

## Fortune 342

### Chapter 342: Acquiring Seventh-Grade Opportunity, Obtaining Red Blood Spirit Fruit\_3

"A tiger father does not beget a dog daughter, indeed! How could this old man's daughter be so powerful? How come there's been no word of her before? Could this be a false rumour from somewhere? Is she really the old man's daughter?"

"She is certainly his daughter, without a doubt. After all, as a Golden Core Zhenren, how could he casually recognize another Golden Core Zhenren as his father?"

"With this development, the balance in the Yiling Island Group is likely to shift."

"Change what balance, even if the Red Whale Daoist gains one more Golden Core, the situation here cannot be altered."

"That's true, once the Red Whale Daoist's Lifespan runs out, won't Red Whale Island be left with just one Golden Core?"

"At most, Red Whale Island's influence will expand, occupying more islands, but the Yiling Island Group is vast enough to accommodate so many Golden Core influences."

The cultivators discussed fervently.

They were astonished by the changes at Red Whale Island, eliminating the power of Sea Snake Island.

Even so, this merely meant that the Yiling Island Group now hosts another formidable Golden Core Influence.

Such power still cannot shake the entrenched status quo here.

But regardless, Red Whale Island has already begun to become a significant force.

No longer the insignificant, vulnerable power it once was.

.....

In the blink of an eye, two or three months passed.

During this time, Jiang Fan had remained on Fire Copper Island for cultivation and hadn't gone elsewhere.

After all, his task was quite simple, to protect the safety of Fire Copper Island.

Avoiding outsiders' invasion and disrupting Fire Copper Island's production.

Evidently, after the battle with Sea Snake Island, Red Whale Island indeed became well-known.

Shaking the Golden Core influences throughout the Yiling Island Group completely.

No Golden Core Zhenren had foreseen that the once declining Red Whale Island could possess such combat strength, even bringing forth a new Golden Core Zhenren, truly a revival.

After even killing the Sea Serpent Daoist and two other major Golden Core Zhenrens, Red Whale Island's influence surged unstoppably.

Not only did it annex the original sea areas of Sea Snake Island but expanded its territories significantly.

Moreover, it attracted a large number of Foundation Establishment Cultivators to join.

Originally, Red Whale Island was left with only Jiang Fan as the Honored Guest Elder.

But after three months, the number of Honored Guest Elders exceeded twenty.

Such are the benefits of power and reputation.

As long as there is sufficiently strong power, many strong practitioners will be drawn to serve.

However, this had little to do with Jiang Fan, as he still practiced diligently, enhancing his cultivation, increasing his skill level of his Life Talisman.

On this day, at dawn.

In the backyard of the mansion.

Jiang Fan was cultivating his Life Talisman, Celestial Thunder Talisman.

He activated the power of the Celestial Thunder Talisman, summoning the power of Celestial Thunder from the sky.

Commanding strands of purple thunder.

At this moment, it seemed as if he had accumulated enough strength and energy.

Under sudden insight, a long-awaited qualitative change began for Jiang Fan.

Booming~~

Above the sky, suddenly thirty-six purple Celestial Thunders appeared, covering the sky.

It was as if dark clouds filled the heavens.

Thunder roared.

Boom boom boom!!

At that moment, with a single thought, thirty-six purple Celestial Thunders descended from the sky, striking the ground and instantly creating large pits filled with destructive aura.

"Success."

"Great Success Level Celestial Thunder Talisman."

Jiang Fan smiled slightly, feeling very satisfied.

After three months of rigorous cultivation, plus the assistance of many Luck Points, his skill level of the Celestial Thunder Talisman was continually improving.

Finally, he advanced from Mastery Level to Great Success Level.

While a Mastery Level Celestial Thunder Talisman could summon twenty-seven Celestial Thunders, the Great Success Level now allowed him to summon thirty-six, significantly enhancing the power.

Evidently, this also greatly elevated his combat strength.

After all, Celestial Thunder Talisman can not only counter many cultivators but is also a formidable adversary for Demon Cultivators, Evil Cultivators, and demons.
