

Fortune 311

Chapter 311: Omen of Great Peril, Fleeing the Territory of the Profound Celestial Sword Sect_3

Moreover, it does not count as breaking the law.

After all, I have never received a conscription order.

It was simply that I went on an adventure at the time, so not agreeing was a matter of course.

More importantly, there are so many Foundation Establishment Cultivators within the Profound Celestial Sword Sect; even without me, it doesn't matter.

They can't possibly fixate on just one person like me.

"Thank you, Fellow Daoist Wei, for your guidance."

Hearing this, Jiang Fan said gratefully.

He felt deeply moved.

Is this an invisible benefit from showing my strength and killing those Foundation Establishment Demon Cultivators?

Indeed, staying low-profile would keep me very safe and not a target of criticism.

But it would also lead others to underestimate me.

After all, in the Cultivation Realm, strength reigns supreme, and without strength, one isn't even qualified to speak with others.

However, after showing my strength as a Thunder Cultivator last time, the Foundation Establishment Cultivators throughout Seven Stars Peak admired me greatly.

Everyone wanted to befriend him and establish a good relationship.

Clearly, Elder Alchemist Wei Song is one such person.

If it hadn't been for my previous grand display of prowess, Elder Alchemist Wei Song probably wouldn't have bothered to remind me.

By then, I might unknowingly be forcibly conscripted by the Profound Celestial Sword Sect.

And thus, fall into danger.

Sometimes, a good relationship with others can help you avoid many dangers.

"You're welcome."

Elder Alchemist Wei Song stroked his graying beard, feeling very satisfied.

Previously, he was saved by the other party and was thinking about how to repay the favor.

Unexpectedly, the opportunity came so soon.

"But doesn't Fellow Daoist Wei plan to leave to avoid conscription?"

Jiang Fan asked curiously.

"Fellow Daoist Jiang can avoid it, but I cannot."

"After all, my family and career have long been deeply rooted in the Profound Celestial Sword Sect."

"If I were to leave immediately, years of hard work might be destroyed instantly."

"But you're different; you don't have many attachments here, so naturally, you can leave whenever you want."

Elder Alchemist Wei Song said helplessly.

If he could, he certainly wouldn't want to be caught in this muddy water.

But in reality, this point is simply not feasible.

If he really avoided conscription, years of accumulation would be destroyed instantly.

This is something he cannot accept under any circumstances.

"I see."

Jiang Fan nodded.

To the Profound Celestial Sword Sect, only those Foundation Establishment Clans and Golden Core Clans that have taken root locally are their own people and the best candidates for service.

After all, they already have their territories and cannot run away.

While monks can run, temples cannot.

But Loose Cultivators are different; they are unaccompanied with nothing to hold them back, so naturally, they can't be restricted.

"And even if one does get conscripted, it may not necessarily be a life-or-death situation."

"I've been conscripted several times, haven't I survived each time?"

"I even took the opportunity to gain some fortunes."

"So this matter, for me, might not be a bad thing."

Elder Alchemist Wei Song smiled slightly.

Boom~~

At this moment, Jiang Fan's heart stirred, as he sensed his Fortune-Telling Talisman in the depths of his Elixir Field and Sea of Qi beginning to vibrate, sending a message deep into his sea of consciousness.

"The battle is stalemated, conscription is enforced, chaos is about to commence, with upheavals in heaven and sea."

"Staying at Seven Stars Peak and being forcibly conscripted will bring heavy calamity and great misfortune."

"Hiding in the Mist Mountain Range and encountering a Demon Cultivator is extremely perilous, great misfortune."

"Choosing to hide on other peaks within the Profound Celestial Sword Sect will lead to nothing and gain nothing."

"Head to Spirit Turtle Island overseas and wait for the opportunity, favorable."
