

Fortune 320

Chapter 320: Joining Red Whale Island, The Beginning of a New Life_3

After saying these words, Jiang Fan took Su Weiwei to the mansion on Fire Copper Island, which meant they were completely settled.

...

A few more days passed by.

Jiang Fan and Su Weiwei were already quite familiar with life on Fire Copper Island.

Moreover, life was extremely luxurious.

Because the mansion was very large, resembling a Prince's Mansion, with pavilions and towers everywhere, and decorated buildings.

There were also plenty of maids and servants.

You could basically live a life where clothes were handed to you and meals came at a call.

Compared to the time at Seven Stars Peak, it was evidently more comfortable.

After all, while staying at Seven Stars Peak, there weren't many servants like here.

"Husband."

"It was the right decision to come to the Yiling Island Group."

"If we stayed within the Profound Celestial Sword Sect's realm, there wouldn't be a life like this."

"No wonder some Foundation Establishment Loose Cultivators don't want to stay in the Profound Celestial Sword Sect's realm."

"It's truly because of the huge gap in lifestyle between the two places."

Su Weiwei said with considerable emotion.

After all, Foundation Establishment Cultivators aren't much in the realm of the Profound Celestial Sword Sect, at most they can be considered minor experts.

Therefore, the treatment they receive wouldn't be particularly generous.

But if they come to some remote regions, it's entirely different.

Foundation Establishment Cultivators can already be considered Top experts.

Their numbers are not exactly few, but compared to Qi Cultivation Stage Cultivators, they are indeed quite rare.

Within Golden Core Influence, Foundation Establishment Cultivators are already an elite force, a pillar.

Therefore, Foundation Establishment Cultivators receiving higher treatment is only natural.

"The Tier Two Spirit Vein here is pretty good as well."

"The Spiritual Qi is even more abundant than at Seven Stars Peak."

"More importantly, this Tier Two Spirit Vein is ours exclusively."

"No other Foundation Establishment Cultivators share it with us."

Jiang Fan is actually more satisfied with this aspect. In the past at Seven Stars Peak, the Spiritual Qi of that Tier Two Spirit Vein had to be shared with other Foundation Establishment Cultivators, which led to less Spiritual Qi.

But now, he controls the entire Tier Two Spirit Vein on the island.

No other Foundation Establishment Cultivators can share it with him.

To him, Fire Copper Island is practically like a Cultivation Holy Land.

Thus, the efficiency of cultivation has greatly increased.

"However, there are still drawbacks."

"The island does not have the protection of a Tier Two Array."

"This greatly reduces our level of security."

Su Weiwei said solemnly.

Obviously, unlike the Profound Celestial Sword Sect, the Yiling Island Group is remote, leading to a scarcity of Array Masters.

Therefore, constructing a Tier Two Array is extremely difficult.

The cost is also more expensive compared to the Profound Celestial Sword Sect.

This leads to not every Tier Two island having the protection of a Tier Two Array.

For example, Red Copper Island is such a case.

Without the protection of a Tier Two Array, the island's security decreases significantly.

If faced with enemy attacks, without the protection of a Tier Two Array, it's akin to having no gates and walls, allowing enemies to enter the city at will, letting enemies maraud into the heart of the island.

"It's okay."

"With me here, even without a Tier Two Array, it will still be very safe."

Jiang Fan was not too concerned about this point.

Given his current power, ordinary Foundation Establishment Cultivators are already not his match.

Unless a Golden Core Zhenren makes a move, only then would he be left unable to resist.

But if a Golden Core Zhenren were to act, then the presence of a Tier Two Array wouldn't really matter.

Boom~~

At this moment, the Fortune-Telling Talisman deep in the Elixir Field and Sea of Qi of Jiang Fan began to tremble, and a surge of information instantly penetrated deep into his sea of consciousness.

"In the deep of night, uninvited guests lurking with killing intent, be extremely cautious."

"Eliminate nocturnal intruding Tribulation Cultivators, fortune."

"Let Tribulation Cultivators escape, or sow future trouble, misfortune."

What?!

Sensing this information, Jiang Fan's eyes showed a glimmer. He hadn't expected the Fortune-Telling Talisman to suddenly become active, clearly perceiving the signal of impending disaster.

It meant that tonight, Tribulation Cultivators would visit Fire Copper Island.
