

Fortune 370

Chapter 370: Smooth Crossing of the Tribulation, Disaster Never Befalls_2

Thus, as a fugitive, it is absolutely impossible to have a stable territory. One can only flee everywhere to avoid the pursuit of the Profound Celestial Sword Sect. If one dares to stay, one will surely be hunted down.

However, such fugitive Golden Core Zhenren is indeed a great threat to these ordinary loose cultivators.

Because the opponent has no territory and is a fugitive, they are fearless.

"But the battle is so fierce, could it be that there is a Golden Core cultivator on that Black Shark Island ship?"

Someone inquired.

After all, if it were only Foundation Establishment cultivators, it wouldn't be possible to cause such a huge disturbance.

Only two great Golden Core Zhenren battling could cause such aftershocks.

"That's right, Black Shark Island hides a Golden Core Zhenren, Master Zi Yu."

"Originally, it was to guard against other tribulation cultivators; unexpectedly, it provoked the Red Blood Monster."

"Just now, it was the battle between Master Zi Yu and the Red Blood Monster that caused such waves."

Another person responded.

"It's actually Master Zi Yu, no wonder he's so formidable and can block the Red Blood Monster."

Many cultivators suddenly understood.

It's known that Black Shark Island has a total of five Golden Core Zhenren, the strongest being the Black Shark Daoist, followed by Master Zi Yu.

The opponent had left behind a brilliant record in this sea region, able to resist the Red Blood Monster; it wasn't anything unusual.

"Now there's a good show to watch."

"The Red Blood Monster is indeed renowned, but Master Zi Yu is not to be underestimated."

"Perhaps this infamous fugitive will be detained by Master Zi Yu."

"It's just a pity for those ships that departed."

"Under the battle of Golden Core Zhenren, those cultivators are likely to be facing calamity."

Someone remarked with great sympathy.

For those cultivators on departing ships, it was simply an unforeseen disaster.

Originally, they could return safely to their homes.

Who could have imagined being targeted by Golden Core Zhenren?

It can be said that this time they face a slim chance of survival.

Of course, without Master Zi Yu, it would be certain death.

"It's not a slim chance of survival, but a death sentence."

"It's said that this tribulation isn't just the Red Blood Monster."

"The Red Blood Monster also brought over a hundred Foundation Establishment loose cultivators."

"These Foundation Establishment loose cultivators were mostly criminals wanted by the Profound Celestial Sword Sect."

"They had nowhere to go and could only leave with the Red Blood Monster."

"This time, they followed the Red Blood Monster to score a gain."

"So, many departing ships were intercepted by this group."

Another cultivator spoke solemnly, indicating that most cultivators departing from Fish Dragon Island face certain death.

After all, this tribulation group is completely different from before.

The previous tribulations encountered were scattered forces, with little strength.

But this time, the tribulation is a regiment, equivalent to the full force of a Golden Core influence striking.

It can be imagined what fate awaits those cultivators leaving Fish Dragon Island.

"This is bad, if that's the case, what should we do?"

Many cultivators' expressions changed dramatically.

"This is not something to worry about."

"Though the Red Blood Monster is formidable, our Yiling Island Group is not to be trifled with."

"Especially the five Golden Core on Fish Dragon Island, they won't stand idly by."

"As long as we hide on Fish Dragon Island for a while, the crisis will naturally resolve."

That cultivator spoke solemnly.

"If that's the case, then we are relieved."

Many cultivators relaxed.

They were also very fortunate, luckily, they hadn't left Fish Dragon Island too quickly.

Otherwise, encountering that group of tribulations, they'd face slim survival chances.

"Is this the omen of great calamity?"

"Encountering Golden Core tribulation cultivators unexpectedly."

Hearing these words, Jiang Fan's eyes flickered. Although he had anticipated this event, he was still amazed when it truly happened.

If he had made the wrong choice, perhaps he would also encounter Golden Core tribulation cultivators.

What would happen then would be hard to say.

He hadn't expected that he merely went out to buy some Tier Two Elixir, and encountered such an event.

But Jiang Fan also understood that this was brought by his Life Chart.

Though his Life Chart, Great Blessings Equal to Heaven, indeed brought him overwhelming destiny and countless opportunities, various tribulations followed. This is the so-called intertwining of blessings and calamity.

Tribulations and opportunities are both companion phenomena.

Often the greatest opportunities are born from the greatest tribulations.

This is also unavoidable.

So, in a way, he is also somewhat of a jinx; wherever he goes, tribulations frequently occur.

No, perhaps it can't be said like that.

Presumably, even without Jiang Fan, these tribulations would still appear, and happen as they should.

He was merely drawn to the destiny of these tribulations, which led him to the Yiling Island Group.

"If I leave at dusk, there may be opportunities."

"Moreover, it's an auspicious sign."

"I wonder what opportunity it might be."

Jiang Fan rubbed his chin, feeling very curious.

Clearly, choosing a different time to leave leads to different outcomes.

Leaving at noon is an ominous sign, a death tribulation.

But leaving at dusk, it's auspicious and brings opportunities.

A single thought differentiates heaven from hell.

However, he didn't think for too long.

Soon, as the sun set, evening arrived swiftly.

At this time, most of the cultivators on Fish Dragon Island dared not leave.

Basically, they stayed on the island, waiting quietly for the Golden Core Zhenren battle to determine a victor.

Before a winner is determined, if they leave, they are simply seeking their own demise.

Whoosh!

However, Jiang Fan was different. His figure flashed, concealing his breath, silently leaving Fish Dragon Island.

Following the direction suggested by the Fortune-Telling Talisman, he flew southeast.

Along the way, he saw almost no cultivators.

The sea seemed endless.

Only occasionally did he see fragments of ships on the sea and a lot of blood.

There were even bodies floating on the sea.

It seemed that this battle was very fierce, affecting hundreds of kilometers around.

Fortunately, this was the sea.

If it were on the mainland, who knows how many mountains would be destroyed.

He didn't know how many kilometers he flew.

Suddenly, Jiang Fan arrived at a distant desolate island.

He instinctively realized that the opportunity indicated by the Fortune-Telling Talisman must be here on the desolate island.

Whoosh!

Instantly, Jiang Fan's figure flashed, his Perfection Level Conceal Breath Talisman collected all his breath, he silently landed on a mountain.

He saw a group of Foundation Establishment cultivators nearby, dressed in black robes, surrounded by killing intent and ferocious aura, as if they were stained with countless people's blood.

The ground was full of pits and scattered stones.

Undoubtedly, these black-robed Foundation Establishments were Red Blood Monster's subordinates.

They had chased other Foundation Establishment cultivators all the way to this desolate island.

After a fierce battle, they finally killed all cultivators from Black Shark Island.

Though they were quite injured, it was all worthwhile.

"Haha, they're definitely country bumpkin cultivators."

"With this level of strength, they dare to contend with us, simply seeking their own demise."

"Isn't it? Despite escaping for so long, we still managed to kill them all."

"Lord Red Blood's plan is simply perfect this time, raiding so many ships, we have truly struck it rich."

"But Lord Red Blood seems to be being besieged by a few Golden Core. How should we deal with it?"

"No need to worry, a few Golden Core are nothing. Previously, Lord Red Blood was besieged by Golden Core from the Profound Celestial Sword Sect, and he easily escaped. Do you think these Yiling Island Group Golden Core can do anything against Lord Red Blood?"

"That's right. Now our most important task is to take all these treasures. We've been pursued by the Profound Celestial Sword Sect for so long, we've exhausted all our resources, now we've finally replenished."

"I think this sea region is simply our paradise. If I had known these cultivators were so weak, I would have started massacring earlier. Later, we may also take the opportunity to raid cultivators from other islands."

"I've heard the Red Whale Island Sea Region is good, their Golden Core Zhenren have fled, perhaps we can plunder some treasures there for a windfall."

Many black-robed Foundation Establishment cultivators discussed among themselves, each delighted.
