

Fortune 344

Chapter 344: A Great Opportunity, Yiling Secret Realm Emerges!_2

Even the number of spots to enter the Secret Realm World will be limited.

How can ordinary loose cultivators have the opportunity to enter and obtain treasures?

After all, it's just an illusion.

But this is also the cruel reality of the Cultivation Realm.

Any good resource, any good secret realm, has long been controlled by major influences.

Ordinary loose cultivators can only get some leftovers at best.

Therefore, for normal loose cultivators to rise up and defy fate is almost impossible.

"No, no, no, the Yiling Secret Realm is different."

"This Secret Realm World is very special; no Golden Core Influence can control it."

"It doesn't even have a dedicated entrance."

"As long as you get close to the hundred-mile sea area of the Yiling Secret Realm, you will be directly transported inside."

"As for leaving, that's very simple."

"Every time the Yiling Secret Realm opens for six months, and when six months end, you will be randomly transported out by the power of the Secret Realm World. The location is also not fixed."

A cultivator who is very knowledgeable about the Yiling Secret Realm knows this world inside and out.

After all, this Secret Realm World has long been public knowledge in this sea area.

As long as you live a little longer, you can learn about the Yiling Secret Realm.

So even the Golden Core Influence cannot control this Yiling Secret Realm.

"No way, if that's the case, then even we Qi Cultivation Stage cultivators can enter, and those Golden Core Influences cannot monopolize the spots."

Many loose cultivators' eyes suddenly lit up, feeling very excited.

What they feared most was the entrance to this Secret Realm World being blocked by Golden Core Influences.

If that were the case, they basically wouldn't have a chance to enter the Yiling Secret Realm.

But now, as long as you get close to the Yiling Secret Realm, you'd be directly transported in.

Then these loose cultivators can also enter the Secret Realm World and obtain opportunities.

This is great news for every loose cultivator.

"It's not just about failing to monopolize the spots."

"And even if we obtain treasures inside the Secret Realm World, those high-tier cultivators cannot hunt us down."

"Isn't it true? We were most afraid of obtaining treasures inside and then being caught by Golden Core Stage cultivators at the entrance, forcing us to hand over our gains. But now, as we will be randomly transported out, those wicked high-tier cultivators can't force us anymore."

"Indeed, it's the greatest opportunity in the Yiling Island Group, a grand event appearing once a century."

Numerous loose cultivators were filled with emotion.

They are already itching, wanting to immediately enter the Yiling Secret Realm to seize the treasures inside.

"But don't think the Yiling Secret Realm is such a good place."

"Though we loose cultivators can enter, it's not easy to obtain treasures."

"It is said that the Yiling Secret Realm seals a peerless demon, which has not died even to this day."

"This demon often releases a lot of demonic qi, trying to break the seal."

"And this demonic qi will erode many demon beasts, turning them into demons."

"The reason the Yiling Secret Realm appears once a century is to borrow the strength of cultivators to eliminate the demons."

"At the same time, weaken the demon's power and maintain the seal."

"So once inside the Yiling Secret Realm, we must face threats from numerous demons."

"A little carelessness might lead to death within the secret realm."

An old loose cultivator said in a deep voice.

He revealed deeper secrets about the Yiling Secret Realm.

Evidently, the special nature of the Yiling Secret Realm has already been known by countless cultivators.

But even so, because there are indeed many treasures inside, many cultivators still enter seamlessly.

If successful, whether Qi Cultivation Stage Cultivators, Foundation Establishment Cultivators, or Golden Core Stage Cultivators, they can gain abundant benefits to help them overcome bottlenecks.

There were once demon cultivators attempting to break into the Yiling Secret Realm, trying to destroy the restriction to save the demon.

However, upon entering the Secret Realm World, they will be annihilated by the restrictions within.

So now, no demon cultivators dare to enter the Yiling Secret Realm.

"Even so, the Yiling Secret Realm is worth the adventure."

"I heard it contains a large number of Foundation Establishment Spirit Medicines, even Golden Core Spirit Medicines."

"There are even Nascent Soul Spirit Medicines."

"The emergence of the Yiling Secret Realm this time has halted wars among many Golden Core Influences."

"Most Golden Core Zhenren will enter the secret realm to seek opportunities."

Many loose cultivators' eyes were filled with fierce enthusiasm.

The Yiling Secret Realm indeed carries huge risks, but the benefits inside are astounding.

Sufficient to defy fate.

Even Golden Core Zhenren cannot resist such temptation.

"No way, if Foundation Establishment Cultivators and Golden Core Cultivators also enter the secret realm, then how can we compete with them?" someone gulped involuntarily.

"Actually, there's nothing to worry about."

"The Yiling Secret Realm is vast, boundless."

"Once transported inside, cultivators of different abilities will be assigned different areas."

"Basically, we Qi Cultivation Stage Cultivators would hardly encounter Foundation Establishment Cultivators, let alone Golden Core Cultivators."

"I heard they are transported to deeper areas."

"We are merely in the outer regions."

Someone explained.

"If that's the case, then there's nothing to worry about."

Many loose cultivators nodded, feeling much relieved.

Evidently, they have already planned how to go to the Yiling Secret Realm.

A once-in-a-century opportunity, they will not give up no matter what.

.....

Meanwhile, Jiang Fan naturally learned a lot about the Yiling Secret Realm.

Boom~~

In an instant, he sensed the Fortune-Telling Talisman deep within his Elixir Field and Sea of Qi starting to vibrate.

A stream of information entered the depths of his consciousness sea.

"Opportunity comes, courageously go forward, missing the chance, regret for a hundred years."

"Go alone to the Yiling Secret Realm, unrestrained, like a fish in the sea, auspicious."

"Team up with other Foundation Establishment Cultivators to enter the Yiling Secret Realm, or be hindered, ominous."

"Refuse to enter the Yiling Secret Realm, neither gain nor loss, neutral."

Suddenly, streams of information emerged, all predicting the future.

"So, the emergence of the Yiling Secret Realm this time is indeed an opportunity for me."

"If missed, I'm afraid I will regret it for a hundred years."

Jiang Fan's eyes showed a glimmer.

In fact, to gain opportunity, one must take risks.

Sometimes taking appropriate risks to gain opportunities is worthwhile.

But when risk outweighs opportunity, it is not worth it.

But judging from the information given by the Fortune-Telling Talisman, opportunity apparently outweighs risk now.

If I enter the Yiling Secret Realm, I will certainly reap considerable gains.

If missed, to wait for such a good chance again, I'm afraid it will take a hundred years.

So I must go.

But how to go also requires careful consideration.

"Teaming up with others, instead, brings danger?"

"Going alone, then unrestrained, disaster-free?!"

Jiang Fan touched his chin, looking at the previous two pieces of information.

Evidently, if I team up with other Foundation Establishment Cultivators, I might be hindered.

The disaster might not be targeted at me, but at my teammates.

I would purely be suffering alongside.

The Foundation Establishment Cultivators I can team up with are just those from Red Whale Island.

Could it be that the Red Whale Island Foundation Establishment Cultivators will encounter some calamity in the Yiling Island Group?

This is not impossible.

After all, these Red Whale Island Foundation Establishment Cultivators have deep roots in this sea area, their relationships complex.

They long have no idea how many people and forces they have offended.

Someone seeking revenge is all too normal.

From this perspective, this expedition to the Yiling Island Group is more suited to traveling alone.

As for staying on Fire Copper Island to cultivate, that's also impossible.

Although it could indeed be trouble-free, it also means no gains.

He doesn't want to watch the opportunity pass him by.

To quickly enhance cultivation, he still needs to gain various opportunities.
