

Fortune 359

Chapter 359: Obtaining Sixth-Grade Opportunity, Tier Three Bear King's Profound Gall_2

However, the Fortune-Telling Talisman did not provide any warnings of danger.

Evidently, this sudden incident might be a good thing for him.

Moreover, he already had some guesses about the owner of this voice.

The only one capable of doing this openly must be the Array Spirit of the Yiling Secret Realm.

"I am the Array Spirit of this Secret Realm, you can call me Burial."

The voice explained.

"Burial?"

Jiang Fan didn't expect the Array Spirit of the Secret Realm World to take the initiative to speak to him, even revealing its identity.

Over the years in the Yiling Secret Realm, such occurrences must be very rare.

Otherwise, the existence of the Array Spirit would have been exposed long ago.

It wouldn't be that even now, few cultivators discuss it.

"The reason I revealed myself is because you are quite special."

"You have obtained the inheritance from the ancient sect Primordial Talisman Sect, and have some connection with this Secret Realm."

"At the same time, you have eliminated many demons, accumulating sufficient Contribution Points."

"Therefore, according to the rules, you can also receive a hidden reward."

The Array Spirit Burial said in a deep voice.

"I see."

Jiang Fan nodded. He knew that his Sixth-Grade Opportunity evidently came from the gift of the Array Spirit of this Secret Realm World.

He was very curious about what kind of treasure could be worthy of being called a Sixth-Grade Opportunity.

Boom~~

At this moment, a ripple appeared in the surrounding void.

The next second, a black wooden box and a dark gold token appeared before Jiang Fan.

"What is this?!"

Jiang Fan curiously accepted these two treasures.

He opened the black wooden box and saw inside a fist-sized gall, bright red, covered with dense mysterious runes, containing enigmatic power.

Even though it had been extracted, who knows how many years ago, it was still pulsing vigorously.

Inside contained strong life force, mysterious and immeasurable.

It also emitted a medicinal fragrance.

It seemed to stir the Qi and Blood Power within him, causing his blood and energy to surge.

Every cell in his body seemed to express a longing, wanting to devour the Bear Gall immediately.

"This is a Tier Three Bear King's Profound Gall."

"It comes from the gall of a Tier Three Earth Demon Bear."

"It contains a large amount of life essence of a Tier Three Demon Beast, abundant in Spiritual Qi and Blood Qi."

"If consumed, it can greatly enhance a human's blood energy and physique."

"It's considered a good Body Tempering Spiritual Object."

"If I'm not mistaken, you also practice a Body Cultivation Technique, possessing a strong physique."

"Such a Spiritual Object for you should be considered a worthwhile treasure."

The Array Spirit Burial said in a deep voice.

It was very selective in the treasures it bestowed.

Ordinary treasures might not catch the eye of this young man in front of it.

However, this Body Tempering Spiritual Object was quite rare.

After all, if the Tier Three Bear King's Profound Gall were outside, its value would be immeasurable.

Even Golden Core Realm Body Cultivators would go crazy for it, let alone Foundation Establishment Cultivators.

To some extent, the value of the treasures it bestowed exceeded the other's Contribution Points.

However, it was optimistic about this young man's future.

So, it used some privileges to grant this treasure, hoping the recipient could grow quickly.

"Tier Three Bear King's Profound Gall?!"

Jiang Fan's eyes lit up immediately, feeling excited, this was indeed one of the Body Tempering Spirit Medicines, invaluable, especially for him who practiced the Soaring Snake Technique, it was worth a fortune.

Originally, his practice of the Soaring Snake Technique had reached the Tier Two Middle Stage level.

The distance to Tier Two Late Stage was indeed quite far.

Without external assistance, it would probably take decades to advance.

Of course, for a normal Tier Two Body Cultivator, this was a normal cultivation timeframe.

Furthermore, his lifespan was already extraordinary, comparable to a Demon Beast.

Decades of cultivation time were insignificant.

However, even so, if he could shorten the time for practicing the Soaring Snake Technique and stabilize his foundation, why not do it?

Evidently, the Tier Three Bear King's Profound Gall was such a precious treasure.

"Also, this token is the Yiling Token."

"Only cultivators recognized by the Secret Realm can obtain this token."

"Once refined, you can enter the Yiling Secret Realm once a year to acquire treasures."

"Unlike other cultivators who must wait a hundred years."

"In the past, Daoist Yiling received this token, allowing him to quickly promote to the Nascent Soul stage."

"Unfortunately, his opportunities weren't enough, he stopped at Nascent Soul, unable to become Divinity Transformation."

The Array Spirit Burial continued to introduce the second treasure—the Yiling Token.

As it spoke of Daoist Yiling of the past, it expressed a bit of regret.

If the other had become a Divinity Transformation Cultivator, perhaps its stress would have reduced greatly.

"This."

Jiang Fan was taken aback; he hadn't expected something like the Yiling Token.

Knowing the countless treasures within the Yiling Secret Realm, if he could freely enter and exit, who knows what benefits he could gain.

He could leverage the resources within the Secret Realm World to rise quickly.

In those days, the greatest secret to Daoist Yiling's rise stemmed from this.

But he remained cautious, asking in a deep voice, "If I refine this token, what would I need to give in return?"

He knew there was no free lunch in the world.

The opponent giving such benefits must be expecting repayment.

There is no love without reason in this world.

"My request is simple."

"When your cultivation reaches a certain level, help me deal with the demon sealed here."

"For all these years, the Yiling Secret Realm has been looking for a suitable successor."

"Unfortunately, to this day, no one has managed this."

The Array Spirit Burial spoke with helplessness; resolving the demon sealed here was its greatest wish.

Unfortunately, over the years, it had cultivated many geniuses, but none succeeded.

At most, it led to the hunting of demons within the Secret Realm, weakening part of the demon's power.

But even so, it would not give up until this unparalleled demon was ultimately resolved.

"What kind of strength is needed to deal with this demon?"

Jiang Fan asked cautiously.

"At the very least, it would require Divinity Transformation."

The Array Spirit Burial said matter-of-factly.

"This."

Upon hearing this, Jiang Fan was at a loss for words, merely being a small Foundation Establishment Cultivator himself.

The distance to the Divinity Transformation Realm was unimaginable.

Even with exceptional luck and numerous opportunities, he couldn't guarantee becoming Divinity Transformation.

At best, it increased the odds a little.

"Of course, it doesn't mean you must become Divinity Transformation."

"This is merely an investment."

"Over countless years, I have invested in many geniuses."

"Some succeeded, but most failed."

"As long as one succeeds, it is enough."

"So, you needn't feel too pressured."

The Array Spirit Burial explained.

"Alright."

"If I refine this token, does it mean I can leave the Yiling Secret Realm now?"

Jiang Fan was moved and asked.

"That's right, other cultivators need to wait half a year's time."

"But one who has refined the token can enter and exit at will."

"Once you activate the token's power, it will transport you out."

Array Spirit Burial explained.

"I see."

Jiang Fan nodded, admitting the Yiling Secret Realm token held immense benefits for him.

Once refined, it provided a retreat, allowing him to leave at any time.

This way, even if facing danger, he could swiftly escape, preemptively averting it.

Admittedly, this Sixth-Grade Opportunity was remarkable.

It was like having his greatest hidden threat resolved.

He also gained the Tier Three Bear King's Profound Gall. If he fully refined this Body Tempering Spiritual Object, his Soaring Snake Technique could make further breakthroughs, elevating his Body Cultivation Realm to Tier Two Late Stage.

By then, his combat power and lifespan would greatly increase.
