

Fortune 297

Chapter 297: Harvesting Sixth-Grade Opportunity, Tier Three Spirit Medicine Buddha Flame Root

However, the death of Ma Zhong Mountain and others has little to do with Jiang Fan.

Basically, regardless of whether he came here, Ma Zhong Mountain and others were destined to die as long as they coveted this Golden Core Cave Mansion.

Unless they decided to give up this Golden Core Cave Mansion.

But that's impossible.

After all, this was an opportunity they acquired with great effort, how could they just give it up?

You can't just stay away because of a single word 'danger'.

But which Golden Core Cave Mansion isn't dangerous?

"As expected, just like the Fortune-Telling Talisman said."

"This trip to the Golden Core Cave Mansion is thrilling yet safe for me."

Jiang Fan's eyes gleamed.

Although the Tier Three Heart-breaking Demon is indeed terrifying and an unsolvable monster for other Foundation Establishment Cultivators,

for him, it wasn't that scary.

After all, he had the Ancient Demon-Vibrating Bell on him.

This Ancient Treasure is both offensive and defensive, capable of defending against soul attacks, truly a marvel.

And the soul attack of this Tier Three Heart-breaking Demon was precisely countered by the Demon-Vibrating Bell.

It couldn't possibly harm him.

Moreover, he mastered the power of the Cyan Lotus Earth Fire, which is also a means to counter the Heart-breaking Demon.

In a way, this trip to the Golden Core Cave Mansion indeed has no danger at all.

"By the way, the choice this time is a sign of great fortune."

"That means there must be treasure inside this cave mansion."

"Having eliminated this Tier Three Heart-breaking Demon, there shouldn't be much danger left inside."

Jiang Fan's heart stirred.

Boom~~

At this moment, a message instantly entered the depths of his sea of consciousness: "You ventured into the Golden Core Cave Mansion only to find a Tier Three Heart-breaking Demon sealed inside. After a life-and-death battle, you finally slew this demon, earning fifty thousand Luck Points and a Sixth-Grade Opportunity."

"Finally, it has come."

Jiang Fan was overjoyed, evidently having gained enormously this time, unexpectedly acquiring fifty thousand Luck Points, and also a Sixth-Grade Opportunity, which is an extraordinary gain.

No wonder it's a sign of great fortune.

This trip to the Golden Core Cave Mansion was indeed worthwhile.

If he had obediently stayed at Seven Stars Peak to cultivate, he wouldn't have gained any benefits.

But for cultivators, without opportunities, the efficiency of cultivation would slow down immensely.

Even Celestial Spirit Root Cultivators require resource aid to enhance cultivation efficiency.

Wealth, companionship, law, and land; wealth has always been prioritized first in cultivation, which is crucial.

And the Sixth-Grade Opportunity apparently waits inside the cave mansion, ready for him to take.

Swoosh!

Thinking of this, Jiang Fan waved his hand and immediately took Ma Zhong Mountain and others' Storage Bags.

Anyway, they're dead, and their treasures naturally belong to him now.

Simultaneously, he also cast the Cyan Lotus Earth Fire Talisman, instantly incinerating Ma Zhong Mountain and others' corpses to ash.

This was to avoid other cultivators tracking him down through the corpses.

Destroying the evidence was the best choice.

In the blink of an eye, Jiang Fan's figure flashed as he entered the Golden Core Cave Mansion.

Then he saw a skeleton left deep inside the cave mansion.

"Sure enough."

"This Tier Three Heart-breaking Demon is trapped here, likely because of this Golden Core Zhenren."

"Without this unnamed Golden Core Zhenren, it might have long gone out to wreak havoc on the world."

The Demon-Vibrating Bell sighed.

It was well aware of the horrifying extent of the Tier Three Heart-breaking Demon.

If it managed to escape, who knows how many creatures would suffer.

Moreover, it would grow at an extremely rapid pace, possibly advancing to Tier Four or even Tier Five.

"Where did this Heart-breaking Demon come from?"

Jiang Fan curiously asked.

After all, he had lived in the Cultivation Realm for a long time.

Though he occasionally heard rumors of demons, he had never encountered one.

Today was the first encounter.

Fortunately, he had the means to deal with demons, otherwise, he would have been in grave danger.

"Basically, most are humans who turned into demons."

The Demon-Vibrating Bell said directly.

"What? What does that mean?"

Hearing this, Jiang Fan was shocked.

He originally thought demons were unique creatures of the Cultivation Realm, but he didn't expect them to be transformed human cultivators.

"It's just as it sounds."

"Every Demon Cultivator could potentially degenerate into a demon."

"The higher the cultivation of a Demon Cultivator, the greater the probability of turning into a demon."

"Because Demonic Cultivation Techniques are inherently techniques for humans to cultivate into demons."

"They weren't created by human cultivators; it's said they come from Outer Celestial Demons."

"Once human cultivators practice Demon Techniques, they can't escape them."

"The demonic nature accumulates until they transform into demons."

"This Heart-breaking Demon should have originated from a Golden Core Zhenren of the Heart Demon Sect."

"Therefore, any sect, any family that is aware of the existence of Demon Cultivators, must eradicate them completely, leaving no trace."

"Because even if one isn't eliminated entirely, it could lead to a disaster in the future."

The Demon-Vibrating Bell said solemnly.

Its tone was very serious.

Because many cultivators in the Cultivation Realm are unaware of the horrors of Demon Techniques, thinking Demonic Cultivation Techniques just have significant side effects.

Little do they know these techniques are traps from Outer Celestial Demons.

It seems that after practicing Demonic Cultivation Techniques, one progresses quickly.

But actually, the faster the cultivation progress, the closer they are to their demise.

Even if ultimately not dying from a cultivation deviation, they would become shells for Outer Celestial Demons, possessed by Celestial Demons.

"Yeah, not every technique can be called a Demon Technique."
