

Fortune 278

Chapter 278: Easy Crossing the Tribulation, Harvesting Tier Two Thick Earth Pill_2

The methods are even more mysterious and unpredictable, difficult to resist.

Countless true disciples from Nascent Soul sects have fallen to the tactics of the Heart Demon Sect, resulting in the birth of heart demons, leading to their demonic deviation and death.

Hence, each sect harbors deep hatred for the Heart Demon Sect.

Unfortunately, the concealment skills of the Heart Demon Sect cultivators are too advanced.

Even after multiple encirclements, they remain unscathed and have instead grown even stronger.

"In that case, is there any way to deal with them?"

Jiang Fan's face was solemn.

He had a premonition that as his cultivation continued to rise, he would inevitably clash with Heart Demon Sect cultivators sooner or later.

After all, righteous cultivators and demonic cultivators are on opposing sides.

If there are no corresponding methods, it may be difficult to withstand them.

"Of course there are ways to deal with them."

"For example, the Pure Yang Power and the Power of Celestial Thunder are among the methods to restrain the Heart Demon Sect."

"The Cyan Lotus Earth Fire Talisman and Celestial Thunder Talisman on you should effectively restrain them."

"So there's no need for you to worry too much."

The Ten Thousand Transformations Pill Furnace believed that its master was possibly the least afraid of the Heart Demon Sect cultivators, given the various methods on him that just happened to restrain such special cultivators.

Of course, this only applied to its own master.

Other cultivators facing the Heart Demon Sect's methods might find themselves helpless.

After all, Heart Demon Sect cultivators are skilled in illusion techniques and adept at inducing heart demons.

A moment of carelessness might lead one to fall for their tactics.

"I see."

Jiang Fan nodded, feeling much relieved.

It seems his earlier choice of using the Celestial Thunder Talisman was indeed very wise.

This talisman not only restrains demons but also restrains demonic cultivators.

It can be said to possess the supreme and firm power, with infinite mysteries.

Although difficult to master, once mastered, it indeed adds great benefit, like wings to a tiger.

"But master, your luck is indeed great."

"You managed to leave with people from the Profound Celestial Sword Sect."

"Had you stayed at Green River Market, you would surely have confronted that group of Heart Demon Sect cultivators."

"At that time, it would have been a dire situation."

The Ten Thousand Transformations Pill Furnace sighed with emotion.

It increasingly felt that its master's luck was extraordinary.

Any random decision made seemed to coincidentally avoid a death tribulation.

It was as if calamity could never touch its master.

Having lived so long, it was the first time it felt so easy and carefree.

In the past, when following Daoist Wan Hua, they were constantly hunted, rarely having a moment's respite.

Never like now, sitting and watching the clouds rise and fall.

Boom~~

At this moment, a message once again resounded from the depths of Jiang Fan's sea of consciousness: "You cautiously follow the Profound Celestial Sword Sect cultivators to leave, avoiding an attack from the demonic cultivators, narrowly escaping death, and you gain five thousand Luck Points."

In an instant, he felt his luck once again increase significantly.

Although this addition wasn't as much as before, considering he hadn't done much, it was already quite good for him to gain this much luck.

Bit by bit accumulation, his luck on him would surely grow more and more immense.

Currently, his Luck Points had increased to fifty-five thousand.

"Damn demonic remnants."

"Everyone, don't need to worry."

"The Profound Celestial Sword Sect has already tracked their traces."

"This time, they can't escape."

"Everyone, come with me to eradicate this group of demonic remnants."

At this moment, Golden Core Sword Cultivator Su Jinlin stood out, exuding a terrifying killing intent and Sword Qi.

It seemed any demonic cultivator standing before him would be cut down with a single sword.

Sensing this powerful force, many loose cultivators also felt greatly reassured.

Such a powerful Golden Core Zhenren certainly would not fear those demonic remnants.

...

One day later.

Under the leadership of Golden Core Sword Cultivator Su Jinlin and other Profound Celestial Sword Sect cultivators, they found the group of rampaging Heart Demon Sect demonic cultivators.

After a battle, this group of demonic cultivators was completely annihilated, none left alive.

It's safe to say this Golden Core Sword Cultivator was truly too powerful.

And this group of Heart Demon Sect demonic cultivators offered basically no resistance and were killed completely.

None left alive.

This battle fully demonstrated the tremendous power of the Golden Core Sword Cultivator, which was astonishing to behold.

With a casual sword slash, he could shatter mountains and tear the earth, embodying the demeanor of a Sword Immortal.

Meanwhile, Jiang Fan and Su Weiwei were just minor figures.

The two merely paddled along during this battle, hardly using their power.

Essentially, they played no significant role in the confusion of this battle.

Yet even so, they still earned some credit.

Jiang Fan received a reward from the Profound Celestial Sword Sect, a vial of Tier Two Elixir Thick Earth Pill.

This elixir's medicinal power is gentle and, after consumption, can slowly increase the Spiritual Power within a Foundation Establishment cultivator.

It's very popular among Foundation Establishment cultivators, and it's not cheap.

Su Weiwei also received some Tier One Upper Grade elixirs, which was also a considerable gain.

"Husband, this mission seemed quite easy."

"We hardly needed to exert ourselves, and it was over."

"At first, I thought it would be extremely dangerous."

Su Weiwei said with emotion.

At first, she thought chasing demonic cultivators would be a situation of life and death.

Who knew, the cultivators from the Profound Celestial Sword Sect were so strong, simply unmatched.

Taking down those demonic cultivators seemed as easy as chopping vegetables.

Basically, they were just cheering from the sidelines, not needing to take much action.

And yet still easily received the mission reward from the Profound Celestial Sword Sect.

"It certainly was easy."

Jiang Fan nodded, he too felt this mission was exceptionally easy.

However, perhaps this was due to his own luck.

If the mission had truly been extremely dangerous, he would have long since fled, not getting involved at all.

"Those Heart Demon Sect cultivators were strangely weak, oddly so."

"It felt like they were just cannon fodder."

"Could there be some conspiracy behind the Heart Demon Sect?"

The Ten Thousand Transformations Pill Furnace was worried.

It felt that those Heart Demon Sect cultivators appearing voluntarily hinted at a major event.

Otherwise, why would these hidden figures expose themselves to the light of day?

Even after eliminating this group of demonic cultivators, the true important figures behind the Heart Demon Sect had yet to make a move.

It seemed like the calm before a storm.

"Whatever conspiracy they have has little to do with us."

"We're just loose cultivators, it doesn't involve us."

"For now, there's nothing to worry about."

Jiang Fan communicated through spiritual sense.

His Fortune-Telling Talisman hadn't warned him, indicating that even if the Heart Demon Sect had some conspiracy, it couldn't possibly target him, as he was just a minor figure.

Undoubtedly, their target must be the Profound Celestial Sword Sect and its elite disciples.

He should just quietly cultivate and enhance his cultivation level.

It's not suitable to involve himself in such a conspiracy.

"That indeed seems right."

"Whatever their conspiracy is, the master should focus on rapidly enhancing cultivation."

The Ten Thousand Transformations Pill Furnace couldn't help nodding, agreeing.

"By the way, since you've been here before, you must be quite familiar with this place."

"I want to find a Tier Two Spirit Vein, do you have any suggestions?"

Jiang Fan asked.

He thought that as his cultivation level increased, he definitely needed a stable cultivation cave.

Without a Tier Two Spirit Vein, cultivation speed would be too slow.

A good cultivation location can absolutely yield double the results with half the effort for a cultivator.

"That's simple."

"You just go to Xuanjian City, governed by the Profound Celestial Sword Sect, and find the steward to rent a Tier Two Spirit Vein."

The Ten Thousand Transformations Pill Furnace straightforwardly replied.

"Can Tier Two Spirit Veins be rented?"

Jiang Fan blinked.

After all, in the Ten Thousand Beasts Mountain Range, most Tier Two Spirit Veins were claimed.

Even if you wanted to rent, there was no way to do so.

"Of course, they can be rented."

"You think this is the Ten Thousand Beasts Mountain Range?"

"This place counts as a cultivation paradise on the entirety of the Southern Continent."

"The Spiritual Qi here is many times denser than the Ten Thousand Beasts Mountain Range."

"Tier Two Spirit Veins, while not everywhere, are still quite common."

"The Profound Celestial Sword Sect's disciples are not numerous enough to occupy all Tier Two Spirit Veins."

"Just like how an Emperor's palace may be grand, but when sleeping, he still only sleeps in one bedroom."

"So instead of these Tier Two Spirit Veins being wasted, it's better to rent them to Foundation Establishment Loose Cultivators, and they can even earn some money."

"It's a win-win situation for both parties."

The Ten Thousand Transformations Pill Furnace straightforwardly explained.
