

Fortune 371

Chapter 371: Striking It Rich, Gaining a Sixth-Grade Opportunity

"This group of Foundation Establishment Tribulation Cultivators is truly a bunch of scourge."

At this moment, Jiang Fan, not far away, naturally sensed the words of this group of Foundation Establishment Tribulation Cultivators. They had just killed cultivators from Black Shark Island and lost their vigilance, naturally unaware of his presence.

Although he knew long ago that this group of Foundation Establishment Tribulation Cultivators from within the Profound Celestial Sword Sect's territory were lawless and did all kinds of evil, he never expected them to set their sights on the Red Whale Island Sea Region.

Clearly, the reason why he arrived here was inevitably guided by destiny.

The invisible force of destiny led him here to kill these Foundation Establishment Tribulation Cultivators in advance and thus disperse calamity without form.

If he could kill them all, not only would he obtain a lot of treasure while taking advantage of the chaos, but he could also pass through future tribulations in advance, which indeed shows signs of great fortune and grand prosperity.

Undoubtedly, if he had not come by dusk this time, he would definitely have let this group of Foundation Establishment Tribulation Cultivators escape.

Then a calamity would be planted for the Red Whale Island Sea Region.

Might even provoke the Red Blood Monster.

"There are a total of twelve Foundation Establishment cultivators."

"Among them, three are Seventh-Layer Foundation Establishment, five are Sixth-Layer Foundation Establishment, and the rest are early-stage Foundation Establishment."

"They experienced a fierce battle just now, and their spiritual power has been mostly exhausted."

"They're also severely injured."

"Perfect opportunity for annihilation."

Jiang Fan's eyes revealed a trace of cold light.

His cultivation had advanced to the Sixth-Layer Foundation Establishment, and additionally, he was a late-stage Tier Two Body Cultivator. As for combat power, compared to before, his strength had increased tremendously.

Furthermore, they were in the open while he was hidden.

With his premeditated calculations, there was no chance for this group of Foundation Establishment Tribulation Cultivators to escape.

Thinking of this, Jiang Fan had no hesitation. He immediately activated the Primordial Talisman, and stimulated his Life Talisman — the Celestial Thunder Talisman, whose skill level he had cultivated to Perfection Level.

Boom~~~

Under the activation of the Celestial Thunder Talisman, the power of Celestial Thunder between heaven and earth converged, and in the sky above, it seemed to form into a massive black cloud covering the sky.

In the next second, a total of forty-nine Celestial Thunders descended from the sky, targeting these twelve Foundation Establishment Tribulation Cultivators.

They fell with a roar, flashing purple light and filled with a destructive aura.

"Damn, there's an ambush."

"Blast it, who is attacking us from the shadows?"

"Quick, evade, this is the power of Celestial Thunder, can't withstand it directly."

This group of Foundation Establishment Tribulation Cultivators changed their expressions drastically. They had been happily tallying this harvest, even thinking about where to plunder treasures next, dreaming of a wonderful future life.

But now, they sensed a fatal crisis, hair standing on end, their whole bodies trembling.

The problem is they had just experienced a battle, their spiritual power was mostly exhausted.

Attempting to urge the power within their bodies again was already impossible.

Moreover, the speed of the Celestial Thunder Talisman attack was extremely fast.

By the time they noticed, the Celestial Thunders had already struck their bodies.

Boom boom boom!!!

The terrifying purple Celestial Thunders smashed down like missile explosions.

Clearly, the Celestial Thunder Talisman at the Perfection Level commanded not only a large quantity of Celestial Thunders but their power was amplified by more than double.

The Celestial Thunders struck the bodies of the Foundation Establishment Tribulation Cultivators, leaving them utterly defenseless.

In just one strike, five mid-stage Foundation Establishment cultivators and four early-stage Foundation Establishment cultivators couldn't withstand even a second; their whole bodies were pulverized into pieces, turning into a mass of flesh.

Huge pits appeared on the ground, dirt flying everywhere.

A lot of the dirt also turned charred, emitting hot smoke.

Only three late-stage Foundation Establishment Tribulation Cultivators survived.

After all, they had many methods and were still wearing Tier Two High-Grade Magic Robes, forming layers of Spiritual Energy Shields.

However, even so, after blocking this strike, their spiritual power was completely exhausted.

Even if they still had a trump card, it would be of little use.

A cultivator without spiritual power is like a car without gasoline, simply unable to operate.

They also seemed like lambs awaiting slaughter.

"Wait, fellow Daoist, spare us a little life."

"Don't kill us, I know the location of a Nascent Soul Cave Mansion, inside has rare treasures. If you spare me, I can lead you to find this Nascent Soul Cave Mansion."

"I have left a lot of treasure in a place, if you spare me, I will definitely offer all the treasures."

These three late-stage Foundation Establishment Tribulation Cultivators finally saw Jiang Fan in the distance. They were so frightened their liver and guts split, continuously begging for mercy, trying to get Jiang Fan to spare their lives.

But how could Jiang Fan be swayed by the words of these three Foundation Establishment Tribulation Cultivators?

After all, these three Tribulation Cultivators were full of lies, hardly any truth in their words.

There's a high probability that these words were all falsehoods, their purpose only to save their lives and delay time.

Even if by some minor chance their words were true, he wasn't interested at all.

With such vicious enemies, it's better to eliminate them as soon as possible.

Allowing them to live one more second poses a great threat to himself.

"Go die."

Jiang Fan once again activated the Cyan Lotus Earth Fire Talisman on himself, conjuring cyan fire lotus bullets, and blasted towards these three Foundation Establishment Tribulation Cultivators.

Bang~~

In an instant, this force struck the three Foundation Establishment Tribulation Cultivators, easily piercing their bodies.
