

## **Fortune 345**

### Chapter 345: Surviving the Calamity and Receiving the Fifth-Grade Opportunity

In no time, Jiang Fan set off alone.

The place where the Yiling Secret Realm emerged was just a few thousand kilometers away from Fire Copper Island in a sea area.

By flying himself, he could reach it in a day or two.

As for Su Weiwei, she naturally stayed behind on Fire Copper Island to cultivate.

After all, the Yiling Secret Realm is too dangerous this time, not suitable for Su Weiwei to join.

Moreover, staying on Fire Copper Island is exceptionally safe.

Because this time, most cultivators have gone to the Yiling Secret Realm, nobody would pay attention to this place.

Of course, to ensure nothing goes wrong, he also left some Tier Two Talismans.

In this way, even if Su Weiwei encounters any danger, she could quickly escape.

...

On the other hand, on Red Whale Island.

Fan Hairong, Peng Dezhe, Lu Haojing, Zhang Yunshang, Miao Feng, and Huang Yunqiang, these Foundation Establishment Cultivators were also preparing to head to the Yiling Secret Realm.

Each one of them was thrilled.

After all, for them, the emergence of the Yiling Secret Realm represented a massive opportunity.

No one would want to miss this chance.

"Eh, why didn't we call Fellow Daoist Jiang over?"

"Fellow Daoist Jiang has decent strength. If he were to join, our team's strength would undoubtedly increase greatly."

Cao Rui spoke up.

He looked around, found no sign of Jiang Fan, and felt quite puzzled.

Because he had also heard of Jiang Fan's achievements.

He had joined Red Whale Island not long ago and already slain several Foundation Establishment cultivators.

Even though his cultivation is only at the Mid-stage Foundation Establishment, he is remarkable.

At least, among the Mid-stage Foundation Establishment cultivators, he is quite powerful, occasionally threatening late-stage Foundation Establishment cultivators.

Thus, he wanted to invite Jiang Fan for the Yiling Secret Realm journey.

"Senior brother, I have already invited Fellow Daoist Jiang before."

"However, Fellow Daoist Jiang said he's used to adventuring alone, so he refused us."

Fan Hairong spoke helplessly.

He originally wanted to continue persuading because solo adventures are nothing compared to group operations.

Especially in such a dangerous place like the Yiling Secret Realm, going alone is truly risky.

Among these sea areas, which Foundation Establishment cultivator would choose to go alone?

Generally, they're in groups.

But unfortunately, Jiang Fan still refused and had long left Fire Copper Island.

Even if he wanted to keep persuading, he had no way to.

"Foolish."

"The Yiling Secret Realm is extremely dangerous, and he dares to go alone."

"I'm afraid this time the boy is doomed."

Peng Dezhe shook his head, thinking the boy simply didn't appreciate kindness.

Clearly having the support of Red Whale Island, yet he chose to venture alone.

Is this not foolishness?

Does this boy's solo strength match theirs in numbers?

"Perhaps not doomed. Some Loose Cultivators like him possess a fair amount of skill."

"Who knows what trump cards Fellow Daoist Jiang might have."

"But since he doesn't want to, we shouldn't force him."

"This time for the Yiling Island Group journey, we'll just go together."

Cao Rui felt a bit regretful not inviting Jiang Fan, but it wasn't a big deal.

After all, it's just missing one Foundation Establishment cultivator, not something destructive.

But with Fellow Daoist Jiang joining, their team's safety would increase significantly.

"By the way, senior brother."

"I wonder if Master and Lord Island Master are going?"

Zhang Yunshang asked.

"Of course, they're going."

"Apparently, Lord Island Master came precisely for the Yiling Secret Realm."

"This time our Red Whale Island has two Golden Core cultivators taking action, so it's absolutely foolproof."

Cao Rui clenched his fists, speaking excitedly.

Currently, it's considered as Red Whale Island's unprecedentedly strong period.

.....

Two days later.

Jiang Fan finally arrived at the sea area where the Yiling Secret Realm was located.

This place has no islands nearby, just an endless ocean.

It seems the sea area within a hundred kilometers is enveloped by an invisible barrier.

Coming here wasn't only Jiang Fan; many other cultivators were present.

Some flew over, others came by ship, and some arrived by spaceship.

In short, this sea area had become the most bustling place in the Yiling Island Group.

So Jiang Fan was just another ordinary cultivator, entirely inconspicuous.

Boom~~

The next second, Jiang Fan entered this invisible barrier, and suddenly a voice came: "Would you like to enter the Yiling Secret Realm?"

What?!

Hearing this, Jiang Fan felt very surprised. Could it be that the Yiling Secret Realm had been controlled by someone? Or is it merely a restriction method left by the Yiling Secret Realm?

However, the Fortune-Telling Talisman did not indicate any danger.

Clearly, whatever lies behind the Yiling Secret Realm, he should be safe.

"Yes."

Jiang Fan nodded.

Boom~~

Upon agreeing, Jiang Fan felt a Void Power enveloping his entire body.

Then he sensed spatial changes, as if riding a Teleportation Array.

In a blink of an eye, he arrived at an unfamiliar place.

"Is this the Yiling Secret Realm?"

Jiang Fan looked around and found himself in a primeval forest, surrounded by lush greenery and towering trees.

But soon, he frowned, although the place's Spiritual Qi was extremely rich, even surpassing the Tier Three Spirit Vein level, it was also shrouded with massive Demonic Qi.

If cultivating here, while absorbing Heaven and Earth Spiritual Qi, one would also devour Demonic Qi within, potentially contaminating spiritual power and leading to going mad.
