Chapter 361: Breakthrough in Soaring Snake Technique, Lifespan 2,000_2

Although he didn't know what these mysterious energies were, he knew that the benefits to the human body were immense, perhaps the divine beasts' powerful physiques owed much to the refinement by these mysterious energies.

It was precisely these mysterious energies that helped him break the human limits and obtain a physique and lifespan akin to those of divine beasts.

He felt that his physique was overwhelmingly strong now.

Even a light punch could explode a late-stage Tier Two demon beast.

This feeling was like having a divine beast cub residing within his body.

Endless strength surged from him, never tiring.

Meanwhile, his exuberant blood and energy were burning intensely.

It seemed that every drop of blood contained immense heat, enough to annihilate numerous demons.

Ordinary ghosts approaching him would be incinerated by the mere heat naturally emitted from his body.

"The power of the Bloodline Divine Power Palm Wind has grown even stronger."

Jiang Fan focused his thoughts.

As the concentration of Soaring Snake Bloodline within his body increased, he sensed that his control over the wind became stronger and his perception keener.

It seemed like he could easily manipulate the airflow around him.

With just a thought, the surrounding airflow could move according to his will.

Numerous air currents would envelop him, winding and twisting.

It was as if countless air currents encased him, like stars surrounding the moon.

This was truly the Child of Wind, favored by the power of the wind.

"As expected of the Tier Three Bear King's Profound Gall, the medicinal power is astounding."

"I only consumed half, yet it allowed me to advance to the late-stage Tier Two."

Jiang Fan was amazed.

Although he had cultivated hard for four months, he hadn't consumed all of the Bear King's Profound Gall.

He only ate half of it.

This was quite normal.

After all, such a massive essence from a Tier Three demon beast can't be digested quickly.

Without a doubt, the remaining Bear King's Profound Gall was more than enough to help him advance further in the Soaring Snake Technique.

The best outcome would be to reach the Tier Two Perfection Level.

If successful, it might allow his Body Cultivation Realm to break through to Tier Three ahead of time.

If so, the power of his physique alone might rival a Golden Core Zhenren.

However, for him, this cultivation technique wasn't about increasing combat power.

The most important aspect was extending his lifespan, helping him break the lifespan limit of human cultivators.

Boom~~

Thinking of this, Jiang Fan activated the virtual panel on himself.

Noticing the series of data above, Jiang Fan's eyes brightened with joy.

Two thousand years of lifespan?!

Compared to before, this had increased by a full eight hundred years.

Although he knew lifespan would surely increase significantly after reaching the late-stage Tier Two, he never expected it to rise this much.

Such a long lifespan, even a Nascent Soul cultivator couldn't compare to him.

Perhaps only a Divinity Transformation cultivator could surpass him.

After all, it's said that Divinity Transformation cultivators possess a lifespan of three thousand years, an extraordinary length.

Yet, even a two-thousand-year lifespan is incredibly long.

One wouldn't know how many dynasties could come and go.

Suffice to say, the mysteries contained in the Soaring Snake Technique are truly mind-boggling.

This is undoubtedly one of the rarest top-tier cultivation techniques in the world.

Luckily, he obtained this cultivation technique; otherwise, how could he raise his lifespan to such an extent?

"Only eleven thousand luck points left?"

Jiang Fan stroked his chin.

After killing those Foundation Establishment cultivators from Black Shark Island, he gained fifty thousand luck points, skyrocketing his total to one hundred and forty thousand.

But after four months, he consumed a large number of luck points to cultivate the Soaring Snake Technique.

Without the aid of luck points, cultivating the Soaring Snake Technique wouldn't have been so smooth.

Just comprehending the Soaring Serpent Rune alone would have taken an incredibly long time.

The rapid progress in his Soaring Snake Technique was not only due to the Tier Three Bear King's Profound Gall, but also the indispensable support of luck points.

But it was all worth it.

"The Celestial Thunder Talisman has also been cultivated to Perfection Level."

Jiang Fan sensed that he had maximized the skill level of his Celestial Thunder Talisman; it could not be improved further, marking his first Life Talisman to reach Perfection Level since advancing to Foundation Establishment.

Now, once the Celestial Thunder Talisman is activated, he could summon forty-nine strikes of celestial thunder.

The destructive power has far exceeded the past.

The rapid increase in Celestial Thunder Talisman's skill level was naturally due to the environment.

While cultivating here, he frequently encountered a large number of demons.

This made it necessary to use the power of the Celestial Thunder Talisman.

Over time, even without consuming luck points, the Celestial Thunder Talisman's skill level continued to rise.

Now, the Celestial Thunder Talisman's skill level naturally reached Perfection Level.

Whenever he encountered demons, Jiang Fan could instantly gather forty-nine strikes of celestial thunder, obliterating any number of demons, leading to the near extinction of demons in the area.

Not many demons dared approach this area.

This also made Jiang Fan's environment incredibly safe.

He no longer needed to worry about demon attacks.

"It's a pity wealth is still a little over a million Spirit Stones."

"If I had obtained those Foundation Establishment cultivators' storage bags, my wealth would have surely soared."

Jiang Fan recalled slaying the Foundation Establishment cultivators from Black Shark Island; their storage bags were snatched away by the Array Spirit of the Yiling Secret Realm, all falling into its hands.

Without a doubt, despite many years, treasures in the Yiling Secret Realm still continuously emerge.

It seemed like treasures never cease here.

Normally, over time, treasures should diminish.

Yet, the Yiling Secret Realm had no such issue.

Apparently, part of the treasures inside the Yiling Secret Realm possibly originates from many human cultivators.

After these cultivators perish, their storage bags remain within the secret realm world.

In this way, a bulk of treasures is gained by the Array Spirit of the Yiling Secret Realm, and these treasures become opportunities given to the next cultivators entering the realm.

Over time, instead of decreasing, the treasures in the Yiling Secret Realm keep growing.

This is why each time the Yiling Secret Realm opens, it attracts many cultivators.

For loose cultivators, it undoubtedly offers further advancement opportunities.

They certainly won't miss it.

"Never mind, never mind."

"Even if I got those Foundation Establishment cultivators' storage bags, I probably wouldn't get too many precious treasures."

"The Tier Three Bear King's Profound Gall is better."

Jiang Fan considered and still felt that the treasure bestowed by the Array Spirit of the Yiling Secret Realm was better, guessing those Foundation Establishment cultivators' treasures wouldn't have been many rare items, mostly just some Spirit Stones and Spirit Medicine.

Nothing compared to the Tier Three Bear King's Profound Gall.

Such treasures may not be purchasable even with money.

As for Spirit Stones, if he desired, he could still acquire a lot.

Hence, such rare treasures are preferred.

Rumble~

At this moment, the entire Yiling Secret Realm began to tremble, buzzing, affecting every region.

"Hmm? Is the half-year term up, and we need to leave the Yiling Secret Realm?"

Jiang Fan realized what was happening.

Undoubtedly, he had been in this secret realm world for a full six months.

This was the final time limit for the emergence of the Yiling Secret Realm.

Once time is up, all cultivators are expelled.
