

Fortune 302

Chapter 302: The Great Calamity of Seven Stars Peak, Another Destiny Choice_2

Jiang Fan had also looked into some information about the Six-winged Poison Bee.

Although the Six-winged Poison Bee, as an Ancient Strange Insect, is considered one of the catastrophes in the Cultivation Realm, the honey it produces is coveted by countless cultivators, as it purifies spiritual power and aids cultivators in overcoming bottlenecks.

For cultivators, especially Loose Cultivators, this honey is on par with Foundation Establishment Spiritual Objects, possibly even Core Formation Spiritual Objects.

Therefore, every gram of honey holds immense value.

If the Six-winged Poison Bee advances to Tier Two, or even reaches Tier Three, it will undoubtedly become a Spirit Beast that brings endless wealth.

Of course, such matters should not be disclosed.

Otherwise, it could attract unimaginable disasters.

Without sufficient strength, it's impossible to hold onto such wealth.

Especially in the cruel Cultivation Realm, wealth cannot be flaunted openly.

"Hmm."

Upon hearing these words, Su Weiwei felt a sense of delight.

Initially, she thought she'd continuously deplete her husband's Spirit Stones like a pure wastrel, but now it appeared that she had the potential to become a female tycoon in the Cultivation Realm.

If the Six-winged Poison Bee advances to Tier Two, her situation will transform.

So currently, for her, the most important thing is advancing to Foundation Establishment.

In fact, she is almost prepared for the Foundation Establishment path.

She had already obtained a Perfect-level Foundation Establishment Pill from her husband's resources.

Once she reaches Qi Cultivation Ninth-Layer Perfection, advancing to Foundation Establishment would be a certainty.

Rumble~~

Just as Jiang Fan and Su Weiwei were about to continue their casual chat, suddenly the entire Seven Stars Peak began shaking, as a terrifying force struck the Barrier Array here, causing massive tremors.

It felt as though it had triggered an earthquake of magnitude seven or eight.

All the cultivators residing on Seven Stars Peak sensed this vibration.

"What's happening?"

Su Weiwei was baffled.

Because she had been living on Seven Stars Peak for so long, this was the first time she'd encountered such an event.

"Hmm?!"

Jiang Fan's eyes flashed coldly. He activated the Perception Talisman's power, and a wave of invisible Spiritual Sense spread in all directions, instantly expanding threefold.

It not only covered Seven Stars Peak but also enveloped the surrounding area.

In the surrounding area of Seven Stars Peak, twelve Foundation Establishment Cultivators suddenly appeared.

Each Foundation Establishment Cultivator was clad in black robes, exuding a dense aura of Demonic Qi.

Evidently, they were Demon Cultivators, more precisely Foundation Establishment Demon Cultivators.

Undoubtedly, the disturbance just now was caused by these Foundation Establishment Demon Cultivators.

Previously, they had been attacking the Barrier Array of Seven Stars Peak.

The reason Seven Stars Peak became the abode of Foundation Establishment Cultivators was due to a Tier Two High-grade Array: Seven-Star Array.

Centered around seven peaks, it resembled the Big Dipper, forming an integral unit.

The seven peaks shared a single spirit.

Once activated, this Grand Array would envelop Seven Stars Peak.

Unless a Golden Core Zhenren personally intervened, Foundation Establishment Cultivators could not break this Tier Two Array — the Seven-Star Array.

Boom~~

Instantly, Jiang Fan sensed the Fortune-Telling Talisman deep in his Elixir Field and Sea of Qi begin to vibrate, devouring strands of destiny power, seemingly peering into the future, piercing through the fog of fate.

An instantaneous message submerged into the depths of his consciousness sea.

"Demon Cultivators attack, unavoidable, face confrontation, the strong win."

"Seize the opportunity to flee, avoid Demon Cultivators, ominous."

"Conceal strength, contribute without exertion, latent risks, minor ominous."

"Proactively strike, kill Demon Cultivators, fortunate."

Upon sensing this message, Jiang Fan realized why the Fortune-Telling Talisman hadn't forewarned him earlier because this calamity was unavoidable.

You can evade it temporarily but inevitably face it eventually.

Because this group of Demon Cultivators had already set their sights on Seven Stars Peak.

Regardless of where he tried to hide, unless he completely left Seven Stars Peak, he could not avoid this calamity.

If he evaded this calamity, it might even cause severe consequences.

Evidently, this group of Demon Cultivators was extremely dangerous.

If allowed to continue developing, their cultivation would progress unchecked, posing a significant threat to him in the future, which was the so-called latent risk.

Hence, the only path was to kill this group of Demon Cultivators.

Even if it meant exposing some of his strength, it did not really matter, and might even yield unexpected benefits.

"Zhang Zichao, last time you were defeated by me, and were pursued by the Profound Celestial Sword Sect."

"How dare you appear before me now?!"

At this moment, Elder Alchemist Wei Song shouted, filled with wrath.

Evidently, he recognized the true identity of the one leading this group of Foundation Establishment Demon Cultivators.

The other had attacked Seven Stars Peak previously.

However, they had underestimated Seven Stars Peak's power and ended up being severely wounded by Elder Alchemist Wei Song and others, fleeing rapidly.

Many Demon Cultivators also fled in disarray.

Yet he couldn't have imagined that these Demon Cultivators, akin to underground rats, despite being hunted by the Profound Celestial Sword Sect, had the audacity to return to Seven Stars Peak; it was truly unbelievable.

Swoosh, swoosh, swoosh!!!

At this very moment, Foundation Establishment Cultivators on other peaks also flew out from their abodes.

Of course, this included Jiang Fan.

A total of six Foundation Establishment Cultivators faced this group of Foundation Establishment Demon Cultivators head-on.

They were well aware that this moment was a matter of survival.

And surrounded by this group of Foundation Establishment Demon Cultivators, there was no other option but to fight to the death.

"Hehe, what's the Profound Celestial Sword Sect worth?"

"Once I annihilate Seven Stars Peak, then escape into the Mist Mountain Range."

"You think the Profound Celestial Sword Sect can do anything to us?"

"The last time the assault on Seven Stars Peak failed was simply because I underestimated you."

"Not only did we flee, but many of our comrades died, causing us severe losses."

"The enmity is unshakable."

"So this time, I've fully prepared and must destroy all of Seven Stars Peak."

Foundation Establishment Demon Cultivator Zhang Zichao sneered.

Clearly, he was a vengeful individual.

The last time at Seven Stars Peak, he suffered a significant loss, and many comrades died.

This was regarded as a profound humiliation.

He always wanted to find an opportunity for revenge.

Having gone through such a long time, he gathered many Foundation Establishment Demon Cultivators.

The objective was to annihilate Seven Stars Peak and exact revenge.

Instantly, he took out a special talisman from his body, utilizing the immense spiritual power within.

Then he threw it towards Seven Stars Peak.

Immediately, the talisman transformed into a streak of golden light, effortlessly piercing through the Array Barrier of the Seven-Star Array, directly infiltrating the core of the array.

This caused the Array Barrier of the Seven-Star Array to immediately dissipate, the gateway flung open.

The entire array ceased to operate at this moment.

"Damn it, this is a Tier Two Array-Breaking Talisman."

"Even a Tier Two Upper Grade Talisman Master may not be able to refine such a Void Talisman."

"How did you obtain this talisman?"

Tier Two Array Master Lian Minglan expressed a bit of panic.

She was controlling this Seven-Star Array.

With the protection of the Seven-Star Array, no matter how formidable this group of Foundation Establishment Demon Cultivators was, they couldn't invade.

Thus, they could naturally rest assured.

Who could have imagined this group of Foundation Establishment Demon Cultivators had a Tier Two Array-Breaking Talisman?

It's known that this is an exceedingly special Tier Two Talisman, with a refinement difficulty matching that of a Tier Three Talisman.

Except for a few Demon Level Tier Two Upper Grade Talisman Masters and Tier Three Talisman Masters, virtually no one can refine a Tier Two Array-Breaking Talisman, each of such special talismans is incredibly valuable.

Moreover, they may not be obtainable even with wealth.

Once used, such special talismans can immediately dismantle a Tier Two Array, causing it to pause briefly.

Thus, the whole Seven Stars Peak would lie exposed, akin to the breach of a castle gate.

Currently, there were only six Foundation Establishment Cultivators on Seven Stars Peak.

But this group of Foundation Establishment Demon Cultivators counted twelve.

In terms of numbers, they were already at a substantial disadvantage.

"Haha, naturally I spent a fortune to acquire it."

"Now without this Tier Two Array: Seven-Star Array, I'll see what you use to resist us."

"This time, I intend to ensure Seven Stars Peak endures chaos and ruin."

Foundation Establishment Demon Cultivator Zhang Zichao grimly said.

Clearly, he had gone to ruinous lengths for this operation.

After all, the Tier Two Array-Breaking Talisman was extremely costly.

If he didn't destroy Seven Stars Peak, he wouldn't recoup his investment.

Indeed, this time it's victory or death for him.
