

Fortune 362

Chapter 362: Nascent Soul Spiritual Object, the Great Calamity Arrives!

Boom~~

In an instant, a force of space enveloped Jiang Fan's entire body.

Before he could react, this force immediately transported him away.

The next second, Jiang Fan found himself leaving the Yiling Secret Realm and returning to the ocean.

And it wasn't just him, almost all the cultivators that survived in the Yiling Secret Realm were transported out by this power.

However, the location to which each cultivator was sent was different, all were random.

"Finally out, finally out of the Yiling Secret Realm."

"The demons inside seemed endless, really terrifying."

"Aren't they? If we had stayed inside any longer, we would surely be dead."

"But no matter what, we have all gained tremendously this time, we've hit the jackpot."

"But it's a pity, the next time the Yiling Secret Realm opens will be in a hundred years."

"Haha, those cultivators who missed the opening of the realm must be regretting it terribly."

Many cultivators discussed, each overjoyed to the extreme.

Basically, there were zero negative reviews.

After all, those who wanted to give negative reviews were already perished inside the Secret Realm World.

Those who survived the Secret Realm World received praise overwhelmingly.

Because they indeed obtained tremendous gains.

Some cultivators became rich overnight.

If not for the Yiling Secret Realm, they might never have had such an opportunity in their lifetime.

Whoosh!

However, Jiang Fan paid no attention to the surrounding cultivators; now he was eager to get back home.

After all, it's been half a year since he returned home or saw his Dao companion.

This filled him with longing.

He exerted all his strength to activate the Light Body Talisman, and at that moment he found his speed was more than double than before.

The consumption of Primordial Spiritual Power was also cut in half.

Obviously, this was due to the breakthrough in the Soaring Snake Technique.

After advancing to the Tier Two Late Stage, the power of his Bloodline Divine Power Palm Wind received a massive boost, allowing him to master the Wind Power with greater ease.

This made it easier for him to control the wind, as if he were a born Child of Wind.

As a result, his speed reached an incredible level.

Even the speed of cultivators at Foundation Establishment Perfection couldn't compare to his.

He was like a supersonic aircraft, swiftly slicing through the sky.

In just a few hours, Jiang Fan returned to Fire Copper Island.

And few cultivators noticed his return.

"Husband."

At this moment, Su Weiwei, who was cultivating at the estate on Fire Copper Island, seemed to sense something, and her beautiful face showed a look of surprise. She turned her head and saw Jiang Fan returning.

This was also thanks to the power of the Yin Yang Mandarin Duck Talisman.

After a long period of cultivation together, they had reached a point where their minds were perfectly in sync.

Thus, in some mysterious way, Su Weiwei could sense Jiang Fan's presence, and so could Jiang Fan.

Even though Jiang Fan was in the Yiling Secret Realm, which was a very long distance away.

But Su Weiwei could vaguely sense Jiang Fan's current life and death status, so she was very reassured and didn't worry about Jiang Fan being in life-threatening danger.

"Not bad, seems you've grown quite a bit."

Jiang Fan approached and embraced Su Weiwei tightly.

He could feel Su Weiwei's fiery and mature body; after half a year apart, not only had Su Weiwei's cultivation reached the Qi Cultivation Ninth-Layer Perfection, but her body seemed to have developed further, making her as alluring as a ripe peach.

Her figure was curvaceous and fiery, exuding an enchanting fragrance.

She was simply a peerless beauty.

Every move, every smile was infinitely charming, making one salivate.

He felt his own blood and qi being stirred by this allure, utterly beyond control.

"Pah, you big villain."

Su Weiwei gave Jiang Fan a coquettish glance, but she also felt the same way, lonely and hard to bear.

Whoosh!

The next second, Jiang Fan scooped up this peerless beauty and carried her into the bedroom.

Not long after, enchanting sounds emanated from the bedroom, lingering for a long time.

...

Several more days passed.

Jiang Fan and Su Weiwei were inseparable, hardly leaving the bedroom.

After all, they hadn't seen each other for half a year; only thus could they alleviate their yearning for one another.

Of course, this also greatly benefited Su Weiwei's cultivation.

Because Jiang Fan was already a Sixth-Layer Foundation Establishment cultivator and a Tier Two Late Stage Body Cultivator.

His cultivation was far stronger than Su Weiwei's.

Through the power of the Yin Yang Mandarin Duck Talisman, threads of blood qi flowed from Jiang Fan, thoroughly improving Su Weiwei's physique, making her body increasingly perfect.

As a result, Su Weiwei's success rate in advancing to Foundation Establishment would be significantly higher.

"Hmm?!"

Jiang Fan's heart stirred, and he suddenly realized his Life Talisman Perception Talisman skill level had unconsciously increased, reaching the Great Success Level, more than doubling in strength compared to before.

A Great Success Level Perception Talisman could expand his Spiritual Sense detection range sevenfold.

At the same time, the concealment ability of his Spiritual Sense was greatly enhanced, making it even less likely to be detected by other cultivators.

The reason for such a rapid increase was naturally due to dual cultivation.

Their minds were in sync, their spirit merged, so his soul power gained a substantial boost.

As a result, the skill level of the Perception Talisman naturally increased.

However, this was also because the Perception Talisman was almost at a breakthrough point, which led to such a transformation.
