

## **Fortune 353**

Chapter 353: Obtaining the Profound Water Pill, Advancing to Sixth-Layer Foundation Establishment\_2

"And he even gained the recognition of the Demon-Vibrating Bell."

"No wonder he could easily refine the Exquisite Tower."

A young voice was deeply shocked.

It thought that this disciple of the Primordial Talisman Sect gaining the Exquisite Tower's recognition was already a heaven-defying stroke of fortune, quite extraordinary.

Who would have thought this kid still held an Ancient Treasure? It's truly unbelievable.

Even the heritage of a Daoist from the Ancient Era might be just as profound.

"Indeed, he is the last disciple of the Primordial Talisman Sect, inheriting the grand destiny of the Primordial Talisman Sect."

"That's why he can obtain so many fortuitous encounters."

"If this kid continues to grow, he might have the hope of reaching Divinity Transformation."

An elderly voice spoke in a deep tone.

It thought highly of this young cultivator, believing his future was boundless.

"If so, should we provide even more rewards?"

"After all, if this kid can grow up, perhaps he can help us completely solve this demon."

The young voice said in a deep tone.

"We can try."

"This kid seems to be a Body Cultivator as well."

"There seems to be a resource left in the treasury."

"Perhaps it could be given to him."

"But he must hunt enough demons to earn this reward."

The elderly voice said.

"Hmm, we shouldn't break the rules here."

"Let's see what destiny holds for him."

The young voice agreed with this point.

...

One month later.

Basically, during this month, Jiang Fan stayed hidden in this Nameless Cave cultivating.

Using the strength of the Tier Two Profound Light Concealment Array, he formed the Profound Light Barrier, thus concealing his presence.

The demons and cultivators around couldn't detect his existence.

So he stayed here safely to cultivate.

What happened in the outside world had little to do with him.

Moreover, with the Profound Water Pill obtained earlier, his cultivation advanced rapidly.

Rumble~~~

As Jiang Fan consumed one Profound Water Pill after another, they were immediately digested, then devoured and absorbed by the Primordial Talisman, finally transforming into droplets of Primordial Spiritual Power.

He sensed the vast Primordial Spiritual Power flowing through his meridians, forming what seemed like rivers.

Boom!

Yet another Profound Water Pill's medicinal power was devoured and digested; Jiang Fan sensed his internal Primordial Spiritual Power elevating to the Fifth-Layer Foundation Establishment Perfection, easily connecting sixty secondary meridians.

The Primordial Talisman deep within the Elixir Field and Sea of Qi kept rotating.

Like a planet, it triggered the Primordial Spiritual Power deep in each meridian.

Seemingly forming a spiritual power circulation.

Centered on his body, the surrounding Heaven and Earth Spiritual Qi surged in, forming a Spiritual Energy Vortex.

The entire cave was flooded with massive Heaven and Earth Spiritual Qi.

Wisps of Spiritual Qi also crazily rushed into his body, being devoured and absorbed by his physique.

"The Perfect-Level Profound Water Pill, its medicinal power is indeed immense."

"Not comparable to ordinary-grade elixirs."

Jiang Fan was very satisfied with the Profound Water Pill.

These Profound Water Pills were originally ordinary-grade, but after being refined by the Ten Thousand Transformations Pill Furnace, all impurities and Elixir Poison were removed, becoming perfect-grade elixirs.

Therefore, the medicinal power of the Profound Water Pill increased by at least thirty to forty percent compared to before.

Moreover, it had no Elixir Poison.

Resistance was also significantly reduced.

Thus, he could consume more Profound Water Pills.

This allowed his cultivation to rapidly improve, saving much time on arduous practice.

"The time has come."

Sitting cross-legged on the ground, Jiang Fan operated the Mixed Element Talisman Scripture, circulating his internal Primordial Spiritual Power through round after round, feeling his internal Primordial Spiritual Power had reached its peak.

To continue increasing Primordial Spiritual Power, he could only penetrate new meridians.

Droplets of Primordial Spiritual Power gathered, seemingly forming rivers, wandering deep in the meridians.

Then, under the guidance of the Primordial Talisman, they began to impact new meridians.

Boom~~

In an instant, with just a light impact, the vast Primordial Spiritual Power easily broke through the bottleneck, like a flood breaking through a dam.

A large amount of Primordial Spiritual Power rushed into new meridians.

Sixth-Layer Foundation Establishment!

Undoubtedly, his cultivation had greatly improved, advancing from the Fifth-Layer Foundation Establishment to the Sixth-Layer Foundation Establishment Realm.

There wasn't much of any bottleneck in between.

As long as his internal spiritual power was sufficient, he naturally could advance to the next Realm.

If other Foundation Establishment cultivators knew about Jiang Fan's situation, they'd surely be filled with envy, jealousy, and hatred.

The gap between people was immense.

Other Foundation Establishment cultivators needed to cautiously break through bottlenecks, fearing failure and thus damaging their meridians, requiring lengthy time to repair internally.

But Jiang Fan now didn't need any concern, merely a single impact allowed him to breakthrough easily.

Moreover, without any accidents.

This is indeed the benefit of solid foundations.

With firm foundations, subsequent cultivation becomes increasingly easier.

Other cultivators may initially cultivate rapidly, but as they progress, the bottlenecks become increasingly terrifying.

Eventually, they become insurmountable barriers.

This is why some cultivators remain stuck at a bottleneck for life, unable to breakthrough.

It's often an early stage cultivation hidden risk, which surfaces later.

By the time they regret it, it's usually too late, nearly impossible to salvage.

"Finally advanced to Sixth-Layer Foundation Establishment."

Jiang Fan opened his eyes, feeling indescribable joy.

He sensed the Primordial Spiritual Power in his body and the Spiritual Sense increased considerably compared to before.

At least one-third augmented.

If it were a regular Foundation Establishment of Loose Cultivators, advancing from the Fifth-Layer to the Sixth-Layer Foundation Establishment would take over a decade, but he now only took several months.

Such cultivation efficiency is truly astonishing.

Yet this is thanks to his encounters of destiny; without these assists, relying solely on arduous practice, his time consumption would be significant.

Destiny encounters are thus vital for cultivators.

"Tsk tsk, at such cultivation speed, wouldn't he soon advance to the Golden Core?"

"Earth Spirit Root's aptitude is terrifying indeed."

The Ten Thousand Transformations Pill Furnace clicked its tongue.

It thought of its previous owner, Daoist Wan Hua, who had a low-grade Spirit Root; even with significant destiny encounters, he could only try to breakthrough to Golden Core at around two hundred years old.

Just reaching the Ninth-Layer Foundation Establishment took Daoist Wan Hua over a hundred years.

The difference between individuals is indeed vast.

"Cultivation speed is indeed fast, but the foundation is solid, which is the true wonder."

The Demon-Vibrating Bell valued the foundation as more crucial; fast cultivation is pointless without a solid foundation because attempting higher Realms without firm grounding leads to insurmountable bottlenecks.

Changing it later is nearly impossible.

However, its current owner differs; he has rapid cultivation and a solid foundation.

This is what truly astonishes it.

"Quickly reach the Golden Core."

"Otherwise, you're not qualified to use me."

The Exquisite Tower chuckled.

Though still somewhat discontent, the deed is done, and it ultimately acknowledged the other as its owner, merely hoping his cultivation improves to match its dignity.

Right now, Jiang Fan wasn't immediately chatting with his treasures on himself.

He was engrossed in the joy of ascending to Sixth-Layer Foundation Establishment.

Advancing to Sixth-Layer Foundation Establishment meant he could engrave new Life Talismans.

New Life Talismans would become one of his new trump cards.

Therefore, he needed to carefully consider which talisman to engrave.

Of course, choosing incorrectly didn't matter much.

With each Realm advancement, he could engrave a new Life Talisman.

Other cultivators in the Primordial Talisman Sect must carefully and prudently decide, as it's critically important.

But he didn't worry; after all, he would undoubtedly become a Master of Ten Thousand Talismans.

Hence, he needed to master all talismans to become an omnipotent Talisman Master.

Thus, learning any talisman was a matter of time.
