

Fortune 314

Chapter 314: Obtaining the Innate Rune, Profound Turtle Talisman

Obviously, when Jiang Fan arrived at Spirit Turtle Island, he finally escaped this crisis.

After all, leaving that vortex of the Profound Celestial Sword Sect made him temporarily safe.

At least for a short period, there is no danger.

"Seventh-Grade Opportunity? I wonder what it is."

A thought crossed Jiang Fan's mind, and he gently clicked on this opportunity light point.

Immediately, a piece of information instantly penetrated into the depths of his consciousness.

The content of the information was very simple, which was to stay on Spirit Turtle Island for ten days, and the Seventh-Grade Opportunity would naturally appear, without needing to do anything.

"Is this the so-called waiting for the right moment?"

Jiang Fan's eyes flickered.

He believed that the information provided by the Fortune-Telling Talisman had deep meaning, representing some important information about the future.

If he could comprehend it in advance, he could take precautions.

Thinking of this, he didn't hesitate and entered Spirit Turtle Island with Su Weiwei.

...

Only one day passed.

Jiang Fan and Su Weiwei had already gathered information about Spirit Turtle Island and the surrounding seas.

After all, to know oneself and the enemy is the way to win a hundred battles.

When coming to an unfamiliar place, the most important thing is to know a lot of information about it.

This way, they could avoid encountering various dangers.

To put it simply, this nearby sea area is vast, an archipelago.

This area is boundless, covering at least 100,000 kilometers of ocean.

The people residing here call this archipelago the Yiling Island Group.

The reason for this name is because a Nascent Soul Cultivator once appeared in this sea, known as the Yiling Ancestor.

This individual once unified this sea area for a thousand years.

Renowned with great prestige.

At the peak of his power, he was not inferior to any Nascent Soul Influence.

Unfortunately, since the fall of the Yiling Ancestor, another Nascent Soul has not been born in this sea area.

Thus the alliances in this sea area collapsed.

It immediately split into dozens of Golden Core Influences, dividing the sea area.

Among them, Spirit Turtle Island is one of the Golden Core Influences, ruled by the Spirit Turtle Daoist.

It's said that all the influences in this sea area are related to the Yiling Ancestor's sect.

They claim to be disciples of the Yiling Ancestor, having orthodox inheritance.

Each one wants to unify the Yiling Island Group and become the sole overlord of this sea area.

However, after all these years, no influence has achieved this goal.

But anyway, thanks to the various Golden Core Influences fighting independently, it has made this place a paradise for loose cultivators. Many loose cultivators would be recruited by these Golden Core Influences and receive considerable treatment.

Some Foundation Establishment Loose Cultivators would become Honored Guest Elders of these Golden Core Influences, reaping significant rewards each year.

"Husband, this Yiling Island Group seems quite nice."

"Compared to Xuanjian City, resources are indeed a bit lacking."

"But the good thing is that there are few high-tier cultivators here, so there won't be any unbeatable enemies."

"If we live here long-term, it might be better than Seven Stars Peak."

After understanding the situation here, Su Weiwei was immediately attracted to this place.

After all, choosing one of the Golden Core Influences could allow them to live here in peace.

This way, their safety would increase significantly, and they would not lack resources.

No matter how you look at it, it would be considered a pretty good place to settle.

"No rush."

"This place is a mix of good and evil, the various Golden Core Influences are at war with each other."

"Once you join in, you will be entangled in the powers, and by that time, you will have no control over your own actions."

"It's not that we cannot join, but we must choose carefully which influence to join."

Jiang Fan also thought that this place was indeed very suitable for his cultivation.

The Profound Celestial Sword Sect is too dangerous right now.

The enemies of this Nascent Soul Influence are too many.

They not only have to deal with the Shennong Sect but also the Heart Demon Sect.

Although to a colossal entity like the Profound Celestial Sword Sect, this is nothing.

They might not face the danger of extermination.

But for loose cultivators like them, a slight carelessness could mean death if caught in the aftermath of their battles.

It's like in a war where the life and death of the soldiers is insignificant.

Perhaps after a great war, history books would only record a number of deaths.

Therefore, they must not get involved in such a war.

"Indeed."

"We still need to carefully select among the Golden Core Influences."

"Otherwise, being caught in the vortex of war might not be a good thing."

Su Weiwei nodded.

However, she felt that for her husband, this was a trivial matter.

Her husband was most adept at making choices.

Every choice would bring different levels of benefits.

...

Several days later.

Jiang Fan and Su Weiwei were staying in a room at an inn in Spirit Turtle City, located on Spirit Turtle Island.

They did not reveal their true cultivation but disguised themselves as ordinary Qi Cultivation Stage Cultivators.

It must be said, this place is indeed a paradise for loose cultivators.

The influx of many loose cultivators made Spirit Turtle Island very prosperous and bustling.

Every day brought a fortune.

It was even more prosperous than Yunlai City in the Ten Thousand Beasts Mountain Range.

Because the resources contained in this sea area surpass those of the Ten Thousand Beasts Mountain Range.

Hidden in the depths of the ocean are countless rare exotic treasures and countless demon beasts.

As long as one has power, they can obtain a large amount of cultivation resources in this place.

Of course, staying at an inn has the benefit of obtaining various intelligence from the surrounding loose cultivators.
