Chapter 351: Destroy the Shennong Sect's Foundation Establishment, Opportunities Arise\_3

The faces of the two Foundation Establishment cultivators from the Shennong Sect changed drastically.

They immediately activated their High-Grade Magic Robes to unleash Spiritual Energy Shields, attempting to fend off such an attack, but quickly realized their efforts were entirely futile.

The two cyan fireballs pierced through their Spiritual Energy Shields effortlessly.

It was as simple as cutting through tofu.

Then their bodies were also penetrated by this force, exploding into fragments.

"Impossible!"

The faces of the two Foundation Establishment cultivators from the Shennong Sect turned ashen, feeling intense pain and unparalleled agony, their pupils filled with immense fear.

They never expected to be unable to withstand even a single magical attack from the enemy.

In just a moment, they were bombarded by the enemy.

At this moment, they couldn't utter a single word, their bodies shattered, and every piece of flesh was ignited by the Cyan Lotus Earth Fire.

In just a brief moment, they were burned to ashes.

They couldn't even let out a scream.

"Haha, two fools."

"What nonsense Shennong Sect cultivators, this was all they were capable of."

"Couldn't even withstand a single talisman from the master."

The Ten Thousand Transformations Pill Furnace sneered as it witnessed this scene.

In the past, it had numerous conflicts with the Shennong Sect, so seeing its cultivators in trouble now, it couldn't help but gloat.

Overall, it holds a grudge against the Shennong Sect.

"Indeed, even Foundation Establishment cultivators from a Nascent Soul Sect are no match for me anymore."

Witnessing this scene, Jiang Fan felt greatly satisfied.

Just now was merely testing the waters.

The two Foundation Establishment cultivators from the Nascent Soul Sect were slain instantly.

Clearly, his combat prowess far exceeds that of loose cultivators at Foundation Establishment, and even that of Foundation Establishment cultivators from a Nascent Soul Sect.

But this is only natural.

After all, he has inherited the legacy of the ancient sect, the Primordial Talisman Sect.

In terms of inheritance alone, it naturally surpasses that of the Shennong Sect and other Nascent Soul Sects.

Not to mention, his foundational strength is comparable to the ancient Primordial Talisman Sect's Daoist, or even stronger.

Just two Inner Sect disciples from a Nascent Soul Sect, how could they be his opponent?

Even if a Direct Disciple personally came, they probably wouldn't fare much better.

Rumble~~

But just then, demons in the distance erupted into chaos.

Clearly, they had detected the presence of battle here, realizing human cultivators were present.

Hundreds to thousands of demons surrounded them.

"Damn it."

"I knew the Shennong Sect disciples would ruin things."

"This kid is in trouble."

The Ten Thousand Transformations Pill Furnace also sensed this scene.

Clearly, the Tier Two Array Profound Light Concealment Array temporarily lost its effect, having been discovered by these demons.

It's now impossible to hide from them.

"Just mere demons."

"Watch how I wipe them out."

At this moment, the Demon-Vibrating Bell volunteered itself.

Though it wasn't keen on taking action, if it meant killing demons, it didn't mind expending some effort.

Only dead demons are truly good demons.

"Kill."

Jiang Fan nodded, not saying much.

The Primordial Talisman inside him began to spin, channeling a large amount of Primordial Spiritual Power into the Demon-Vibrating Bell.

Instantly, numerous ancient talismans on the Demon-Vibrating Bell lit up.

It immediately flew above Jiang Fan's head, starting to shake continuously.
