Chapter 333: Promoted to Fifth-Layer Foundation Establishment, Engraving Ice Talisman_2

In just a moment, the entire quiet room was instantly covered in ice, blanketed by snow.

It felt as if the quiet room had become a cold storage room, causing one to shiver involuntarily.

"Indeed, the power of the Ice Talisman is considerably enhanced on the Yiling Islands."

"If it were used amidst ice and snow, its power might even double."

Jiang Fan's eyes gleamed with satisfaction at the power of the Ice Talisman.

Even at entry-level, the Ice Talisman already possesses considerable force.

The chill pervading the surroundings is enough to slow down many cultivators.

Moreover, this is a wide-range attack.

If the skill level of the Ice Talisman is raised to proficient level, mastery level, or even great success, its mere activation could freeze the sea within dozens of miles.

By then, this would be talisman power akin to a natural disaster.

In fact, this is the might of the Talisman Cultivator.

From a certain perspective, talismans are bridges for cultivators to communicate with the power of heaven and earth.

Like a lever, they can pry open vast powers of heaven and earth.

If relying solely on the cultivator's own force, the power of heaven and earth they can summon is limited.

However, leveraging the power of talismans is altogether different, as it can significantly enhance a cultivator's abilities.

Likewise, Artifact Cultivators use the power of magical artifacts, spiritual artifacts, and other magical treasures to leverage the power of heaven and earth.

"Looks like I need to spend some time enhancing the skill level of the Ice Talisman. Only then can its combat capabilities be improved. This talisman undoubtedly has the potential to become a main battle talisman."

Jiang Fan could sense the boundless potential within the Ice Talisman.

After all, freezing itself is an extremely powerful force.

It can not only be used to attack and eliminate enemies.

But also to seal them.

If encountering enemies difficult to kill, they could be frozen and temporarily sealed.

It's said that there are indeed some ice element cultivators in the Cultivation Realm who have frozen quite a few demons using ice power.

Although his current Ice Talisman cannot achieve such levels, he believes that as his skill level continually improves, he will eventually reach that point.

Boom~~

With this in mind, Jiang Fan activated his virtual panel.

He wanted to check his current stats.

[Name: Jiang Fan]

Without a doubt, after advancing to Fifth-Layer Foundation Establishment, his various abilities have significantly improved.

At the same time, his wealth has surged to 1.2 million Spirit Stones.

This wealth is certainly considered affluent among many Foundation Establishment cultivators.

But so many Spirit Stones cannot be used recklessly, or it might provoke some trouble.

"Looks like I need to find an opportunity to spend these Spirit Stones."

"At worst, they need to be exchanged for a large number of Tier Two Elixirs."

"Transforming so many Spirit Stones into strength is most crucial."

Jiang Fan's eyes flashed.

To buy Tier Two Elixirs on the Yiling Island Group, he still needs to attend auctions.

However, Foundation Establishment Level auctions aren't held just anytime.

Especially during this wartime period, auctions may be delayed.

But for him, this doesn't matter, as he is not in a hurry.

After all, his lifespan is up to 1,200 years, even comparable to Nascent Soul cultivators.

Even without any elixirs, just through diligent cultivation, he can still advance to Foundation Establishment Perfection.

However, doing so might take several decades or even a century.

Swish!

After another period of seclusion, Jiang Fan emerged from the quiet room.

"Husband, did your cultivation breakthrough?"

At this moment, Su Weiwei sensed the aura around Jiang Fan and couldn't help but ask joyfully.

She actually didn't have such keen perception.

The perception came from the Six-Winged Poison Bee, as an ancient strange insect with strong crisis sensing ability, it can detect danger early.

Thus she noticed the change in Jiang Fan's aura immediately.

"That's right, I've advanced to Fifth-Layer Foundation Establishment."

Jiang Fan smiled slightly, wrapping his arm around Su Weiwei's voluptuous figure.

Then he took his beautiful wife directly into the bedroom and celebrated fiercely.

.....

Time flowed like water, and another month passed.

During this time, Jiang Fan thoroughly solidified his Fifth-Layer Foundation Establishment prowess.

He even raised the skill level of the Ice Talisman to mastery level, consuming quite a bit of luck points.

But it was all worth it.

Meanwhile, Su Weiwei's cultivation also progressed rapidly, naturally advancing to the Ninth-Layer Qi Cultivation realm.

It's fair to say that their cultivation progress was very promising.

"Husband, more and more refugees have fled to Fire Copper Island recently."

"Will the war spread to this place?"

Su Weiwei furrowed her brows, expressing concern.

Although their cultivation progress has been good recently, the Yiling Island Group has grown increasingly chaotic.

Fish Dragon Island, Spirit Turtle Island, and Black Shark Island, among other Golden Core influences, are embroiled in fierce battles.

The flames of war have engulfed numerous islands.

This has led to a large number of ordinary people and civilians fleeing the war zones.

The Red Whale Island force is considered a relatively safe place.

Thus, recently, many ordinary people and cultivators have come to reside on Fire Copper Island.

For Fire Copper Island, this population is manageable.

But Su Weiwei is worried that if the fighting continues, it might eventually affect Red Whale Island.

After all, no egg remains unbroken under a toppled nest.

Even though Red Whale Island appears neutral, with no intention of aligning with any force, it can still be dragged into war.

She thinks it's just a matter of time.

"I'm not sure."

"The current situation changes rapidly; who can predict what will happen next?"

"For now, all we can do is take it step by step."

Jiang Fan said solemnly.

He felt that matters hadn't reached a dire state.

Even if forced into war, he believed he could find a path to survival.

Using the power of the Fortune-Telling Talisman often helps make the right decisions.

So he wasn't overly concerned about this.

Boom~~

Just then, the Red Whale Island Token on Jiang Fan suddenly vibrated, emitting brilliant light before a message flooded into his consciousness.

This Red Whale Island Token is also considered a magical artifact.

It serves not only for identity verification but also as an internal communicator.

If anything happens at the Red Whale Island's headquarters, other Honored Guest Elders can be informed immediately.

Of course, this magical artifact can't send real-time messages like WeChat.

Simply put, it's similar to a telegram, only transmitting one message at a time.

And there's a distance limit.

Nonetheless, for cultivators, it's entirely sufficient.

"Oh no, looks like you were right."

"Red Whale Island is indeed getting dragged into the war."

"A Golden Core force, Sea Snake Island, has declared war on Red Whale Island."

"Currently, Red Whale Island requires us Honored Guest Elders to defend the island and not leave our posts."

Jiang Fan's eyes gleamed.

What?!

Hearing this, Su Weiwei's eyes widened; she didn't expect things to unfold so quickly.

Originally thinking Red Whale Island was relatively safe, she was surprised it couldn't be avoided.

This made her feel anxious, uncertain of what might happen next.
