

Fortune 322

Chapter 322: Opportunity Arrives, Gaining a Sixth-Grade Opportunity_2

Apparently, the other party intended to take my life from the start.

Since that's the case, there's no need for him to be polite.

Soul-Shaking Talisman!

In an instant, Jiang Fan immediately activated his Life Talisman—the Soul-Shaking Talisman.

The skill level of this Life Talisman has been upgraded to Mastery Level.

At the same time, his Soul Power has increased by several times compared to before.

So this also caused the destructive power of the Soul-Shaking Talisman to increase several times.

Boom~~

A terrifying soul wave swept in all directions, almost solidifying, creating vibrations.

It even formed ripples.

This destructive force struck hard on the two unfamiliar Foundation Establishment Cultivators.

"What?!"

The two Foundation Establishment Cultivators were immediately dumbfounded. They originally wanted to activate the spiritual artifacts on themselves to fiercely attack this kid and let him see the dangers of the world.

Who could have imagined, that this kid was even more ruthless than expected.

Just chatting happily a moment ago, in the blink of an eye, he targeted us with deadly force.

More importantly, the power of the Soul-Shaking Talisman is silent and invisible, belonging to soul-type attacks.

They couldn't even detect when Jiang Fan made his move.

By the time they noticed the power of the Soul-Shaking Talisman, it was already too late.

Bang!

The next second, they felt as if their heads were hammered hard like an iron hammer hit them, causing dizziness, bleeding from seven orifices, and a buzzing mind.

The magic robes on them were of no use at all.

For a moment, they even lost consciousness.

"Die."

Seeing these two Foundation Establishment Cultivators fell into a state of suspended awareness, Jiang Fan naturally didn't hold back at all.

He activated the power of the Golden Light Talisman.

The perfected Golden Light Talisman condensed golden light, akin to the Sword Qi of Sword Cultivators.

Practically invincible.

Boom~~

Suddenly, golden light swept in, permeated with terrifying Gold Spiritual Power.

As if Sword Qi was cutting everything down.

With a whoosh, the heads of the two Foundation Establishment Cultivators were immediately sliced off.

Blood sprayed out like a fountain.

Then the two corpses fell from mid-air, spilling blood all over.

Their eyes were wide open, deep in their pupils flowed shock, fear, and disbelief.

They seemed unable to believe they were killed just like that.

"Kid, you're getting more and more twisted."

"Two mid-stage Foundation Establishment Cultivators were actually killed by you in seconds."

The Ten Thousand Transformations Pill Furnace admired seeing this.

It has seen quite a few Foundation Establishment Cultivators, some even from Nascent Soul Sect's true heritage.

But compared to its current master, they are nowhere near.

The thick foundation and Spiritual Power of its current master are downright twistedly profound.

Even the true heritage of Divinity Transformation Sect would likely be as such.

"It's not that I'm powerful, purely they were too weak."

Jiang Fan said modestly.

"Hehe, just keep playing around."

"Why haven't you disposed of their bodies?"

The Ten Thousand Transformations Pill Furnace asked curiously.

Ordinarily, these two Foundation Establishment Cultivators' corpses would have been burned to ashes long ago.

Instead of being left intact, which doesn't match this kid's style.

"If the bodies are disposed of, who would know I protected Fire Copper Island?"

"Crying children get milk."

Jiang Fan said casually.

"This."

The Ten Thousand Transformations Pill Furnace fell silent, immediately understanding Jiang Fan's purpose in doing so.

It was clearly to use the corpses of the two Foundation Establishment Cultivators to claim credit.

After all, as the Island Master of Fire Copper Island, killing two invading Foundation Establishment Cultivators is indeed a tremendous merit.

Even without rewards from Red Whale Island, it would gain him more recognition.

Thus, life on Red Whale Island would improve.

In essence, these two Foundation Establishment Cultivators were Jiang Fan's capital for advancement.

But such an approach is indeed quite clever.

Boom~~

At this moment, deep in Jiang Fan's consciousness, a message immediately came: "Encounter with Foundation Establishment Tribulation Cultivators, after a deadly battle you finally killed two and narrowly survived. You gained twenty thousand Luck Points, a Sixth-Grade Opportunity."

Immediately, he knew the reward for overcoming this tribulation had arrived.

These two Foundation Establishment Cultivators indeed brought considerable benefits.

A total of twenty thousand Luck Points plus a Sixth-Grade Opportunity is quite a noteworthy bounty.

"Sixth-Grade Opportunity? I can only obtain it in a few days?"

"Could this Sixth-Grade Opportunity be the reward from Red Whale Island?"

Jiang Fan's eyes flickered as he sensed the message about the Sixth-Grade Opportunity, realizing he could obtain it in several days.

Clearly, this Sixth-Grade Opportunity most likely comes from Red Whale Island.

After all, with such a significant contribution this time, it would be unreasonable not to reward him.

.....

Early the next morning.

The cultivators on Fire Copper Island immediately learned about the events of last night.

They all surged in excitement.

"Did you hear? Last night two Foundation Establishment Cultivators attacked, but were killed by the Lord Island Master, and the corpses are placed in coffins to be returned to Red Whale Island."

Someone excitedly spread the news.

"No way, is the Lord Island Master really that powerful to kill two Foundation Establishment just by himself?"

"Yeah, is this true or false? Were those two really Foundation Establishment Cultivators?"

Many questioned the truth of the matter.

They weren't doubting the tribulation cultivators' invasion, but whether those two were truly Foundation Establishment Cultivators.

"Of course, they were Foundation Establishment Cultivators because one of them is our previous Island Master Sun Hao, and the other is the infamous Foundation Establishment Tribulation Cultivator Xie Chang from the Yiling Island Group. The two have been colluding for a long time."

Someone said gravely, recognizing the true identities of the two corpses, very sure they were Foundation Establishment Cultivators, well-known in nearby sea regions.

"What? The dead Foundation Establishment Cultivator is the former Island Master Sun Hao? Didn't he flee with funds long ago? Why would he return to our Fire Copper Island? Isn't he afraid of being hunted by Red Whale Island?"

"Stupid, don't you know the state of Red Whale Island now? It's declining, barely has enough manpower to capture him, so he's been free-roaming. He returned this time probably drawn by the Red Refining Fire Copper we unearthed, looking to make a fortune.

Who knew, the Lord Island Master arrived and his power exceeded Sun Hao's expectations, resulting in his immediate execution."

"To be fair, Sun Hao wasn't careless. For this matter, he had already teamed up with Foundation Establishment Cultivator Xie Chang. Typically, even if not beating the new Island Master, escaping wouldn't be a big issue. But evidently, the new Island Master's power far exceeded Sun Hao's estimations, leading to this death tribulation."

The many cultivators debated amongst themselves.

Truth be told, the former Island Master Sun Hao ruled over here for a long time.

Equivalent to the local emperor of this island.

Many cultivators dreaded him immensely, feeling fear from the heart.

But now? Such a strong Foundation Establishment Cultivator Sun Hao was killed by the new Island Master.

Died like a dog.

This also made them fearful, extremely dread of Jiang Fan.

"Seems the new Island Master's power is extraordinary."

"We better not deceive the new Island Master; angering the Lord Island Master might mean a path to death."

"Indeed, though the Lord Island Master seems very amiable, when acting, he's truly ruthless."

"Previously seeming so kind, probably gathering evidence."

"Embezzling a lot is useless. Once discovered, it's death with no remains."

"The new Island Master is really unfathomable, deeply scheming."

The cultivators increasingly feared Jiang Fan.

They thought this new Island Master was a smiling tiger.

Usually appearing cheerful, but acting so ruthlessly.

With two Foundation Establishment Cultivators killed without hesitation, his ruthlessness is evident.

Facing ordinary cultivators like them, likely he wouldn't show mercy.

For a moment, the cultivators of Fire Copper Island held Jiang Fan in greater reverence.

This is the effect of killing one to warn others.
