Chapter 332: Promoted to Fifth-Layer Foundation Establishment, Engraving Ice Talisman

In the blink of an eye, another two months have passed.

Fire Copper Island.

Inside a quiet chamber.

Jiang Fan sat cross-legged on the ground and took a Fire Yang Pill.

This Fire Yang Pill was naturally refined by the Ten Thousand Transformations Pill Furnace, a perfect elixir with impurities removed.

It not only contained vast medicinal power but also left no elixir poison.

Rumble~~

Instantly, after the Fire Yang Pill entered his stomach, it was refined, transforming into vast medicinal power.

The primordial talisman deep in the Elixir Field and Sea of Qi continuously rotated, devouring and absorbing this medicinal power, converting it into droplets of primordial spiritual power, rapidly increasing the primordial spiritual power in the Elixir Field.

Then, this primordial spiritual power surged out from the Elixir Field and flowed into the meridians, traversing one after another.

Dong!

At that moment, Jiang Fan sensed that another meridian in his body was penetrated by vast primordial spiritual power, now a full forty-eight meridians were connected in his body.

Fourth-layer Foundation Establishment Perfection!

Undoubtedly, after two months of diligent cultivation and the assistance of abundant Fire Yang Pill medicinal power, his cultivation advanced rapidly, and the primordial spiritual power in his body increased swiftly.

Without the aid of elixirs, simply by devouring Heaven and Earth Spiritual Qi in cultivation, reaching perfection level would likely be impossible without several years of effort.

Moreover, this cultivation speed is already extremely fast.

If he were a low-grade spiritual root Foundation Establishment cultivator, it would likely take ten to twenty years of hard cultivation.

Thus, it is evident the importance of talent and elixirs to cultivators.

"Since I've reached fourth-layer Foundation Establishment Perfection, it's time for a breakthrough."

Jiang Fan activated the Mixed Element Talisman Scripture, with primordial spiritual power flowing through the forty-eight minor meridians like rivers, forming vast energy.

If it were a normal Foundation Establishment cultivator, perhaps they would need to consider thoroughly, as transitioning from fourth-layer to fifth-layer is often a small bottleneck and there is always a chance of failure.

But for him, this is nothing.

No Foundation Establishment cultivator has a foundation deeper than his.

So he has no fear at all about this.

Boom~~

Centered around his body, a vortex of spiritual energy formed.

The tier two Spirit Vein of Fire Copper Island contains vast spiritual energy.

Now, basically, he enjoys it exclusively.

Therefore he can afford the luxury of recklessly devouring an entire tier two Spirit Vein's spiritual energy.

Vast spiritual energy rolled forth, pouring into the depths of his Elixir Field and Sea of Qi.

The primordial talisman in his Elixir Field and Sea of Qi is the vortex's center.

Like a black hole, it greedily devoured strands of pure spiritual energy.

Then this spiritual energy rapidly transformed into primordial spiritual power.

Urged by the primordial talisman, the vast primordial spiritual power launched an assault on new meridians.

Merely a single impact, easily breached the new meridian.

Vast primordial spiritual power surged into the new meridian.

Fifth-layer Foundation Establishment!

Clearly the bottleneck from fourth-layer to fifth-layer Foundation Establishment was trivial to Jiang Fan.

Breaking through the bottleneck was as simple as eating or drinking water.

"Finally broke through."

Jiang Fan was delighted, as he sensed the further surge in his spiritual sense and spiritual power after advancing to fifth-layer Foundation Establishment, increased by at least one-third compared to before.

The primordial talisman deep in his Elixir Field and Sea of Qi also expanded significantly.

An invisible aura enveloped the surroundings.

Undoubtedly, after advancing to fifth-layer Foundation Establishment, he could engrave a new life talisman again.

In fact, he already decided on his next life talisman, which is the Ice Talisman.

The reason for choosing the Ice Talisman is because he is currently at sea.

This sea region is rich in Water Elemental Spiritual Qi.

Actually, for Fire Element power, Earth Element power is not very friendly here.

For example, the Earth Escape Talisman on the Yiling Island Group is not very useful.

After all, apart from the islands, there is no earth.

Using it here would result in less effective outcomes.

Therefore, the power of the Ice Talisman can absolutely exert extraordinary force in such an environment.

The essence of a cultivator is to harness the forces of nature.

If a particular power does not exist in the environment, it can't be used.

Therefore, staying on the Yiling Island Group is more suited for using Water Element or ice power.

"Let's begin."

With that thought, Jiang Fan did not hesitate, quickly consumed ten thousand Luck Points.

Instantly, he fell into a state of insight.

The primordial talisman deep in the Elixir Field and Sea of Qi began to rotate slowly.

Droplets of primordial spiritual power merged into the surface of the primordial talisman, sketching the talisman lines of the Ice Talisman.

For Jiang Fan, this seemed like a practiced task, not difficult at all.

Boom~~

He didn't know how much time had passed, but as the talisman lines gradually integrated with the surface of the primordial talisman, when the final line successfully merged, it instantly radiated with blue light.

The lines of the Ice Talisman instantly became part of the primordial talisman.

Clearly, after entering the Foundation Establishment Realm, the fifth life talisman was finally successfully engraved.

Though he already anticipated his success, he was still delighted upon truly succeeding.

"Ice Talisman."

Without hesitation, Jiang Fan willed primordial spiritual power into the Ice Talisman.

Suddenly the talisman seemed to invoke the chill between heaven and earth.

Centered around his body, strands of cold energy from heaven and earth gathered.
