

Fortune 321

Chapter 321: Opportunity Arrives, Gaining a Sixth-Grade Opportunity

"The tribulation cultivators are likely targeting Fire Copper Island."

Jiang Fan squinted his eyes.

He was merely an outsider Foundation Establishment cultivator, with no enemies in this sea area; naturally, the enemies were not targeting him, but the resources on Fire Copper Island.

After all, it contains a vein of Red Refining Fire Copper ore.

Who knows how many Spirit Stones it's worth if sold.

For a Golden Core Zhenren, this wealth may not amount to much, but for Foundation Establishment cultivators, it's a significant fortune.

Who knows how many years of cultivation needs it could satisfy.

Thus, it's only logical for Foundation Establishment cultivators to eye Fire Copper Island's wealth.

And as the Island Master of Fire Copper Island, he's naturally on the front line.

If this matter isn't resolved properly, it might leave hidden dangers or even invite disaster.

"In other words, there's only one solution now, and that's to deal with this tribulation cultivator."

Jiang Fan clenched his fist.

He's not worried about this tribulation cultivator's strength.

According to the Fortune-Telling Talisman, this tribulation cultivator's strength is decent, at least at the Foundation Establishment level.

But he's definitely not Jiang Fan's match.

Otherwise, it would have advised him to flee instead of attempting to kill the opponent.

Therefore, he doesn't need to fear anything.

"It seems being an Honored Guest Elder isn't easy."

"I just took office and am already facing such trouble."

Jiang Fan felt a bit helpless.

All he wanted was to stay here peacefully and cultivate, enhancing his cultivation.

But clearly, these Spirit Stones aren't easy to obtain.

Especially in the Yiling Island Group, where confrontations among cultivators seem more frequent than in the Ten Thousand Beasts Mountain Range.

Because in the Ten Thousand Beasts Mountain Range, with its towering mountains and various peculiar environments, cultivators can quickly flee if they can't win, avoiding battles.

But out in the vast ocean, there's no obstacle around.

Once confronted, it's a life-and-death battle — it's either you die or I perish.

Basically, there's no second outcome.

Thus, it also makes cultivators in the Yiling Island Group more ferocious, with richer combat experience.

This makes this sea area even more chaotic.

It's truly a case of "one place nurtures its people."

Now, he can only adapt to local customs.

.....

Late at night, the moon and stars sparse.

Fire Copper Island.

At this moment, Jiang Fan was sitting cross-legged on a mountain peak.

His Spiritual Sense spread out.

Like radar, sweeping all directions.

With the surge of his Soul Power, plus the power of the Perception Talisman, his sensing range expanded manifold.

Even without moving, he could easily sense an area within ten kilometers.

Boom~~

At this moment, within Jiang Fan's Spiritual Sense range, ripples suddenly appeared.

Just like a stone dropping into a calm lake, stirring waves.

Instantly awakening him.

Shwoosh!

At this moment, two unwelcome guests flew over under the cover of night.

They were two Foundation Establishment cultivators.

They didn't even bother hiding their presence, just openly flying here.

Moreover, terrifying murderous aura emanated from them.

Clearly, their hands were stained with countless people's blood, treating human lives as grass.

Their cultivation level was not simple either, one was Fifth-Layer Foundation Establishment and the other Sixth-Layer Foundation Establishment.

Such cultivation in the Yiling Island Group is considered quite good.

Not that they could walk just anywhere, but few could really tackle them.

"Two fellow Daoists."

"Arriving at Fire Copper Island suddenly in the dead of night, I wonder what's the reason?"

At that moment, Jiang Fan flashed and immediately intercepted those two stranger Foundation Establishment cultivators.

What?!

The two Foundation Establishment cultivators were taken aback, completely not expecting to be intercepted.

For a moment, they wondered if there was an insider among them leaking information.

But on second thought, this action was just impulsive, not a deliberate move here.

So it's highly likely just a coincidence.

"You must be the newly appointed Honored Guest Elder of Red Whale Island."

"We come to Fire Copper Island not for anything else."

"Just to acquire some Red Refining Fire Copper."

"If you hand over the Red Refining Fire Copper mined recently, this battle can be avoided."

"Otherwise, you'll face consequences later."

One Foundation Establishment cultivator spoke with a threatening tone.

Clearly, they came this time to rob Fire Copper Island.

Having completely regarded this island as their treasure vault.

Intending to rob some Red Refining Fire Copper from time to time to satisfy their daily needs.

"Fellow Daoist, Fire Copper Island is part of Red Whale Island's domain."

"It shouldn't have much to do with you."

"Guarding this domain diligently and gaining few Spirit Stones yourself, why bother?"

"Spirit Stones belong to Red Whale Island, life belongs to oneself."

"If you're smart, you'd know how to choose."

The other Foundation Establishment cultivator said insidiously.

These two Foundation Establishment cultivators, one trying hard tactics, the other soft.

"Of course, I know how to choose."

"That means I invite you two to leave."

Jiang Fan's eyes flashed with a cold glint, sensing that the two Foundation Establishment cultivators weren't speaking any truth.

On the surface, it seemed they were negotiating, but secretly, they had already prepared for an attack.

Once he was careless, the opponent would strike ruthlessly.
