

## **Fortune 312**

### Chapter 312: Calamity Does Not Strike, Gaining a Seventh-Grade Opportunity

What?!

Upon perceiving this message, Jiang Fan's eyes flashed with a sharp light.

He immediately realized that the Fortune-Telling Talisman had undergone a massive change compared to before.

The previous Fortune-Telling Talisman could only predict fortune and misfortune.

However, it couldn't provide the specific events that would happen.

But now, the information provided by the Fortune-Telling Talisman was much greater than before.

It even offered ways to deal with upcoming calamities.

"I see."

"The skill level of the Fortune-Telling Talisman has improved."

"It's already advanced to the Mastery Level."

Jiang Fan sensed that the skill level of the Fortune-Telling Talisman had been remarkably enhanced, clearly with his continuous consumption of destiny and the power of operating the Fortune-Telling Talisman, he finally elevated the skill level of this Life Talisman to Mastery Level.

So this time the Fortune-Telling Talisman would provide so much intelligence.

The intelligence was even so detailed.

Though this was an immensely positive outcome for him.

It means he could acquire more information about the future.

He could also make better decisions.

"It's indeed impossible to stay at Seven Stars Peak."

"Otherwise, I will certainly be forcibly conscripted and made to serve by the Profound Celestial Sword Sect."

"This way, I would be drawn into the war between the Profound Celestial Sword Sect and Shennong Sect."

"I am just a Loose Cultivator, there is absolutely no need to risk my life for the Profound Celestial Sword Sect."

Jiang Fan fell into contemplation.

However, even leaving Seven Stars Peak, not every place is suitable.

For instance, the Mist Mountain Range, a place filled with dangers. If he went, he might encounter Demon Cultivators, which could be more dangerous than being conscripted by the Profound Celestial Sword Sect, such a place is naturally off-limits.

Of course, he could also hide somewhere else within the Profound Celestial Sword Sect.

As long as he can avoid this conscription by the Profound Celestial Sword Sect, he could get through this calamity safely.

But doing so wouldn't yield any gains for him.

The only option is to go to Spirit Turtle Island, where he can not only avoid disaster but gain considerable rewards.

He had already decided where he should go.

Thinking along these lines, Jiang Fan looked at Elder Alchemist Wei Song and asked, "Fellow Daoist Wei, do you know of a place called Spirit Turtle Island?"

Although he learned about Spirit Turtle Island from the Fortune-Telling Talisman, he still wasn't sure where it was.

However, Elder Alchemist Wei Song, having lived so long as a Foundation Establishment Cultivator, was likely knowledgeable about this place.

"Spirit Turtle Island?"

"I believe you know our Profound Celestial Sword Sect is located in the coastal region of the Southern Continent."

"At the edge, there is an endless ocean."

"But the area in close proximity to the mainland still has numerous islands."

"Spirit Turtle Island is one such near-shore island."

"Because the near-shore area is a bit distant from the Profound Celestial Sword Sect, it's in a no-man's-land."

"It's mostly occupied by various family forces and loose cultivators."

"Spirit Turtle Island is such a loose cultivator island, occupied by the Golden Core Zhenren Spirit Turtle Daoist."

"It's said to be a very bustling and lively island, attracting many loose cultivators to settle there."

"Are you planning to go to Spirit Turtle Island to avoid calamity?"

"If that's the case, it is indeed a good place to go."

Elder Alchemist Wei Song stroked his white beard.

He didn't expect this young man to know the geography near the Profound Celestial Sword Sect so well.

As soon as he spoke, he found the best place to go.

One must know that currently within the Profound Celestial Sword Sect territory, things are very chaotic, nowhere is completely safe.

But the near-shore area, for now, is still considered a tranquil zone.

The only threat may come from the demon beasts deep in the sea.

However, such beast tides only occur once every few decades.

If one goes to Spirit Turtle Island, they not only ensure their safety but also meet the daily cultivation needs.

It can be said to be the best refuge.

"Yes, I do indeed want to go check out Spirit Turtle Island."

Jiang Fan nodded, not having much to hide.

"Here is a map to Spirit Turtle Island."

"Please keep it safe, Fellow Daoist."

"If you intend to visit Spirit Turtle Island, you need to set off as soon as possible."

"After all, Seven Stars Peak is at least several thousand kilometers away from Spirit Turtle Island."

At this moment, Elder Alchemist Wei Song thought for a moment, took out a map from his possession, and handed it to Jiang Fan.

Because without a detailed map, it might be very difficult to find the destination.

"Thank you, Fellow Daoist Wei."

Jiang Fan said gratefully.

Indeed, it was correct to demonstrate some of his strength earlier, otherwise, how could this cunning elder alchemist be so open-hearted?

It's simply because he sees a bit of strength and potential, so he wishes to form a good connection.

However, he does not resent this sort of thing, on the contrary, he finds it quite natural.

This world is just like this.

You leverage me, I leverage you.

As long as one can cooperate for mutual benefits and enjoy each other's company, why not?

...

Not long after, having said goodbye to Wei Song, Jiang Fan returned to his cave.

Then he informed Su Weiwei about the upcoming departure from Seven Stars Peak and explained the reasons.

"What? The Profound Celestial Sword Sect is planning to forcibly conscript us?"

Upon hearing this, Su Weiwei was taken aback, completely not expecting such a development.

Originally she thought the Profound Celestial Sword Sect had little presence and wouldn't do things akin to mundane dynasties.

Yet it turns out the Profound Celestial Sword Sect seems even more domineering than mundane dynasties.

"Exactly, so we need to leave as soon as possible."
