

## **Fortune 327**

### Chapter 327: Acquiring the Ancient Strange Insect: Purple Lightning Mayfly

"Is the Yiling Island Group in such chaos now?"

Jiang Fan raised an eyebrow upon perceiving this information.

During the past six months, he had mostly stayed within his estate, focusing on intense cultivation, rarely leaving the premises.

Thus, he wasn't very aware of the happenings in the outside world.

However, he hadn't expected the Yiling Island Group to suddenly plunge into war.

This fulfilled the previous indications given by the Fortune-Telling Talisman.

If he hadn't chosen to join Red Whale Island initially but instead went to Spirit Turtle Island, Fish Dragon Island, or Black Shark Island, he would have been embroiled in the war of Golden Core forces and become their pawn.

Although his strength was decent, in such a massive power struggle, it actually wasn't significant.

A slight misstep could lead to death and the end of his path.

His previous decision spared him from many calamities.

Otherwise, he'd be mired deeply, unable to extricate himself.

"The Cultivation Realm is truly filled with danger at every turn."

"If one makes a wrong choice, it might lead to eternal damnation."

Jiang Fan's eyes flickered.

Yet internally, he remained very calm, possessing the Fortune-Telling Talisman's power to always stand on the right side.

Hence, he wasn't worried about making the wrong choice.

More importantly, it was his strength.

If he had the power of a Golden Core or even a Nascent Soul, it wouldn't be about which side he stood on, but others choosing sides.

Only absolute strength can dictate a region's situation.

Swoosh!

At this moment, Jiang Fan exited his quiet room, concluding his cultivation session.

"Husband."

Seeing Jiang Fan finish his seclusion, Su Weiwei joyfully approached.

She wore a white silk dress that outlined perfect curves, breathtakingly beautiful.

Her every smile, every move, carried intense allure.

Evidently, as her cultivation advanced, her charm continued to increase.

Even a glance could make one's heart flutter.

"What's up? Is there something good going on?"

Jiang Fan wrapped his arm around Su Weiwei's slender waist, sensing her joyous mood.

After all, Su Weiwei had been quite content on Fire Copper Island for the past half-year.

Her cultivation was advancing rapidly, about to break through to the Ninth-Layer Qi Cultivation realm.

Meanwhile, the Six-winged Poison Bees were also growing quickly.

They had built nests in certain areas of the estate.

They often ventured out to forage, eliminating Su Weiwei's need to worry.

"Of course there's good news."

"My Six-winged Poison Bees were out foraging."

"Accidentally discovering an uninhabited island."

"They found a hidden Foundation Establishment Cave Mansion there."

"Initially, the Six-winged Poison Bees tried to enter but were blocked by a Tier Two Array."

"I believe there's definitely an extraordinary treasure inside, so I immediately came to inform you, husband."

Su Weiwei excitedly explained.

During this period, the Six-winged Poison Bees roamed widely, exploring many islands and uncovering various bits of intelligence.

However, most of the islands were ordinary, lacking treasures.

If there were treasures, they would have long been claimed by other cultivators, not remaining until now.

Yet her luck was still good, encountering an ancient Foundation Establishment Cave Mansion.

This cave mansion seemed ancient, likely left by a Foundation Establishment cultivator from long ago.

Due to the Tier Two Array's effect, the cave mansion was hidden, undetectable by other cultivators.

So until now, it was discovered by Su Weiwei.

"An ancient Foundation Establishment Cave Mansion?"

Upon hearing this, Jiang Fan couldn't help but nod, recognizing this as a promising opportunity.

Boom~~~

At that moment, the Fortune-Telling Talisman deep within his Elixir Field and Sea of Qi began to vibrate, buzzing, as a vast array of information surged into the depths of his consciousness sea.

"Heavenly luck, discovered Foundation Establishment Cave Mansion, remain calm and collected, safe and sound."

"Heading to the ancient Foundation Establishment Cave Mansion, despite some twists and turns, safe and sound, auspicious."

"No adventure, no gain, bland."

Perceiving this message, Jiang Fan's eyes flickered, his mind instantly settling.

Initially hesitating whether to explore this Foundation Establishment Cave Mansion—given the countless traps in the Cultivation Realm around such discoveries.

Finding an ancient cave often wasn't beneficial, sometimes even disastrous.

But it seemed this truly was heavenly luck.

It's the fortune brought by his Dao Companion.

"Heavenly gift unaccepted invites trouble."

"Yet what does 'safe and sound' imply, will something unexpected occur at the Foundation Establishment Cave Mansion?"

"However, even if an accident happens, it won't be a major issue for me."

"It appears this opportunity can't be missed."

With this thought, Jiang Fan finally made up his mind.

"Husband, how about it? Can we go to the Foundation Establishment Cave Mansion?"

Su Weiwei blinked her beautiful eyes, looking at Jiang Fan.

"Of course we can go."

"Tell me the location of the Foundation Establishment Cave Mansion."

"I'll be back shortly."

Jiang Fan responded directly.

"Okay."

Su Weiwei was very excited, immediately providing the exact location of the uninhabited island to Jiang Fan.

Actually, it's not far from Fire Copper Island, at most a few hundred kilometers.

But due to the many islands in this sea area, people rarely visit these uninhabited islands.

After all, not every island is fit for habitation.

Even if fit, humans tend to prefer the bustling islands.
