

Fortune 307

Chapter 307: Advancing to Fourth-Layer Foundation Establishment, Engraving the Earth Escape Talisman

Evening time.

Jiang Fan also returned to the cave mansion at Seven Stars Peak.

Of course, he didn't disturb anyone, as if he had never left.

At this moment, inside the quiet room.

Jiang Fan sat cross-legged on the floor, taking out the Soul Infant Fruit from the internal space of the Ten Thousand Transformations Pill Furnace.

This type of Spirit Fruit is quite special; it doesn't require the refining of the Ten Thousand Transformations Pill Furnace and can be consumed directly.

Without another word, he swallowed the Soul Infant Fruit in one mouthful.

Rumble~~~

In an instant, once Jiang Fan devoured this fruit into his stomach, it transformed into a mighty surge of Soul Energy, then sunk deep into the sea of his consciousness.

"This!"

Jiang Fan's eyes gleamed with brilliance as he sensed this energy flooding into his sea of consciousness, realizing his soul was visibly strengthening.

It was known that his soul was already several times stronger than the average cultivator's.

Yet the energy of the Soul Infant Fruit could further enhance his soul.

It was imaginable that this was absolutely an extraordinary Spirit Medicine.

After all, even in the vast Cultivation Realm, spiritual objects that enhance the soul are indeed few and far between.

Being able to obtain the Soul Infant Fruit was truly a tremendous opportunity.

Boom~~

At this moment, aided by the Soul Infant Fruit, his sea of consciousness seemed to be constantly broadening.

It could completely accommodate more Soul Energy.

However, sometimes a surging increase in Soul Power is not necessarily beneficial.

Without a strong physique, an excessively powerful soul can cause the body to weaken continuously.

Thus leading to a frail and sickly condition.

So humans with naturally strong Soul Power are often prone to premature death.

Fortunately, he cultivated the Soaring Snake Technique, his physique comparable to powerful Demon Beasts.

Even with the surging increase in Soul Power now, his body could completely withstand its soul.

Just like a solid vessel, capable of bearing even an elephant.

It was unknown how much time had passed.

With the energy of the Soul Infant Fruit consumed, Jiang Fan noticed his soul enhancement was reaching its conclusion.

Dong!

With a thought, a powerful soul pressure spread around him.

This pressure almost solidified into substance.

If weak creatures felt this soul pressure, they might be instantly struck unconscious.

The legendary Long Wei had a similar effect.

"So powerful."

"I seem to have gained ease in controlling the Heaven and Earth Spiritual Qi."

"With a thought, I can manipulate Spiritual Qi in all directions."

"It's as if a Law Domain is forming."

Jiang Fan clenched his fist.

He immediately perceived the benefits of a strengthened soul—more powerful control of Heaven and Earth Spiritual Qi.

It's akin to using one's arm with high dexterity.

It's known why a Golden Core Zhenren can become a sect-establishing Grandmaster; they can found a sect and become a hegemony.

This is because a Golden Core Zhenren possesses terrifying combat power.

Completely superior to all beings.

In every move, there lies immense power, akin to a humanoid missile.

With a casual strike, they can crush mountains and shatter the earth.

No matter how many Low-Tier Cultivators confront them, they're no match for the Golden Core Zhenren.

The reason a Golden Core Zhenren is so powerful is due to the strength of the Golden Core Domain.

Once activating the Domain, it forms a field-like suppression in all directions.

Thus, other Low-Tier Cultivators can't even control Spiritual Qi, left at the Mercy of others.

And the Golden Core Zhenren can achieve this because of their overwhelming Soul Power.

Though currently, Jiang Fan seems capable of forming an embryonic Law Domain.

Though it doesn't compare to a Golden Core Zhenren's Domain, his grasp of Spiritual Qi still surpasses other Foundation Establishment cultivators.

Even a Late-stage Foundation Establishment cultivator can't compare with him.

"To advance to the Golden Core, a crucial step is the Spiritual Sense Barrier."

"It must transform and nurture a Golden Core Spirit Sense."

"Perhaps I don't have to do much; I may achieve this easily."

Jiang Fan's eyes sparkled with joy.

Clearly, the Soul Infant Fruit was precious, equivalent to Golden Core Spirit Medicine.

If Foundation Establishment Ninth-Layer cultivators obtained it, they'd be ecstatic.

Because such Spirit Medicine can increase their chance of advancing to Golden Core by ten to twenty percent.

Of course, devouring this Spirit Fruit grants significant benefits.

It essentially clears an important barrier to achieving Golden Core advancement.

"Indeed, my Foundation Establishment Spirit Sense is vastly stronger than before."

Now, Jiang Fan perceives that, with his soul's enhancement, his Spiritual Sense is continually growing.

His Spiritual Sense spreads out, encompassing all directions.

Compared to before, its coverage is ten times that of same-rank cultivators.

This means his Soul Power is also ten times that of same-rank cultivators.

If he invokes the Perception Talisman's power, perhaps the scope of Spiritual Sense exploration will be even broader.

Even Late-stage Foundation Establishment cultivators can't compare with him.

"The power of the Soul-Shaking Talisman has also increased."

Jiang Fan initiated a thought.

He activated the Soul-Shaking Talisman deep within his Elixir Field and Sea of Qi, channeling vast Soul Power into it.

Instantly, an invisible wave of Soul Energy swept outward, forming terrifying ripples.

It even caused destruction to reality.

Fissures appeared on the ground.

This clarifies how mighty the Soul-Shaking Talisman's power is.

Facing this Soul Attack, even a Mid-stage Foundation Establishment cultivator might bleed from seven orifices.
