

Fortune 287

Chapter 287: Leaving to Avoid Calamity, Obtaining Spirit Medicine Purple Gold Ganoderma

What?!

Perceiving this message, Jiang Fan's eyes revealed a gleam.

He completely didn't expect the Fortune-Telling Talisman to warn him of danger at this moment.

Although the Profound Celestial Sword Sect and Shennong Sect are at war, the battlefield is in the Ten Thousand Beasts Mountain Range, not here.

In the short term, the chaos is unlikely to spread to the Seven Stars Peak.

He shouldn't be in any danger.

However, from the Talisman's message, the enemy might be from the Demon Cultivators.

After all, during this period, Demon Cultivators have been rampant within the Profound Celestial Sword Sect's territory, killing countless cultivators.

Even now, the demon disaster hasn't subsided.

Previously, Demon Cultivators were relentlessly pursued by the sect's cultivators and almost vanished.

But now, the Profound Celestial Sword Sect has been distracted by the events in the Ten Thousand Beasts Mountain Range and dispatched many High-tier Cultivators.

This means that the defensive forces within the territory will definitely be weakened significantly.

At this time, perhaps there will be Demon Cultivators emerging to wreak havoc.

"So, Demon Cultivators have set their sights on the Seven Stars Peak?"

"But it's merely a minor risk, not a major disaster level threat."

"This crisis might not be deadly, but it won't be pleasant either."

"But in any case, it's better to leave and avoid danger, as a wise person wouldn't stand under a dangerous wall."

Jiang Fan's eyes flickered.

As for the so-called Horned Bull Mountain, he also knew it's an ordinary mountain located tens of kilometers from the Seven Stars Peak.

Because it resembles a bull's horn, it's called Horned Bull Mountain.

So going to Horned Bull Mountain to avoid the calamity isn't a difficult task.

"Weiwei, let's leave the Seven Stars Peak for a few days."

At this moment, Jiang Fan said to Su Weiwei.

"Leave for a few days? Why?"

Su Weiwei blinked her beautiful eyes, curiously asking.

After all, for the past six months, her husband has been staying in the cave residence cultivating, basically not leaving.

Unexpectedly, he suddenly wants to leave.

"Well, naturally it's the case of stillness leading to motion."

"I feel my cultivation might have reached a bottleneck, causing distress."

"So I want to go out and relax."

"Perhaps under a relaxed mood, I can break through the bottleneck."

Jiang Fan smiled slightly, casually finding a reason.

He couldn't possibly say he foresaw impending disaster, thus wanting to escape early.

This is his greatest secret, which he cannot disclose to anyone else.

And telling Su Weiwei wouldn't actually serve any purpose.

"Alright."

Su Weiwei nodded.

She knew that cultivation requires a balance between movement and stillness; constant seclusion may not be beneficial.

Her husband has stayed secluded for such a long time; wanting to go out is quite normal.

Moreover, she also wanted to travel around and see the scenery.

Not long after, the two packed their things and left the Seven Stars Peak.

However, before leaving the Seven Stars Peak, they happened to encounter Tier Two Alchemist Wei Song.

"Oh, Fellow Daoist Jiang, where are you planning to go?"

Seeing Jiang Fan go down the mountain, Alchemist Wei Song asked curiously.

After all, over the past six months, this young man seemed to have been cultivating all the time, basically not leaving the Seven Stars Peak.

Suddenly going down the mountain was quite surprising.

"I'm planning to explore the surrounding areas."

"Might as well make a trip to Xuanjian City to buy some things."

Jiang Fan explained.

"Going to Xuanjian City?"

"Then you should be careful."

"These days, the vicinity of Xuanjian City isn't peaceful; it's said that Demon Cultivators have appeared."

"If you encounter Demon Cultivators, it could be very troublesome."

Alchemist Wei Song, seemingly reminded of something, cautioned.

As an alchemist, he knew quite a bit of information.

Due to the ongoing war between the Profound Celestial Sword Sect and Shennong Sect, the area around Xuanjian City has become chaotic.

Those Demon Cultivators seem to be active as well.

Some loose cultivators have fallen victim to them.

"Thank you for the reminder, Fellow Daoist Wei, we'll be careful."

Jiang Fan nodded.

After bidding farewell to Alchemist Wei Song, Jiang Fan and Su Weiwei quickly left the Seven Stars Peak.

Of course, he didn't head to Ox Horn Peak immediately, but wandered around the surrounding areas first.

It's undeniable that the environment here is excellent: clear mountains and waters, overlapping peaks, with dense Spiritual Qi.

It resembles a paradise on Earth.

If it weren't for the dangers of the Cultivation Realm, it would surely be a tourist holy land.

By nightfall.

As night descended, the stars and moon sparsely dotted the sky.

Only then did Jiang Fan and Su Weiwei unhurriedly arrive at a cave in Ox Horn Peak.

Temporarily settling down in this mountain peak.

"Husband, this place is truly beautiful."

Su Weiwei said excitedly.

It's her first time enjoying such a leisurely trip with Jiang Fan.

The scenery along the way made her linger.

Not long ago, she was just a villager's wife from a small fishing village.

And despite setting foot on the path of cultivation, the journey has been fraught with constant danger.

If she's not cautious, she might face demise and disappearance.

How could there be such enjoyable moments?

"If you wish, I'll take you out frequently in the future to walk around and explore the surroundings."

Jiang Fan looked at Su Weiwei tenderly.

"Mhm, mhm."

Hearing this, Su Weiwei's face turned red, feeling a warm surge in her heart.

Soon, the two found themselves drawn to each other.

The cave residence was filled with romantic vibes.

After several hours, the excitement finally calmed.

"Not bad."

Jiang Fan and Su Weiwei embraced, feeling exceedingly sweet.

For them, this actually brings great benefits.

After all, under the effect of the Yin Yang Mandarin Duck Talisman, their cultivation can rapidly improve, enhancing cultivation efficiency.
