

## **Fortune 372**

### Chapter 372: Striking It Rich, Gaining a Sixth-Grade Opportunity\_2

The next second, their bodies immediately burst into flames.

It only took a moment, and these three late-stage Foundation Establishment Tribulation Cultivators couldn't even let out a scream before being burned to ashes, completely disappearing from this world.

"Not bad."

Jiang Fan felt quite satisfied with his method.

Even though he easily killed this group of Foundation Establishment Tribulation Cultivators, it was definitely a big advantage; if these cultivators hadn't gone through a battle and consumed most of their spiritual power, it wouldn't have been so simple.

But this also owed to his powerful combat strength.

In an instant, he exterminated them, leaving these Foundation Establishment Tribulation Cultivators with no chance to retaliate.

Otherwise, if they had managed to alert Red Blood Monster, some complications might have arisen.

Overall, this battle was quite perfect.

Not only was a future threat eliminated, but he also gained a wealth of benefits, achieving multiple goals at once.

"Hit it big, hit it big, this time I've really hit it big."

"Taking down so many Tribulation Cultivators, how many treasures did I actually obtain?"

"Master, your combat power is becoming more monstrous."

Ten Thousand Transformations Pill Furnace exclaimed in admiration.

It felt that with Jiang Fan's current combat power, even late-stage Foundation Establishment Cultivators couldn't be his match.

According to the current battle, it hadn't even showcased one-tenth of its master's combat power.

Even in the Ancient Era, its master was likely a Daoist of those Divinity Transformation Sects, ferocious beyond measure.

"Just testing the waters."

Upon hearing this, Jiang Fan spoke modestly.

To him, this was nothing significant, as his ambitions were far-reaching.

Mere Foundation Establishment cultivators were not worth mentioning at all.

His grandest goal was to achieve immortality.

Currently, he was only a small Foundation Establishment Cultivator, still far from his goal.

Boom~~

At that moment, a message came from the depths of Jiang Fan's consciousness sea: "You made a move to kill a group of vicious Foundation Establishment Tribulation Cultivators, resolving a future calamity early, survived a life-or-death ordeal, and gained fifty thousand Luck Points and one Sixth-Grade Opportunity."

What?!

Upon perceiving this information, Jiang Fan's eyes immediately lit up, feeling very excited.

He hadn't expected to gain fifty thousand Luck Points.

This wasn't a small number.

Though he had experienced quite a few ordeals before, he hadn't received so many Luck Points.

Evidently, these Foundation Establishment Tribulation Cultivators had quite a bit of destiny on them.

If it weren't for him, they would likely continue to wreak havoc for a long time.

They might even lead to the deaths of many cultivators.

Unfortunately, they encountered him, which sealed their fate.

Even their treasures and destiny were seized by him.

This was their karma as Tribulation Cultivators.

After all, walk by the river long enough, and your shoes will get wet.

"Is the Sixth-Grade Opportunity in these Foundation Establishment Tribulation Cultivators' Storage Bags?"

Jiang Fan's eyes flickered.

He waved his hand, immediately collecting all the Storage Bags on the ground and placing them inside the internal world of Exquisite Tower.

Nowadays, he hardly used Storage Bags anymore, preferring the Exquisite Tower.

To him, Exquisite Tower was a super Storage Bag, capable of storing an immense amount of items.

Moreover, as an ancient treasure, it could integrate into his body.

Other cultivators couldn't detect where he stored his treasures.

"Master, I think we should hurry and get out of here."

"These Foundation Establishment Tribulation Cultivators have a Golden Core Zhenren behind them."

"If the opponent finds out, we'll definitely be in big trouble."

At this moment, Ten Thousand Transformations Pill Furnace reminded, always worried that Red Blood Monster might come.

After all, the opponent was a Golden Core Zhenren, far surpassing Foundation Establishment, a force his master couldn't resist now.

"Mm-hmm."

Jiang Fan nodded, unconcerned about Red Blood Monster coming.

Because that guy was certainly being chased by Black Shark Island's Golden Core and Fish Dragon Island's Golden Core, likely unable to escape for the time being, and could not come here so quickly.

Moreover, being a notorious criminal, he likely wouldn't care much about his underlings.

Even if these Foundation Establishment Cultivators died, the opponent wouldn't take revenge.

The Fortune-Telling Talisman already confirmed this.

Coming here at this time was a sure sign of great fortune.

Not only could future hidden dangers and calamities be resolved, but he could also obtain opportunities.

Even so, he didn't plan to stay in this place for long.

Boom~~

Thinking of this, Jiang Fan used the Cyan Lotus Earth Fire Talisman, instantly burning the corpses to ashes, thoroughly destroying the evidence.

This way, no one could find him through traces left by the corpses.

Swoosh!

He concealed his aura, activated the power of the Light Body Talisman, and quickly left the area.

In no time, he swiftly exited this sea region, as if he had never been here.

.....

Meanwhile, in the Yiling Island Group Sea Region, on a barren island.

Numerous cultivators appeared on the barren island.

Among them was a Golden Core Zhenren, none other than Red Blood Monster.

Although Master Zi Yu united other Golden Core Zhenren to try to kill Red Blood Monster, Red Blood Monster still managed to escape.

After all, Red Blood Monster had previously evaded the pursuit of Profound Celestial Sword Sect, making it nearly impossible to take him down.

At this time, he also sensed that dozens of his Foundation Establishment underlings had fallen.

After all, each of his Foundation Establishment cultivators had lit a Life Lamp.

Once dead, the Life Lamp would extinguish.

Now, with dozens of Life Lamps extinguished at once, it meant these Foundation Establishment underlings were entirely wiped out.

"How did so many Foundation Establishments die all at once?"

"Who exactly killed them?"

"Did they encounter a Golden Core Zhenren?"

Red Blood Monster frowned, filled with doubt.

Because only a Golden Core Zhenren could kill dozens of Foundation Establishments at once.

Aside from a Golden Core Zhenren, he couldn't think of anyone capable of doing this.

Frankly, he was just an outsider.

He wasn't very familiar with the Yiling Island Group, and he didn't know how many Golden Core Zhenren existed in this sea region.

"Initially, I thought this sea region was just a rural area with few strong individuals."

"Unexpectedly, so many Golden Core Zhenren appeared at once."

"It seems staying here isn't a wise choice."

Red Blood Monster's eyes flickered.

According to his previous plan, he could have looted several ships, taking the opportunity to gather a large amount of treasure.

Thus, they could have made a great profit.

Then, seizing the moment when the Golden Core Zhenren of this sea region hadn't reacted, they would vanish.

No one expected one ship to hide a Golden Core Zhenren.

This forced him into a battle with that Golden Core, throwing all plans into chaos.

Although his underlings did seize a lot of treasure, it was still far less than planned.

More importantly, now dozens of Foundation Establishment underlings had fallen.

Suspicion arose that they died at the hands of a Golden Core Zhenren.

He increasingly felt that the Yiling Island Group seemed ordinary, but within it were hidden talents, with deeper waters than imagined.

If he continued to stay here, who knows what might happen.

"Enough, enough."

"This place is still too close to Profound Celestial Sword Sect."

"Continuing to stay might lead to unforeseen mishaps."

"If any faction colludes with Profound Celestial Sword Sect, Golden Core Zhenren might come."

"It's better to leave quickly."

Red Blood Monster immediately decided.

It could be said that the fall of these Foundation Establishment cultivators changed his initial plan.

Otherwise, he planned to stay in the Yiling Island Group, maybe even change identities and hide away.

But after successive setbacks, he felt this sea region was complex.

Additionally, he had continuous bad luck, which made him feel uneasy.

Therefore, Red Blood Monster decided it was better to leave as quickly as possible.

As for those dead Foundation Establishment underlings, he didn't bother with them.

Only the living were fit to be his subordinates.

Those who died were merely dust, not worth mentioning.

Swoosh swoosh swoosh!!!

In an instant, Red Blood Monster and his group wasted no time, driving a ship and swiftly departing, taking the plundered resources with them, with no intention of staying.

However, the impact they caused also affected this sea region.
