Chapter 375: Life Talisman: Five Elements Array-Breaking Talisman

"The Spiritual Power is much stronger than before."

At this moment, Jiang Fan meticulously sensed the changes after advancing to the Seventh-Layer Foundation Establishment.

The most significant change was naturally the enhancement in Spiritual Power, which increased by a whole fifty percent compared to before.

Originally, by cultivating the Mixed Element Talisman Scripture, the Spiritual Power within him was already quite immense.

Now it's increased by another fifty percent, the depth of which is simply beyond imagination.

Furthermore, the increase in Spiritual Sense, which also rose by about fifty percent.

One could say, although the Sixth-Layer and Seventh-Layer Foundation Establishment differ by merely a small realm, the difference in combat strength is substantial, akin to the difference between an amateur and a professional.

He could perceive that the power of each Life Talisman on him had substantially increased.

It was truly an all-around enhancement.

Rumble~~~

The Primordial Spiritual Power within his body flowed through the depths of his meridians, already unlocking seventy-three meridian channels.

The vast Spiritual Power seemed to form like a river, creating a Spiritual Power circulation within his body.

Running one cycle after another.

"Advanced to the Seventh-Layer Foundation Establishment, now it seems I can carve a new Life Talisman."

Jiang Fan clenched his fists.

For him, gaining another Life Talisman is equivalent to having an additional trump card.

It would undeniably bring a substantial increase in his strength.

Of course, choosing which Talisman to make into a Life Talisman is also crucial.

"The next Life Talisman should be the Five Elements Array-Breaking Talisman."

Jiang Fan squinted his eyes.

To be honest, arrays are of utmost importance in the Cultivation Realm.

No matter where one goes, they will surely encounter arrays.

If one does not understand how to break them, then they can only stare helplessly.

For instance, when visiting some relic cave dwellings, surrounded by numerous restriction arrays, if one doesn't know the array-breaking technique, then treasures are in vain even if they're before one's eyes.

Thus, the importance of the Array-Breaking Talisman lies in this spot.

If one masters the Array-Breaking Talisman, breaking numerous arrays in the Cultivation Realm becomes rather simple.

However, the types of Array-Breaking Talismans are many, encompassing all.

After all, the arrays existing in the world are indeed vast, and it's impossible for one kind of Array-Breaking Talisman to break billions of arrays.

If such an Array-Breaking Talisman truly existed, then its level would be exceedingly high.

Ordinary cultivators could not possibly obtain it.

This is why numerous types of Array-Breaking Talismans exist in the world.

Among them, the Five Elements Array-Breaking Talisman is renowned.

Because once refined successfully, it can break arrays containing the Power of the Five Elements.

As long as the arrays contain the Power of the Five Elements, this Talisman has the opportunity to break them.

Of course, in the Cultivation Realm, there are also some special arrays, such as arrays containing the Power of the Stars, arrays containing the Power of Space, arrays containing the Power of the Moon, and so on.

These are not ones the Five Elements Array-Breaking Talisman can handle.

Nonetheless, even so, the Five Elements Array-Breaking Talisman can break numerous arrays in the Cultivation Realm, which is already quite remarkable.

"The reason the Five Elements Array-Breaking Talisman can break arrays is that this Talisman can gather the Power of the Five Elements, easily integrating into the array barrier, and even into the Spirit Vein."

"Then, this Talisman can follow the route of Spiritual Qi, reach the core of the array, and each Array Hub."

"Thus, it can disrupt the Spiritual Qi of this array, thereby shattering the Grand Array."

"However, refining the Five Elements Array-Breaking Talisman is not that easy."

"Even a Tier Two Upper-Grade Talisman Master finds it difficult to refine, unless one becomes a Tier Three Rune Master."

"The difficulty of refining Talismans is great, let alone engraving them into a Life Talisman."

Jiang Fan clenched his fists.

He knew the difficulty of engraving the Five Elements Array-Breaking Talisman was not comparable to previous Talismans.

But he possesses a large number of Luck Points, which can enhance his comprehension, so he believes engraving the Five Elements Array-Breaking Talisman successfully won't be too major a problem.

Moreover, once successful, he can break many arrays containing the Power of the Five Elements in the world without needing to comprehend numerous arrays.

If combined with his Innate Divine Techniques, Heavenly Son's Qi Observation, he could break many arrays in the world.

After all, destruction is much easier than construction.

It's like building a city versus destroying a city; the difficulty of the two is evident.

Rumble~~

Thinking of this, Jiang Fan didn't hesitate, immediately spending a large number of Luck Points within him.

A surge of mysterious energy instantly entered the depths of his soul.

This also made him enter a meditative state, devoid of happiness and sorrow, his comprehension greatly enhanced.

It seemed that at this moment, the external world could not influence his emotions.

In the depths of his Elixir Field and Sea of Qi, the Primordial Talisman was also continuously rotating.

Lines of Talisman markings began to appear on the surface of the Primordial Talisman.

Undoubtedly, the complexity of the Five Elements Array-Breaking Talisman was simply beyond imagination, as if containing an entire array.

Should any Talisman marking be incorrect, it would result in wasted effort, even damaging the Primordial Talisman.

Thus, in the history of the Primordial Talisman Sect, many disciples dared not engrave the Five Elements Array-Breaking Talisman.

Even if they truly wanted to engrave it, they certainly needed to cultivate to a higher realm to possibly succeed.

However, for Jiang Fan, this was not a problem at all.

Time passed by without notice.

A completely new Talisman emerged atop the Primordial Talisman.
