

Fortune 349

Chapter 349: Destroy the Shennong Sect's Foundation Establishment, Opportunities Arise

Demon uprising, sweeping across the Secret Realm?!

Seeing these messages, Jiang Fan's eyes flickered, clearly this was the reason behind the calamity.

The entire Yiling Secret Realm was suppressing a supreme demon.

The demonic Qi released from this supreme demon also created countless magic creatures.

Usually, these magic creatures wouldn't riot, just wandering around various places.

But if any abnormal movement occurred with that supreme demon, these creatures rioting wasn't impossible.

Although Jiang Fan's current strength was indeed commendable, compared to the countless magic creatures, he was still far off.

A little carelessness could lead to death at the hands of these creatures.

"If a demon uprising forms a tide, then there aren't many safe places on the entire island."

"In contrast, the place I'm currently at seems a bit safer."

"Could it be that this place is a blind spot for the creatures, perfect for avoiding this uprising?"

A flash of brilliance appeared in Jiang Fan's eyes.

Now he seriously observed the surrounding situation.

At this moment, he discovered that the cave was free of any demonic Qi, filled instead with pure Heaven and Earth Spiritual Qi.

In stark contrast to the outside environment.

It seemed a mysterious barrier was blocking the surrounding demonic Qi.

Thus turning this area into a place suitable for cultivators to practice.

As if a natural array barrier existed here.

Clearly, the reason the Ancient Treasure Exquisite Tower appeared here was not without cause.

Precisely because this place was special, the Ancient Treasure Exquisite Tower was buried here.

So amidst the outside demon uprising, hiding here was the safest.

"Although there are indeed many opportunities on this island."

"These opportunities are accompanied by deadly calamities."

"For now, it's better not to act rashly."

Jiang Fan naturally wanted those opportunities, but if it meant risking death, he'd rather steer clear.

For him, his own safety was a bit more important.

After all, once dead, it's all over.

As long as he was alive, he could gain countless opportunities, no need to rush.

Boom~~

Thinking this, Jiang Fan didn't hesitate and took out an array plate from his belongings.

It was the Tier Two Array he obtained earlier—the Profound Light Concealment Array.

Previously, while staying at Fire Copper Island, he hadn't had the chance to use it.

But after arriving here, this array could showcase its value.

In an instant, the array began to operate.

An invisible Profound Light Barrier expanded over a mile-radius area.

Easily temporarily concealing this place.

Thus turning the mountain into a transparent existence, any aura wouldn't leak out.

Simultaneously, others would overlook this place.

With the protection of this grand array, this place was evidently much safer.

Although it consumed quite a few spirit stones, it was all worth it.

At this time, Jiang Fan sat cross-legged on the ground, entering deep cultivation.

.....

In the blink of an eye, several days passed.

The demon uprising indeed happened as expected.

The entire Yiling Secret Realm trembled, as if letting out a roar.

Countless demonic Qi surged, forming a dark storm.

Magic creatures seemed to go berserk, frantically attacking every cultivator entering the Secret Realm World.

Any human cultivator captured by their aura would be besieged by these creatures.

In an instant, the entire Yiling Secret Realm became chaotic, with numerous casualties.

"It really is a demon uprising."

At this moment, Jiang Fan hid within the Profound Gate Concealment Array, operating the power of the Perception Talisman, expanding his spiritual sense to cover a ten to twenty kilometers area.

He sensed countless magic creatures rampaging around, constantly searching for human cultivators.

Fortunately, he had hidden away in advance.

Otherwise, even if he mastered the Celestial Thunder Talisman, he feared he couldn't handle so many creatures.

After all, their numbers were overwhelming.

The sheer number alone was enough to overwhelm many human cultivators.

No matter what, the spiritual power within cultivators was limited, and couldn't be used endlessly.

Clearly, the Fortune-Telling Talisman's hint was quite accurate.

If he foolishly left here, he would likely face a tidal wave of creatures.

Where could he remain calmly observing the changes like now?

"But what does fortune coming naturally mean, does it suggest that by staying here, opportunities will naturally come to me?"

Jiang Fan's eyes flickered, curious about this.

But he wasn't in a hurry.

Once the time came, he would naturally know what was happening.

Boom~~

At this moment, two Foundation Establishment cultivators suddenly appeared in the northwest direction, one in a red robe, the other in a black robe, looking very embarrassed, seeming to be pursued by numerous creatures.

Both appeared somewhat seriously injured.

It seemed they would soon be engulfed by the wave of creatures.

All of a sudden, the black-robed Foundation Establishment cultivator seemed to notice something, a look of joy appeared on his face: "Senior Brother, it seems there's a Tier Two Array ahead, likely the Profound Light Concealment Array, with a Foundation Establishment cultivator hiding in this place."

He hailed from the Shennong Sect, mastering Pupil Technique, instantly seeing through the disguise of the Profound Gate Concealment Array, sensing the presence of a Tier Two Array Barrier around them.

"Indeed, a Tier Two Array in this place?"
