cultivator that this group of Demon Cultivators dared to swagger around the Ten Thousand Beasts Mountain Range, plundering and murdering cultivators.

At this moment, he also remembered those cultivators who disappeared after leaving Yunlai City.

Perhaps they met their end at the hands of this group of Demon Cultivators.

If he hadn't stayed in Yunlai City but left, he might have encountered this group of Demon Cultivators, or even the Golden Core Demon Cultivator.

In that case, he would likely be doomed.

The power of the Fortune-Telling Talisman truly is unfathomable.

Whoosh!

Thinking of this, Jiang Fan waved his hand, immediately collecting the Storage Bags of these Demon Cultivators.

After all, these Storage Bags were his spoils of war.

Moreover, Demon Cultivators often rob and loot, surely acquiring quite a bounty.

However, he didn't have time to inventory this loot now.

Currently, the most important thing is to obtain this Seventh-Grade Opportunity.

At this moment, Jiang Fan, taking Su Weiwei with him, headed towards Bi Jia Mountain.

Following the hints of the Seventh-Grade Opportunity, they arrived at a cave in Bi Jia Mountain.

They ventured deeper and deeper.

Soon, they reached the depths of the cave.

Suddenly, a massive platform appeared at the cave's deepest point.

On it floated countless array patterns, extremely mysterious.

"No way, how could there be an ancient Teleportation Array here?"

The Ten Thousand Transformations Pill Furnace exclaimed at once.

It was experienced and knowledgeable and naturally understood the origins of this array.

To be honest, it was baffled as to why a Teleportation Array would appear here.

It seemed to have been abandoned for a very long time.

"Teleportation Array? Can it be used?"

Jiang Fan immediately used his Spiritual Sense to inquire of the Ten Thousand Transformations Pill Furnace.

He felt extremely excited.

Seventh-Grade Opportunity, so this Teleportation Array is the Seventh-Grade Opportunity?!

Undoubtedly, for him, this must be the best opportunity at present.

To be honest, the Ten Thousand Beasts Mountain Range is too dangerous now, it's simply in chaos.

Many Golden Core Influences are at war.

There's basically no safe place anywhere.

If he stayed in the Ten Thousand Beasts Mountain Range, he would certainly be drawn into the conflict.

Although Jiang Fan is quite powerful now, compared to a Golden Core Zhenren, what is he?

At most, just a slightly larger ant, still insignificant.

That's why he had long thought of leaving the Ten Thousand Beasts Mountain Range.

The problem is, leaving the Ten Thousand Beasts Mountain Range is no simple task.

This place spans hundreds of thousands of kilometers.

If relying on the flight of a Foundation Establishment Cultivator, who knows how long it would take?

Moreover, along the way, he might encounter powerful Demon Beasts or other cultivators.

With a little carelessness, he might die halfway.

But now it's different.

This place actually has an ancient Teleportation Array.

Just like the Teleportation Array he used to acquire the Primordial Talisman Sect's legacy, it could transport him to another place.

It could also help him leave this troubled place in the Ten Thousand Beasts Mountain Range.

"It looks intact."

"As long as you put Spirit Stones on it, it should be usable."

"The issue is, we don't know what the destination of this Teleportation Array is."

"If it's a very dangerous place, wouldn't that just be courting death?"

"So I think it's better not to use it rashly."

The Ten Thousand Transformations Pill Furnace said cautiously.

To be honest, even the former Daoist Wan Hua would not dare to use an unknown Teleportation Array recklessly.

Because you can't be sure of the destination of this Teleportation Array.

If it's the enemy's stronghold, wouldn't you be walking right into the trap?!

Moreover, activating the Teleportation Array would at least cost tens of thousands of Spirit Stones.

Spending so many Spirit Stones just to go to an unknown place, who would be so foolish?

"As long as it can be used, that's good enough."

Hearing this, Jiang Fan felt very satisfied and immediately stepped forward.

Then he took out fifty thousand Spirit Stones from himself and placed them in the array's groove.

"Are you crazy?"

"We don't even know who set up this Teleportation Array."

"And we don't know what the destination is either."

The Ten Thousand Transformations Pill Furnace was stunned, wondering when this boy became so bold; he always used to play it safe before.

"Don't worry, there won't be any problems, right?"

Jiang Fan smiled slightly.

This was the confidence brought to him by the Fortune-Telling Talisman.

Undoubtedly, this ancient teleportation array is the Seventh-Grade Opportunity.

So the other location of this teleportation array must be safe, otherwise it wouldn't be called an opportunity.

"Okay."

Seeing Jiang Fan's inexplicable confidence, the Ten Thousand Transformations Pill Furnace felt increasingly unfamiliar with its master, wondering why this guy was so confident.

"Come on, Weiwei."

Jiang Fan pulled Su Weiwei along to stand on top of this teleportation array.

Then, without hesitation, he activated the ancient teleportation array.

Fifty thousand spirit stones were consumed in an instant, transformed into energy for the teleportation array.

Boom~

In an instant, the entire array began to tremble, emitting golden light, an invisible void power enveloping Jiang Fan and Su Weiwei's bodies.

The next second, the two were transported away, disappearing without a trace.

Immediately, the teleportation array shattered.

It was clear that due to its age, this was the last time the teleportation array could be used.

After Jiang Fan used it, it completely vanished.

Whoosh!

Not long after, a blood-colored figure suddenly appeared outside, resembling a blood demon, with overwhelming blood qi emanating from him, sharply dropping the surrounding temperature.

The opponent's cultivation had reached the Golden Core Realm, a Golden Core Demon Cultivator.

"Damn it, my blood slaves have been killed."

"Who on earth killed my blood slaves?"

The Golden Core Demon Cultivator was both shocked and enraged.

He had invested significant effort to cultivate these blood slaves.

The reason he kept them alive was the hope that they would eventually mature.

By then, these blood slaves would become a Great Medicine.

And might even help him break through to Nascent Soul.

But now, the carefully nurtured blood slaves had been killed, leaving not even a piece behind.

Years of hard work wasted, making him seethe with hatred, wanting to tear the culprit to shreds.

"Wait, there's a teleportation array here?"

"Could that guy have escaped through the teleportation array?"

"Could it be that the culprit had long been planning this?"

At this moment, the Golden Core Demon Cultivator also entered the cave and saw the traces of the array inside.

Unfortunately, since the teleportation array was shattered, he couldn't use it.

He could only watch helplessly as the culprit escaped.

Undoubtedly, the other party must have used the teleportation array, not knowing where they were transported.

They might have completely left the Ten Thousand Beasts Mountain Range.

No matter how angry he was, it was to no avail.

"Enough, enough."

"It's just a group of blood slaves that died, I'll continue to cultivate new ones."

"There are so many loose cultivators, I won't lack candidates."

"The more important thing now is Yunlai City."

"It's estimated that a Golden Core battle will erupt soon."

"If he can seize the opportunity to kill a Golden Core and devour their blood, it'll be a huge windfall."

"This is a once-in-a-lifetime opportunity that can't be missed."

The Golden Core Demon Cultivator's eyes showed a hint of coldness.

Knowing he couldn't track the culprit, he chose to give up.

For him, the impending Golden Core battle was more important.

After all, he risked being besieged by numerous forces to come to the Ten Thousand Beasts Mountain Range.

Now he can't afford to lose the bigger picture.

...

Whoosh!

At this moment, Jiang Fan and Su Weiwei felt a dizzying sensation, and then found themselves in an unfamiliar place, which seemed to be a mountain range, situated in a primordial forest, with desolation all around.

At the same time, they also noticed that the teleportation array was now gone.

In the future, they would not be able to return to the Ten Thousand Beasts Mountain Range through the teleportation array.

The immediate priority was understanding where they had ended up.

Boom~~

Just then, a message resonated deep within Jiang Fan's consciousness: "Escaping the Ten Thousand Beasts Mountain Range, distancing yourself from the center of calamity, surviving a life-and-death catastrophe, you earn twenty thousand Luck Points."

What?!

Perceiving this message, Jiang Fan blinked in surprise.

He had merely escaped using the teleportation array, yet he had survived a great calamity.

And received twenty thousand Luck Points at once, which was extraordinary.

What kind of disaster could merit twenty thousand Luck Points?

Could it be that had he stayed in the Ten Thousand Beasts Mountain Range, he would indeed have faced a life-and-death catastrophe?

At that moment, Jiang Fan felt that the dangers within the Ten Thousand Beasts Mountain Range might exceed his imagination.

Perhaps there were even more hidden dangers yet to be revealed.

Choosing to leave the Ten Thousand Beasts Mountain Range was undoubtedly the right choice.
