Chapter 360: Breakthrough in Soaring Snake Technique, Lifespan 2,000

One day later.

Jiang Fan found a hidden cave on this island and then set up the Profound Light Concealment Array to temporarily hide and avoid the harassment of the surrounding demons.

Ever since he was given the token and the Tier Three Bear King's Profound Gall, the Array Spirit Burial had disappeared without a trace, never speaking to him again.

But he didn't mind.

After all, the most important thing for him now was to refine this Bear King's Profound Gall.

If successful, his Soaring Snake Technique would definitely achieve a huge breakthrough.

This was the crucial thing, everything else had to take a back seat.

Boom~~

At this time, Jiang Fan put the Bear King's Profound Gall into the Ten Thousand Transformations Pill Furnace, then activated this ancient treasure to swiftly refine the Tier Three Bear King's Profound Gall into drops of crimson liquid medicine.

Normally, this Bear King's Profound Gall required a special method of consumption in combination with a series of spirit medicines to fully activate its medicinal power and achieve the best effect.

But with the Ten Thousand Transformations Pill Furnace, there was no need for such trouble.

It could refine the Bear Gall, expelling all impurities, leaving only the most essential medicinal liquid.

This also saved a lot of time and effort.

Rumble~~

Thinking of this, Jiang Fan did not hesitate and swallowed a drop of the crimson medicine.

The moment it entered his body, the medicinal power exploded like molten lava, flowing everywhere in his body and rapidly spreading throughout, enveloping his entire body in a scorching hot stream.

The muscles, bones, meridians, and internal organs in his body were rapidly strengthened.

"The medicinal power is too strong."

Jiang Fan was amazed.

Although he had long known the powerful medicinal power of this Tier Three Bear King's Profound Gall, containing immense blood and energy, he still underestimated it when he actually consumed it.

After all, it was the essence of a Tier Three Demon Beast, its immense blood and energy were incomparable to ordinary Foundation Establishment cultivators; in fact, it was meant for Tier Three Body Cultivators.

If a Tier Two Body Cultivator consumed it, they wouldn't be able to withstand the violent medicinal power, and might even explode and die.

However, he was not an ordinary Tier Two Body Cultivator; he was a body cultivator who practiced the Soaring Snake Technique, his physique was far stronger than typical Tier Two Body Cultivators.

Moreover, this was just one drop of the medicinal liquid and was completely within his capacity to bear.

He could feel the amazing effects of the Bear King's Profound Gall.

For a body cultivator, it was definitely invaluable.

If it were outside, even if one had money, they might not be able to buy it.

After all, killing a Tier Three Demon Beast was not an easy task.

A careless Golden Core Zhenren might also fall in.

"To advance to the late stage of Tier Two Realm, it is necessary to continuously inscribe Soaring Snake Talismans on the skin."

"A total of 666 Soaring Snake Talismans need to be inscribed to be completely successful."

Jiang Fan sat cross-legged on the ground.

He operated the Soaring Snake Technique, allowing the spiritual power within him to permeate his skin, inscribing one Soaring Snake Talisman after another.

With each inscribed Soaring Snake Talisman, the body would suffer damage.

If relying on the body's self-healing ability, it would take a long time to recover.

But with the help of the Tier Three Bear King's Profound Gall, the self-healing ability would greatly increase.

As a result, the speed of inscribing the Soaring Snake Talismans would become faster and faster.

This was also why his cultivation of the Soaring Snake Technique had been very slow.

Without the assistance of Body Tempering Spirit Medicine, the cultivation speed of a body cultivator is actually very low.

It couldn't match pure Qi Refiners.

But with external assistance, the advancement speed of a body cultivator could be very fast.

...

In the blink of an eye, three to four months passed swiftly.

Jiang Fan stayed in this cave, cultivating.

From time to time, he would consume a drop of Bear King's Profound Gall liquid, temper his physique, and inscribe Soaring Snake Talismans.

When the medicinal power was completely digested, he would take another drop of Bear King's Profound Gall liquid.

One Soaring Snake Talisman, ten Soaring Snake Talismans, a hundred Soaring Snake Talismans, two hundred Soaring Snake Talismans...

Now, the Soaring Snake Talismans on his skin had reached 665.

Just one talisman away from reaching the Perfection Level of Tier Two Middle Stage.

By then, he could strive for the late stage of Tier Two Realm, which is a qualitative change.

But for Jiang Fan, it was a natural progression, without any particular feeling.

His mind was very calm.

Rumble~~

In an instant, the last Soaring Snake Talisman was inscribed on his skin, all 666 Soaring Snake Talismans illuminated, seemingly forming a peculiar array covering every inch of his skin.

No, it wasn't just covering his skin but every corner of his body as well.

With the operation of this array, strands of mysterious energy were drawn from the depths of the void, infused into his body, filling every part of his being.

At this moment, the internal organs, every muscle, every bone, and every inch of skin were tempered and baptized by the mysterious energy, visibly strengthening the body.

Late Stage Tier Two!

Without a doubt, his Body Cultivation Realm effortlessly advanced to the Late Stage of Tier Two.

The strength and speed of his body dramatically surged.

"So powerful."

Jiang Fan marveled internally at the changes within his body.
