

Fortune 326

Chapter 326: Advancement to Tier Two Middle-Grade Talisman Master, War Approaches_2

This also led to a significant increase in his perception ability, now able to amplify it fivefold.

If you add his already skyrocketing soul power, the range of his perception has reached a terrifying level.

Basically, the entire Fire Copper Island is within his range of perception.

Any movement of any person cannot escape his awareness.

Even if he doesn't leave his house, he knows everything happening up and down Fire Copper Island.

This is the power of a Mastery Level Perception Talisman, as if he has an extra heavenly eye.

Constantly monitoring the surrounding environment.

"The Enchantment Talisman has also ascended to the Mastery Level."

Jiang Fan's eyes flickered.

To be honest, the increase in his soul power has significantly boosted the Enchantment Talisman, Soul-Shaking Talisman, and Perception Talisman, with skill level increasing rapidly with just a little practice.

Thus, the Enchantment Talisman has also reached the Mastery Level.

The previously Entry Level Enchantment Talisman was only effective against low-tier cultivators, putting them into a coma.

But when facing those with strong willpower and soul strength, it had no effect.

The Enchantment Talisman that ascended to Skilled Level was slightly better, but not very useful either.

However, once ascended to the Mastery Level, the Enchantment Talisman becomes extremely terrifying.

Because once entering the state of enchantment, it can make the other party forget or add certain memories.

This is akin to modifying the soul's memory of a low-tier cultivator.

Although in direct combat, the Enchantment Talisman won't play a big role,

But as an auxiliary skill, it is indeed top-notch.

Whether it's used for gathering information or hiding in other places, the Enchantment Talisman's abilities are incredibly marvelous.

"The Earth Escape Talisman has also finally improved to the Mastery Level."

Jiang Fan was very pleased with the progress of the Earth Escape Talisman.

After all, in the past six months, he occasionally exercised the power of the Earth Escape Talisman, escaping into the earth.

If it were only at the Entry Level, then the time to use the Earth Escape Talisman would be limited.

And each use would consume a large amount of spiritual power.

After reaching the Skilled Level, the time to use the Earth Escape Talisman and the speed of earth escape increased remarkably.

As for the current Mastery Level, the effect is even more terrifying.

Once escaped into the earth, his speed of earth escape and flight speed are almost the same, and the spiritual power consumption is greatly reduced, with the sustainable time increased by more than fivefold.

It can be said that the current Earth Escape Talisman can completely enter combat status now.

Rather than just being a means of escape.

"However, the most useful should be the Profound Turtle Talisman."

"Unfortunately, it's still only at the Entry Level."

Jiang Fan was a bit regretful.

He originally thought he could easily improve the skill level of the Profound Turtle Talisman.

But when it came to cultivation, he realized that increasing the skill level of this talisman was indeed too difficult.

Even after consuming a large number of Luck Points, it couldn't reach the Skilled Level in a short time.

Perhaps this is the power of Innate Runes.

However, even so, the Entry Level Profound Turtle Talisman is completely sufficient.

Cultivators of the same tier probably cannot break his turtle shell.

As long as the Profound Turtle Talisman is activated, he can stand invincible.

"But anyway, I have now finally ascended to become a Tier Two Middle-Grade Rune Master."

"It's worth it to consume so many Luck Points."

Jiang Fan felt that his talisman-making skills had reached a new level.

Now he can easily refine many Tier Two Middle-grade Talismans.

For example, Earth Escape Talisman, Celestial Thunder Talisman, Enchantment Talisman, and so on.

If such Tier Two Talismans were sold, they would be quite valuable.

But now he is not relying on talisman making for a living.

Even so, he frequently refines Tier Two Talismans.

After all, every Tier Two Talisman is a trump card of his.

At critical moments, it can certainly play a surprising role.

And even if he doesn't use them, his Dao Companion, Su Weiwei, can still find them useful.

Bang~~

At this moment, Jiang Fan's heart stirred, and the power of the Perception Talisman on him enveloped the entire Fire Copper Island.

He could sense every move of the entire island.

At this moment, another ship arrived at the island's harbor.

It was loaded with a large number of mortals and cultivators.

These people are miners coming to Fire Copper Island, responsible for excavating Red Refining Fire Copper.

Basically, every now and then, a group of miners would arrive.

"What's going on? It seems like the number of miners has been increasing during this period."

"Wasn't it said that miners are hard to find? Basically, nobody applies."

At this point, a cultivator felt very puzzled.

He thought the number of cultivators coming to Fire Copper Island recently was just a bit unusual.

After all, mining is a very hard profession, basically one where you never see the sun.

The money earned is all hard-earned.

Generally speaking, any cultivator with some prospects would not want to become a miner.

"Ah, you don't know, in the past six months, Yiling Island Group has been chaos."

"The forces on Spirit Turtle Island, Black Shark Island, and Fish Dragon Island have gotten into fights."

"Basically, battles break out every now and then."

"It's said that some Foundation Establishment cultivators have already fallen."

"The casualties among Qi Cultivation Stage cultivators and mortals are simply countless."

"Currently, there are very few safe places in Yiling Island Group."

"Those cultivators who come to work as miners on Fire Copper Island might not actually want to be miners."

"They might also be looking to seek refuge here and escape the war."

An elderly cultivator said with great emotion.

Originally, being a miner was indeed not a good job, very exhausting, and poorly paid.

Basically, few cultivators were willing to do it.

But if it's for refuge, many cultivators would be willing to come!

After all, if living on another island, one could easily get caught in the warfare.

You might even be forcibly recruited by these forces and become cannon fodder in the war.

So rather than staying put and waiting for death, becoming a miner and temporarily taking refuge here would be better.

"Refuge? Nowadays even being a miner can be a refuge?"

Many cultivators looked at each other, feeling quite novel.

They had always been on Fire Copper Island, seldom going elsewhere, and naturally didn't know how chaotic other places were, nor did they understand how precious peace was.

"But why did the three Golden Core influences suddenly start a war for no good reason?"

"Didn't they have conflicts before as well, but never to the extent of starting a war?"

Someone asked curiously.

He didn't understand why these three top Golden Core influences suddenly went to war.

It was baffling, beyond comprehension.

"That's because someone has discovered a nameless island."

"But on this nameless island, there exists a vast Spirit Stone ore vein."

"In addition to the Spirit Stone ore vein, it also contains many rare mineral veins."

"For the three Golden Core influences, it's simply a treasure land."

"If fully exploited, they could become rich overnight."

"To seize control of this island, the three Golden Core influences naturally fought over it."

"Up until now, there is still no winner or loser."

An elderly cultivator said in a deep voice, detailing the causes of the matter.

"Ah."

Upon hearing this, many cultivators suddenly realized why the three Golden Core influences had started fighting.

It turns out it was to seize the Spirit Stone ore vein and the other mineral veins.

In fact, if it were any other force, they would make the same choice.

After all, no one could possibly abandon such huge benefits.

If they could share it equally, then naturally it would be great, and no one needs to fight.

The problem is, they all feel they should get a bigger share, so naturally, fighting occurs.

In short, in this sea, power is the most important thing.

Whoever is powerful can seize more resources.

However, ordinary cultivators suffer because of this.

"Luckily we stay within the Red Whale Island's sphere of influence without being involved in the war."

"True, although Red Whale Island is weaker, it also has an upside, which is not being targeted by other forces."

"Indeed so, now our Red Whale Island is likely also one of the safer areas in the Yiling Island Group."

"No wonder so many cultivators willingly become miners, probably they'd rather be miners than join this war and become cannon fodder for those Golden Core influences."

Many cultivators felt fortunate.

Although Red Whale Island is indeed weakened, being weak also has its benefits.

Because it's too weak, it wouldn't be targeted and would be ignored.

In turn, it makes them very safe.
