Chapter 285: Nascent Soul Sect War, Another Choice of Fate

"If we go to the Ten Thousand Beasts Mountain Range, we might get the chance to obtain a Nascent Soul Pill."

"Then we'll be rich."

The Foundation Establishment Cultivator Yu Kelian's eyes flickered, revealing a look of extreme desire.

If she could get the Nascent Soul Pill and sell it, she wouldn't lack cultivation resources before Core Formation.

To some extent, this could be considered a Core Formation opportunity.

After all, even Nascent Soul Cultivators are willing to trade precious treasures for a Nascent Soul Pill.

"It's impossible to obtain."

"There are just too many cultivators eyeing the Nascent Soul Pill right now."

"If we get involved, we'll definitely end up as cannon fodder."

"It's said that the Profound Celestial Sword Sect's real target is actually that Nascent Soul Cave Mansion."

"After all, even just within the outer area, they acquired a Nascent Soul Pill."

"If they enter the core area, who knows what kind of treasure they could obtain."

The Foundation Establishment Cultivator Lian Minglan seemed to have some knowledge about this matter.

But she would absolutely not get involved in such a place of dispute.

Once involved, no number of lives would be enough to die.

"Core area? Could it be that the Nascent Soul Cave Mansion hasn't been completely broken into?"

"Of course it hasn't been broken into. This is a Nascent Soul Cave Mansion; the Tier Four Array inside is just too powerful. Even if numerous Golden Core Zhenren joined forces, it's useless. It's said this time the Profound Celestial Sword Sect's Nascent Soul will personally make a move."

"Sigh, if the Nascent Soul makes a move, then we probably won't have any chance."

"Yeah, the treasures inside will surely be seized by the Profound Celestial Sword Sect."

The many Foundation Establishment cultivators discussed fervently, immediately extinguishing their desire to go to the Ten Thousand Beasts Mountain Range.

If the Profound Celestial Sword Sect makes a move, who among the cultivators can compete with them?

After chatting for a while, Jiang Fan returned to his Cave Mansion.

By this time, Su Weiwei also learned about the events occurring in the Ten Thousand Beasts Mountain Range.

"Husband, fortunately, we escaped in time."

"Had we not escaped, even now, we wouldn't have the chance to run."

Su Weiwei said with great relief.

Clearly, the major forces were engaged in a chaotic battle within the Ten Thousand Beasts Mountain Range.

There was absolutely no way for a flying ship to leave the Ten Thousand Beasts Mountain Range.

The loose cultivators can only be trapped in this place.

Even if they take on great risks and cross the entire Ten Thousand Beasts Mountain Range, the survival rate is exceedingly low.

If unfortunate enough to encounter a tribulation cultivator, or a Tier Two Demon Beast, or Tier Three Demon Beast, they'd likely face death.

"You've got some knack, huh?"

"Your luck is surprisingly good."

The Ten Thousand Transformations Pill Furnace also had nothing to say.

At first, it thought its master was too cowardly.

Slightly encountering some disturbances, promptly fleeing.

But from the outcome, its master's decision was quite correct.

If not for escaping in time, they might be caught in a quagmire.

Who knows what might happen then.

"The matters of the Ten Thousand Beasts Mountain Range aren't related to us anymore."

"The most important thing now is to improve our cultivation."

Jiang Fan hugged Su Weiwei and said.

"Yes, I will strive hard in cultivation."

Su Weiwei nodded.

She feels she has such great resources and lives on a Tier Two Spirit Vein.

The success rate of Foundation Establishment must have increased many times.

If she can't establish her foundation, then there won't be many loose cultivators who could.

During the night, inside the quiet chamber.

By this time, Jiang Fan sat cross-legged on the ground, taking out a Thick Earth Pill.

This was a reward obtained from the Profound Celestial Sword Sect, categorized as a Tier Two Elixir.

After being refined by the Ten Thousand Transformations Pill Furnace, it has become a pill of perfect quality, without any elixir poison.

Without hesitation, he swallowed it immediately.

Instantly, the Thick Earth Pill was refined, transforming into a massive medicinal power, like a torrent, pouring deep into the Elixir Field and Sea of Qi, causing his internal Primordial Spiritual Power to incrementally increase.

It can only be said that it indeed deserves to be a Tier Two Elixir; the medicinal power contained within cannot be compared to ordinary spirit medicine.

Moreover, there's no elixir poison at all.

Just this one Tier Two Elixir alone saved him so much time on hard cultivation.

At this moment, Jiang Fan was entirely absorbed in the sensation of his Primordial Spiritual Power rapidly increasing within his body.

.....

Cultivation knows no passage of time.

In the blink of an eye, half a year passed.

During this half year, Jiang Fan and Su Weiwei stayed in the Cave Mansion on Seven Stars Peak, not going anywhere.

Both of them were peacefully cultivating there, steadily improving their cultivation.

"Finally advanced to Foundation Establishment Second-Layer Perfection."

"I estimate after a bit more cultivation, I'll be able to advance to the Third-Layer Foundation Establishment."

Jiang Fan stayed in his quiet chamber, sensing the abundant Primordial Spiritual Power within his body.

His meridians in his body had been consecutively opened seven or eight channels.

The immense spiritual power flowed through the meridians throughout his body.

The Thick Earth Pill he obtained earlier had been completely consumed, thoroughly refined into the spiritual power within his body.

He felt his understanding of the Mixed Element Talisman Scripture had also reached a higher level.

Additionally, his Soaring Snake Technique had improved to some extent.

However, the rate of progress was relatively slow.

After all, after advancing to Tier Two, it's impossible to progress as quickly as during the Qi Cultivation Stage.

But for him, such a rate of progress was already quite satisfactory.

Continuing step by step, he'll inevitably advance to Tier Two Middle Stage.

Bang~~

At this instant, Jiang Fan felt a surge in his heart, immediately activating the virtual panel on his body.
