

Fortune 300

Chapter 300: Soaring Snake Technique Breakthrough, Lifespan 1,200 Years_2

After all, every time a Soaring Serpent Rune is engraved, it causes significant damage to the body.

At this time, the assistance of Spirit Medicine is needed to quickly repair the damage to the body, thereby allowing the body to evolve.

And the Soaring Serpent Foundation Establishment Chapter requires the integration of nine hundred and ninety-nine Soaring Serpent Runes to achieve perfection.

If one wants to advance to the Tier Two Middle Stage, then three hundred and thirty-three runes need to be integrated.

Ordinary cultivators don't know how much time it would take to achieve this successfully.

Initially, Jiang Fan was the same, requiring gradual cultivation techniques to achieve this.

But now, with the assistance of the Buddha Flame Root and a large number of Luck Points, the Soaring Serpent Runes on his skin began to increase rapidly.

Thirty runes, sixty runes, ninety runes, one hundred and twenty runes...

It is unknown how much time has passed, but a full three hundred and thirty-three Soaring Serpent Runes appeared on his skin.

It seems that these Soaring Serpent Runes are merging together, forming a small array.

Boom~~

Instantly, Jiang Fan felt a shock in his body, and a strange Power of the Soaring Serpent surged from the depths of the runes, seemingly devouring mysterious substances from the depths of the void.

At this moment, all parts of his body underwent varying degrees of evolution.

Especially his skin, which seemed to become more resilient.

As if a Barrier Power was shrouded on his skin.

"It's done."

Jiang Fan was overjoyed.

He sensed that the three hundred and thirty-three Soaring Serpent Runes etched on his skin seemed to connect, forming a transparent barrier.

Clearly, if an enemy's power attacked his body, it would be blocked by this transparent barrier.

This is why, according to legend, Divine Beasts don't need to wear any Magical Treasures at all.

Their bodies are the most powerful Magical Treasures in themselves.

Even the defense of their skin is equivalent to a Magic Robe.

And the defense is extremely strong, not even a full-power attack from cultivators of the same realm could break through it.

"I'm much stronger now than before."

Jiang Fan clenched his fist.

He felt explosive power surging throughout his body.

With a casual punch, he could shatter a small mountain.

It seemed like even a thought could manipulate the Wind Power of nature, creating powerful storms.

His Lifebound Divine Power Palm Wind ability also further improved.

Even unarmed, he could contend with Mid-stage Foundation Establishment cultivators.

Thud!

In an instant, Jiang Fan lightly punched, and he sensed many Soaring Serpent Runes on his body light up, connecting together to form a unique array.

This array invoked the Power of Heaven and Earth.

In turn, this caused vast Power of Heaven and Earth to bless his body.

At this moment, he seemed to be divinely assisted, and this punch contained terrifying Wind Power.

A terrible wind of the punch formed.

The next second, this power condensed into a clearly visible fist mark, striking the wall of the quiet room.

Suddenly a hole appeared on the wall.

And he was just testing his hand, not using full strength.

"Indeed, compared to ordinary cultivators."

"The combat power of Body Cultivators is also extraordinary."

"Their physique is comparable to Magical Treasures, and even their gestures can invoke the Power of Heaven and Earth."

"Of course, ordinary Body Cultivation Techniques cannot invoke much Power of Heaven and Earth."

"But as an Ancient Era Martial Arts Technique, the combat power of the Soaring Serpent Technique is naturally among the top."

"Like transforming into a Soaring Serpent itself, overturning mountains and seas, riding clouds and mist."

Jiang Fan clenched his fist.

He felt that as he continued to cultivate, he would eventually master the Power of the Soaring Serpent.

Of course, even now, his power and bloodline were already extraordinary.

If he and Su Weiwei were to have offspring, they might even inherit a trace of the Soaring Serpent's Bloodline Power.

But just a trace after all.

Because currently, his cultivation level was too low.

However, if he could advance to Nascent Soul, or even Divinity Transformation, then the bloodline power in his body would naturally be dozens of times richer, and he might create a True Spirit Clan in the future.

"Advancing to the Tier Two Middle Stage should also have greatly increased my lifespan."

Jiang Fan operated the Soaring Serpent Technique, sensing a vast Qi and Blood Power within his body.

At the same time, he harbored a huge Life Origin inside.

His lifespan had definitely increased a lot compared to before.

Thinking of this, Jiang Fan moved his mind and immediately opened the Virtual Panel on his body.

[Name: Jiang Fan]

[Life Chart: Great Blessings Equal to Heaven, attribute: After a great disaster, there will be fortune]

[Lifespan: 1200]

[Spirit Root: Earth Spirit Root]

[Luck Points: 80,000]

[Wealth: 400,000 Spirit Stones]

[Cultivation Technique: Soaring Serpent Technique, Foundation Establishment Chapter (Tier Two Middle Stage)]

[Cultivation Technique: Mixed Element Talisman Scripture, Second Layer]

[Innate Divine Techniques: Emperor's Gaze, Palm Wind]

[Life Talisman: Cyan Lotus Earth Fire Talisman (Mastery), Yin Yang Mandarin Duck Talisman (Skilled), Fortune-Telling Talisman (Skilled), Soul-Shaking Talisman (Mastery), Celestial Thunder Talisman (Skilled), Enchantment Talisman (Skilled), Perception Talisman (Skilled)]

[Realm: Third-Layer Foundation Establishment (70%)]

[Profession: Tier Two Low-grade Talisman Master (90%)]

Obviously, his total Luck Points reached as much as eighty thousand.

Before heading to the Golden Core Cave Mansion, he only had sixty thousand Luck Points.

But after experiencing that catastrophe, he increased by thirty thousand Luck Points.

However, now he consumed as much as ten thousand Luck Points to cultivate the Soaring Serpent Technique, so only eighty thousand remain.

But it was all worth it.

His total wealth is still four hundred thousand Spirit Stones.

But this does not include the treasures of Ma Zhong Mountain and other Foundation Establishment cultivators.

Because he had just returned to Seven Stars Peak for a short time and hadn't had a chance to inventory their treasures yet.

But these are just trivial details.

For him, the really important thing was that after advancing to Tier Two Middle Stage of body cultivation, his lifespan received an astonishing increase.

"It's actually reached a lifespan of twelve hundred years."

"Even Nascent Soul cultivators are only just that."

Jiang Fan clenched his fist, extremely excited.

Compared to before, his lifespan increased by four hundred years.

Though he knew that after advancing to Tier Two Middle Stage, his lifespan would certainly increase.

But he didn't expect the increase to be this much.

You know, even the lifespan of Nascent Soul cultivators is only twelve hundred years.

But now, his lifespan is already comparable to Nascent Soul.

"Is this the lifespan of a Divine Beast?"

"Sure enough, it's unmatched by short-lived species like humans."

"Even now, I'm only at Tier Two level, and my lifespan increased so much."

"If it continues to improve, what will happen then?"

Jiang Fan was very moved.

To be honest, he increasingly desired the subsequent Chapters of the Soaring Serpent Technique.

After all, he currently only had the Introduction, Qi Cultivation Chapter, and Foundation Establishment Chapter.

The subsequent Chapters remained a complete mystery.

If there are no subsequent techniques, then his Soaring Serpent Technique is likely to stop at this point.

However, even so, such a vast lifespan is completely sufficient for him.

But at present, he has no clue regarding the subsequent Chapters of the Soaring Serpent Technique.

Even if he wanted to find them, there was no way to do so.

So he didn't dwell on it too much.

If he gains it, it's good fortune; if he loses it, it's fate.

"However, the medicinal power of the Buddha Flame Root seems not entirely exhausted yet."

"Currently speaking, it is hidden within my body."

"Slowly refining my physique, cleansing impurities from within my body."

"Until the power of the flame is completely consumed."

"Unfortunately, there are too few of these Spirit Medicines."

"Only a single one."

"If he could obtain a large number of Buddha Flame Roots, perhaps his body could be enhanced to a Flawless Glazed Body."

Jiang Fan felt he was being a bit greedy.

Such a precious Tier Three Spirit Medicine, how could it be found in abundance?

However, this also proved the immense benefits contained within the Buddha Flame Root.

Even now, he could still sense traces of Buddha Flame flowing inside his body.

It seemed to be slowly refining his physique.

And this flame had only benefits for his body, no harm.

Even the Flame Power was quite gentle.

Compared to the Cyan Lotus Earth Fire, the Buddha Flame seemed more special and mysterious.
