

## **Fortune 328**

Chapter 328: Acquiring the Ancient Strange Insect: Purple Lightning Mayfly\_2

Because these islands have fully equipped living facilities and are rich in spiritual energy.

There's completely no need to go to these desolate islands.

.....

Several hours later.

Jiang Fan quietly left Fire Copper Island and flew towards the uninhabited island.

It didn't take long for him to arrive at the uninhabited island that Su Weiwei had mentioned.

This island isn't very large, only about one-third the size of Fire Copper Island.

However, it's covered in dense forests, with undulating mountains and few traces of human presence.

More importantly, spiritual energy is thin, so indeed, not many would come here.

But he came here just to find the Foundation Establishment Cave Mansion, so he didn't care much about the environment here.

Swoosh!

Soon, under the guidance of a Six-winged Poison Peak, Jiang Fan arrived in front of a mountain cave.

This Six-winged Poison Peak was the one that discovered the Foundation Establishment Cave Mansion, and it stayed here to serve as Jiang Fan's guide.

"So, is the Foundation Establishment Cave Mansion here?"

Jiang Fan's eyes revealed a gleam of light.

He used the Emperor's Gaze and immediately saw an invisible barrier covering the vicinity of the mountain cave.

It was this invisible barrier that prevented the Six-winged Poison Peak from entering.

To break through this Tier Two Array, the strength of the Six-winged Poison Peak alone was not enough.

But under the watch of his innate divine power, the Emperor's Gaze, he saw many flaws in this Tier Two Array.

"Indeed, compared to a Tier Three Array, a Tier Two Array is much easier to break through."

Under Jiang Fan's gaze, he saw the array patterns formed by this Tier Two Array, much simpler than the Five Elements Reversed Array he had seen last time.

With just a glance, he saw many flaws in this Tier Two Array and spotted the array nodes within.

Boom~~

Thinking of this, Jiang Fan didn't hesitate and immediately acted, lightly pointing.

A powerful spiritual power condensed into substance, blasting towards the flaw of the array.

With just a single strike, the seemingly impregnable array barrier instantly shattered.

The entire Tier Two Array collapsed with a roar, just like a stack of blocks being pushed lightly and then collapsing.

It was simply effortless.

"It seems that my Emperor's Gaze divine power is simply the nemesis of arrays all over the world."

Jiang Fan was very pleased.

Although he wasn't very adept in the mysteries of arrays, destruction is much simpler than creation.

He didn't need to know how to build arrays.

He only needed to know how to destroy them.

Just like demolishing a building, it's enough to destroy a few key nodes, then the originally impregnable building would collapse, turning into a pile of construction debris.

The same logic applies.

If you can find the flaws in an array and attack these flaws with full force, then no matter how powerful the array is, it can be destroyed.

However, ordinary cultivators wouldn't be able to easily find the flaws in an array.

Jiang Fan could do this easily because of his innate divine power.

Otherwise, he would also be at a loss.

Swoosh!

Thinking of this, Jiang Fan swept his spiritual sense, and the power of the Perception Talisman infiltrated into the cave mansion.

Inside the cave mansion, there was a skeleton left behind, seemingly after a long time, the clothes had been eroded by the wind, leaving only a pile of bones.

The interior of the cave mansion was full of dust, and many pots and pans were left behind.

Apparently, this Foundation Establishment Cultivator had lived here for quite some time.

It's likely that this Foundation Establishment Cultivator stayed in the cave mansion intending to break through but unfortunately failed, leading to his death.

In fact, such incidents are very common in the Yiling Island Group.

Many islands have left behind Foundation Establishment Cave Mansions.

However, cultivators who obtain the treasures left behind by these Foundation Establishment Cave Mansions are few and far between.

"It seems there's no danger inside the cave mansion."

Jiang Fan felt very satisfied.

He scanned the interior several times with the power of the Perception Talisman, finding no traps left behind.

Nor was there any ambush by cultivators.

So he felt assured to enter the cave mansion, where he found a storage bag left behind by the skeleton.

"What is this?"

Jiang Fan swept it with his spiritual sense, and all the treasures inside the storage bag were revealed.

The storage bag contained many treasures, including spirit stones, magical artifacts, various materials, and so on.

Add them all up, it's estimated they're worth tens of thousands of spirit stones.

But what's truly remarkable is an insect egg sealed in a wooden box.

This insect egg appeared purple, with dense purple electrical patterns on its surface.

It seemed to contain a great power of celestial thunder.

Swoosh!

Thinking of this, he immediately took out the wooden box.

"Wait, isn't this the egg of the Purple Lightning Mayfly, an ancient strange insect?"

The usually silent Demon-Vibrating Bell was startled upon seeing the purple insect egg.

It immediately recognized the true nature of the purple insect egg.

It was the renowned ancient strange insect, the Purple Lightning Mayfly.

"The Purple Lightning Mayfly?"

Jiang Fan blinked and curiously asked the Demon-Vibrating Bell.

He didn't know much about the many ancient strange insects.

After all, ancient strange insects are extremely rare, and by now, they are virtually extinct.

It's not only that present-day cultivators haven't seen them, but even records in classics are scarce.

"This is an exceptionally rare thunder-element strange insect."

"Its entire body is surrounded by purple thunderbolt, mastering the Thunder Escape Technique, and can wield celestial thunder to ward off enemies."

"If cultivated to its peak, it can even summon the tribulation thunder within the heavens and earth, invoking the Purple Sky Immortal Thunder."

"Its power is colossal, truly earth-shattering."

"Unfortunately, such ancient strange insects are scarce and have mostly disappeared."

"I didn't expect to actually see a Purple Lightning Mayfly insect egg here."

"If hatched and contracted, it would become an extremely powerful Spirit Beast."

The Demon-Vibrating Bell was amazed.

It hadn't expected its master to attain such fortune.

Because if the Purple Lightning Mayfly fully matures, its combat power can be said to surpass ancient and modern times.

Moreover, it is particularly effective against demons and Demon Cultivators.

Unfortunately, the number of Purple Lightning Mayflies is incredibly scarce.

It is said that during the ancient era, the Purple Lightning Mayfly clan faced a great calamity, leading to the near extinction of the entire race.

By now, it's nearly impossible to find any Purple Lightning Mayflies.

Who would have thought, in this world, such a Purple Lightning Mayfly still exists.

It's truly bewildering.

"It seems this is Weiwei's destiny."

Jiang Fan stroked his chin.

He knew that Su Weiwei could not only contract one Spirit Beast. If she advanced to the Foundation Establishment Realm, she could contract a second Spirit Beast, and Su Weiwei wasn't far from the Foundation Establishment Realm.

Once she advanced to Foundation Establishment, then the Purple Lightning Mayfly could become her second Spirit Beast.

Originally grasping the Six-winged Poison Peak, adding mastery over the Purple Lightning Mayfly, her strength would surely skyrocket further; even ordinary Foundation Establishment Cultivators wouldn't be able to match her.

Clearly, under the influence of her destiny, Su Weiwei's cultivation path became very smooth.

As a result, her destiny soared, obtaining many fortunes.

Swoosh!

Thinking of this, Jiang Fan quickly gathered these treasures and the storage bag.

After obtaining these treasures, he didn't intend to stay here any longer.

This was also to avoid unforeseen complications.

But just as Jiang Fan left the cave mansion, two unexpected guests suddenly arrived.

Two middle-aged Foundation Establishment Cultivators flew through the sky, hovering above the cave mansion.

"Damn it, I discovered this Foundation Establishment Cave Mansion first, how did someone beat me to it?"

A black-clad Foundation Establishment Cultivator cursed angrily, noticing the empty cave mansion, his face changed drastically.

He thought he had found an ancient Foundation Establishment Cave Mansion, believing it to be his opportunity.

But previously, he couldn't break the Tier Two Array, so he hurried back to summon a companion to help break the array barrier of the Foundation Establishment Cave Mansion.

Who would have thought, as soon as he returned, someone had beaten him to it.

"Kid, hand over all the treasures you have."

"Otherwise, you'll die here today."

Another red-clad Foundation Establishment Cultivator looked viciously at Jiang Fan, eyes filled with terrifying killing intent.

Clearly, the two had already set their sights on Jiang Fan, brimming with murderous intent.
