

## Fortune 330

### Chapter 330: Overcoming Tribulation, Gaining Sixth-Grade Opportunity\_2

The entire body was pierced with numerous blood holes.

The two people stared fixedly at Jiang Fan, revealing expressions of shock, fear, disbelief, and regret.

If they had known earlier that this lad was so terrifying, they definitely wouldn't have dared to provoke him.

They would have run as far as possible.

Immediately, their bodies fell to the ground, already lifeless.

"Not bad, you actually managed to use the Celestial Thunder Talisman to such an extent."

"You're no different from those Thunder Cultivators who have trained bitterly for many years."

"If you continue to improve, killing those demons will be as easy as slaughtering chickens."

The Demon-Vibrating Bell, seeing this scene, couldn't help but admire.

It now more or less acknowledges this new master.

Although it doesn't know why it was inexplicably refined by this lad.

But now, it's a done deal, and there's no way out.

Fortunately, this new master's skills aren't bad.

Even compared to the brilliant and talented masters of the past, this lad is not inferior at all.

So now, it somewhat accepts him.

If his cultivation continues to progress and he becomes a Golden Core or even a Nascent Soul, it will completely recognize him.

"Hehe, do you think the master only excels in the Celestial Thunder Talisman?"

"The power of other talismans is equally formidable."

"What exactly is the background of the Primordial Talisman Sect, is the Cultivation Technique so powerful?"

The Ten Thousand Transformations Pill Furnace said smugly.

However, it's also very curious about the Primordial Talisman Sect.

After all, the Primordial Talisman Sect is a sect from the Ancient Era, said to come from the Talisman Sect.

But in this era, Talisman Cultivators have long declined.

Truly powerful cultivators are Artifact Cultivators.

After all, human cultivators still rely on Magical Treasures to be stronger.

Merely using talismans to cultivate doesn't significantly enhance the cultivator themselves.

More importantly, most cultivators are ordinary people, not geniuses.

"Talisman Cultivators from the Ancient Times were indeed incredible."

"One talisman could suppress heaven and earth."

"It's said that once a great talisman cultivator suppressed an unparalleled demon for millions of years with a single talisman."

"Preventing those demons from moving until they were worn away by time."

"Unfortunately, with the changing times, such talisman cultivators have become increasingly rare."

"As for the reputation of the Primordial Talisman Sect, I've also heard of it."

"It was indeed a renowned Talisman Sect in the Cultivation Realm."

"Sadly, it encountered a catastrophe, and the entire sect was destroyed, its legacy lost."

"It's unexpected that the master obtained the legacy of this ancient sect, looks like the fortune is deep."

The Demon-Vibrating Bell sighed.

Its memory is now rather vague.

Due to the damage to its body, it has lost quite a bit of memory.

So it's not very familiar with events from the Ancient Era.

Nevertheless, it still knows many ancient secrets, equivalent to an old relic.

"More than just deep fortune, it's simply defying destiny."

The Ten Thousand Transformations Pill Furnace didn't know what to say.

It has followed this master for so long, witnessing the incredible depth of his fortune.

Other cultivators struggle desperately, risking their lives to obtain opportunities.

Yet this master casually goes to a place and can acquire treasures and opportunities.

Just like picking them up off the ground.

Such thick and unimaginable destiny is beyond imagination.

Boom~~

At this time, Jiang Fan didn't pay attention to the conversation between his two ancient treasures, he gently pointed.

Immediately, a cluster of Cyan Lotus Earth Fire appeared at his fingertip, instantly burning the two corpses to ashes.

This is to prevent anyone from tracking him through the corpses.

Unless these corpses have some use to him, it's better to destroy them quickly.

"This choice was indeed perilous but without danger."

Jiang Fan felt very satisfied.

Although there were minor setbacks on his way to this Foundation Establishment Cave Mansion, and he encountered two Foundation Establishment attacks.

Overall, he was not harmed at all.

And he gained tremendous rewards.

Not only did he obtain the Purple Lightning Mayfly, this Ancient Strange Insect, but also the Storage Bags of the two Foundation Establishment Cultivators.

Swish!

Thinking of this, Jiang Fan's heart moved, he immediately picked up those two Storage Bags.

His Spiritual Sense gently swept over, and the treasures inside the Storage Bags instantly appeared before him.

"No way, there's actually Tier Two Elixir."

"And it's the Fire Yang Pill, three bottles of Fire Yang Pill."

"This is a huge windfall."

Jiang Fan sensed the treasures inside, his heart filled with joy.

He didn't expect these two Foundation Establishment Cultivators to be so wealthy, with a total of three bottles of Fire Yang Pill.

Previously, after killing Sun Hao and others, he received the reward from Red Whale Island, obtaining one bottle of Fire Yang Pill.

But now, he has obtained three bottles.

Originally, his cultivation was already close to the Foundation Establishment Fourth Layer Perfection Level.

If he gets these three bottles of Fire Yang Pill, he might soon break through and advance to Fifth-Layer Foundation Establishment.

For him, this is quite an opportunity.

After all, Spirit Stones are easy to obtain, but Elixirs are hard to come by.

Especially in the Yiling Island Group area, buying Tier Two Elixirs is not that easy.

The prices are also more expensive than in Xuanjian City.

This is unavoidable, because Tier Two Alchemists in this sea area are rather scarce.

Each Tier Two Alchemist is a highly esteemed guest of major Golden Core Influences.

"Tsk tsk, they really are two Wealth-Bringing Boys."
