

## **Fortune 304**

Chapter 304: Easily Crossing the Tribulation, Celestial Thunder Vanquishes Demon Cultivator\_2

"Luckily, we have Fellow Daoist Jiang here, otherwise we'd be completely doomed."

Everyone was astounded.

They didn't expect this newcomer Foundation Establishment cultivator to be so powerful, and he was even a Thunder Cultivator.

He happened to suppress this group of Foundation Establishment Demon Cultivators.

Even in just one encounter, he killed three Foundation Establishment Demon Cultivators.

This greatly reduced the pressure they faced.

"Little Demon Cultivators, dare to come to my Seven Stars Peak to make trouble."

"Absolutely oblivious to life and death."

"Soon I will send all of you to the Yellow Springs."

Jiang Fan stood with hands behind his back, looking calmly at this group of Foundation Establishment Demon Cultivators.

Although his cultivation was only at the Third-Layer Foundation Establishment, his Body Cultivation Realm had reached Tier Two Middle Stage, comparable to Mid-stage Foundation Establishment cultivators. Even if he couldn't defeat them, they definitely couldn't capture him.

Therefore, he was fearless and had been standing in an unassailable position from the start.

"Arrogant kid."

"Get him together, slaughter this guy."

Foundation Establishment Demon Cultivator Zhang Zichao was furious beyond measure, wishing he could rip this kid to shreds.

His carefully laid plan was unexpectedly ruined by this bastard.

Even just starting, three of his Foundation Establishment Demon Cultivator companions were already dead.

Even if this plan succeeded in destroying Seven Stars Peak, it is estimated that he'd be punished by the Heart Demon Sect hierarchy upon returning.

So, no matter what, he had to eliminate this mysterious Thunder Cultivator, this major threat to the Heart Demon Sect.

If this kid continued to grow, who knows how many Demon Cultivators would die at his hands?

Whoosh whoosh whoosh!!!

The remaining Foundation Establishment Demon Cultivators were also furious beyond measure, locking onto Jiang Fan's vital force.

They loathed this mysterious Thunder Cultivator to the extreme.

They could leave other cultivators on Seven Stars Peak alive, but this Thunder Cultivator must die.

Undoubtedly, at this moment, Jiang Fan attracted all the hatred.

"Heh, a bunch of pests."

Jiang Fan gazed at this group of Foundation Establishment Demon Cultivators as if looking at a disorderly mob.

Before these Foundation Establishment Demon Cultivators could make a move, he acted first.

In an instant, he activated the Body-Stabilizing Talisman deep within the Elixir Field and Sea of Qi!

In fact, after his Soaring Snake Technique breakthrough, reaching Tier Two Middle Stage, he sensed that the Soaring Snake bloodline within him became more intense, and the power of his bloodline divine technique — Palm Wind — had increased severalfold.

This also caused the power of the Body-Stabilizing Talisman on him to increase severalfold.

Even Mid-stage Foundation Establishment cultivators could be easily immobilized.

Late-stage Foundation Establishment cultivators can be immobilized for a moment.

It can be said, this Life Talisman can play a magical effect in battle.

Boom~~~

In the next second, Jiang Fan activated the power of the Body-Stabilizing Talisman, instantly gathering 333 Wind Chains.

They were formless and bodiless, silent and invisible.

At the same time, extremely resilient.

Like the Immortal Binding Rope, they entwined this group of Foundation Establishment Demon Cultivators.

Each Wind Chain was resilient to the extreme.

Ordinary Foundation Establishment cultivators can't easily break free.

Merely in an instant, this group of Foundation Establishment Demon Cultivators was controlled by the power of the Body-Stabilizing Talisman.

To be honest, Jiang Fan felt that using the power of the Body-Stabilizing Talisman now was like adding wings to a tiger.

He felt his understanding of Wind Power reached a new level.

At this moment, he felt like the Child of Wind, able to freely manipulate the airflow between heaven and earth.

"How is it possible? Is this the power of the Body-Stabilizing Talisman?"

"A mere Body-Stabilizing Talisman, how could it possibly bind us?"

At this moment, Zhang Zichao and other Foundation Establishment Demon Cultivators were shocked.

They initially intended to act immediately, to kill this mysterious Thunder Cultivator, definitely not giving the opponent a second chance to strike.

Who would have thought that the opponent was also skilled in the power of the Body-Stabilizing Talisman?

In merely an instant, their bodies were immobilized.

They felt their bodies now couldn't move.

Despite trying desperately, not a bit of movement, seeming as if an invisible force had imprisoned their bodies.

Living for so long, it was the first time encountering such a situation.

When did the power of the Body-Stabilizing Talisman reach such a degree?

Even their bodies would be bound, it was truly incomprehensible.

"What a good opportunity, die!"

Elder Alchemist Wei Song's eyes lit up at this scene, as someone who lived over two hundred years old as a Foundation Establishment cultivator, extremely experienced in battle, immediately realized it was the perfect moment to strike and finish off the unlucky ones.

If they don't take action when the opponent is unlucky, then they'll be the ones to suffer soon after.

Though he didn't know what Jiang Fan did earlier, it didn't prevent him from attacking, killing this group of Foundation Establishment Demon Cultivators.

Without hesitation, he immediately took out his Lifebound Spiritual Artifact, a Top-Grade Spiritual Artifact — the Fire Spirit Pearl.

This Top-Grade Spiritual Artifact had immense power, containing Flame Power.

Once erupted, it would definitely be earth-shattering.

He activated the power of the Fire Spirit Pearl, gathering terrifying Flame Power, launching it towards this group of Foundation Establishment Demon Cultivators.

"Die."

Foundation Establishment cultivator Chang Lisheng reacted no slower, as he was a Foundation Establishment cultivator who frequently hunted Demon Beasts, often experiencing life and death, he naturally captured the opportunity to fight.

He immediately drew a flying sword from himself, being a Tier Two Sword Cultivator.

Instantly, terrifying Sword Qi struck, locking onto the vital force of this group of Foundation Establishment Demon Cultivators.

Each Sword Qi had the power to shred everything, extremely formidable.

"Dare to cause trouble at Seven Stars Peak, die."

Fan Wenli being a Tier Two Rune Master, indeed was a bit slower in response, but seeing other Foundation Establishments attacking, he quickly followed, took out Tier Two Talismans from himself.

Currently, Tier Two Talismans seemed free as he threw them out.

After all, now is the moment of their life and death, how could they save Talismans, save Spirit Stones?

If they don't kill this group of Foundation Establishment Demon Cultivators, they'll be the ones dying.

Then the wealth on themselves would be taken by the Foundation Establishment Demon Cultators.

Simply giving away to this group of Demon Cultivators.

So now is not the time to save.

One after another Tier Two Talismans were cast out, akin to Tier Two Techniques, not inferior to the full strike of Foundation Establishment cultivators.

"Kill."

Foundation Establishment cultivator Yu Kelian wasn't willing to show weakness either, though her battle power was weaker, but at least she was a Fifth-Layer Foundation Establishment cultivator, she took out a Mid-Grade Spiritual Artifact — Earth-Splitting Whip.

Holding this black whip, she launched towards this group of Foundation Establishment Demon Cultivators.

Terrifying black whip shadows appeared, with Earth-Splitting force.

Every whip seemed to tear mountains, tear the earth.

Ordinary Foundation Establishment cultivators couldn't withstand the power of a single whip.

"Blazing Fire Array!"

Array Master Lian Minglan also quickly acted, as an Array Master naturally employing arrays, she took out an Array Plate from herself, using her body as the array core.

Instantly, a temporary Tier Two Array enveloped this group of Foundation Establishment Demon Cultivators.

Endless Flame Power gathered.

Attacking this group of Foundation Establishment Demon Cultivators.

Simultaneously, the force of Array Barrier suppressed them, making escape impossible, avoidance impossible.

It can be said, at this moment on Seven Stars Peak, six Foundation Establishment cultivators acted simultaneously, the power was earth-shattering.

Boom boom boom~~~

After a breath, Foundation Establishment Demon Cultator Zhang Zichao and others couldn't even scream in agony, they were besieged by Jiang Fan and others, unable to last a second.

Instantly, they were all annihilated by this force, shattered, becoming a heap of flesh paste.

Astonishing deep pits appeared on the ground, scattered stones, rolling smoke and dust.

Yet nearby, Jiang Fan was leisurely.

Basically, he didn't exert much effort.

He merely played an auxiliary role, the main battle power was from this group of veteran Foundation Establishments.

But if it weren't for his assistance, this battle wouldn't be so easy.

"We won, we actually won?!"

Seeing this scene, Array Master Lian Minglan couldn't believe her eyes, finding it incomprehensible.

Originally when Seven-Star Array was broken, facing a siege of twelve Foundation Establishment Demon Cultators, she felt it was certain death.

Even attempting to escape was an impossibility.

After all, this place had long been surrounded by Foundation Establishment Demon Cultators.

Attempting to flee, would instead lead to quicker death.

Instead, fighting desperately, perhaps offering a chance to survive.

Who would have thought, in the blink of an eye, offense and defense reversed.

They were unharmed, whereas this group of Foundation Establishment Demon Cultators was wiped out.
