

Fortune 380

Chapter 380: Escaping Yiling Island Group, Avoiding Disaster_2

To know, this is a Nascent Soul Ancestor; no matter where placed, they are a significant figure.

Entirely capable of establishing a thousand-year power.

The Yiling Ancestor in the past was only a cultivator of this level.

What virtue or ability does he have to encounter such a presence?

Unfortunately, the other party did not come with good intentions, but with malice.

As a disciple of the Red Whale Daoist, it is highly likely he cannot avoid this disaster.

The other party certainly won't spare him.

"Interesting, have you obtained the Nascent Soul Spiritual Object?"

"It seems you indeed gained some fortune recently."

"But do you think this will allow you to escape my control?"

"Simply wishful thinking."

"Even if you hide to the ends of the earth, I will drag you out."

The mysterious Nascent Soul Cultivator sneered coldly.

Clearly, his purpose in coming to the Yiling Island Group this time is Yu Ruolin.

This woman took a treasure.

He must retrieve it at all costs, absolutely not sparing her.

Previously, he tracked for a long time, finally discovering her traces in the Yiling Island Group.

Unfortunately, when he arrived here, he found Yu Ruolin had long left.

This made him incredibly furious.

Each time, he was one step behind.

"By the way, are all the Foundation Establishment cultivators of Red Whale Island influence here?"

The mysterious Nascent Soul Cultivator inquired.

"Reporting to Ancestor, most of the Foundation Establishment cultivators of the Red Whale Island influence are here."

"But only one Honored Guest Elder named Jiang Fan."

"The other party left seven or eight days ago; it is said to have gone to Xuanjian City to purchase treasures, so we couldn't grab them."

"But besides Jiang Fan, the other Foundation Establishment cultivators were captured."

A Golden Core Cultivator promptly responded.

In fact, even before arriving in the Red Whale Island Sea Region, they began capturing all Foundation Establishment cultivators in this area.

They won't spare anyone associated with Red Whale Daoist or Yu Ruolin.

Better to kill wrongly than to let anyone go.

This is their modus operandi.

As expected, numerous Foundation Establishment cultivators were clueless about what transpired and became prisoners.

"Went to Xuanjian City? Profound Celestial Sword Sect's territory?"

"That place is full of sword fanatics."

"Forget it, I'll spare that fellow temporarily."

"But if the other party returns, capture him immediately."

"That guy might know where Red Whale Daoist is."

The mysterious Nascent Soul Cultivator said solemnly, revealing a trace of dread on his face.

Evidently, he is wary of the Profound Celestial Sword Sect.

After all, in the past, he suffered a great loss from this Nascent Soul Sect.

He doesn't wish to step into this sect's territory again.

Even if he wants to capture the now-departed Foundation Establishment cultivator, he won't risk it.

Moreover, it is just a minor Honored Guest Elder, hardly significant.

Highly likely, the other party knows nothing.

So sparing them isn't too problematic.

Of course, if the other party foolishly returns here, he will capture and torture them.

"Ancestor, what about the other Foundation Establishment cultivators and Golden Core cultivators in this sea region, should we capture them too?"

Another Golden Core Cultivator immediately asked.

He thought maybe besides the Red Whale Island Foundation Establishment cultivators, other Golden Core Influence cultivators might know something about Red Whale Daoist's whereabouts.

If they capture these cultivators and interrogate them, they will surely obtain more information.

"Capture them all."

"Who knows, they might know something too."

"And even if they know nothing, they can help us find Yu Ruolin."

"After all, finding two purposely hiding Golden Core Zhenren needs many hands."

The mysterious Nascent Soul spoke directly.

To him, all cultivators in this sea region are nothing more than ants.

He could easily suppress them with a flick of his hand, effortlessly.

Additionally, he wants to consolidate the local forces, mobilizing them to help find Yu Ruolin.

After all, it would be like finding a needle in a haystack if he were acting alone.

Suddenly, the Yiling Island Group is faced with unprecedented upheaval.

The arrival of this mysterious Nascent Soul has completely altered the structure of this sea region.

...

Meanwhile, having reached the territory of the Profound Celestial Sword Sect, Jiang Fan immediately received a message from a Communication Talisman sent by Steward Yang He secretly, informing him of recent events.

After all, the other party was long under his Enchantment Talisman, becoming his loyal subordinate.

So whenever something happened, it would be reported immediately.

This counts as his spy on Fire Copper Island.

Looking at it now, this spy indeed brought him considerable benefits.

"What? A mysterious Nascent Soul suddenly descended upon Red Whale Island?"

"And already captured all Foundation Establishment cultivators."

"If Su Weiwei and I hadn't run, we would've surely been captured as well?!"

Seeing this message, Jiang Fan's expression changed.

Previously he speculated what the sudden calamity might be; now it became clearer.

Turns out the disaster stemmed from a Nascent Soul cultivator.

No wonder it was a great omen.

If he had stayed cultivating on Fire Copper Island, he would likely be a prisoner to the Nascent Soul cultivator.

Even though Cao Rui and other Foundation Establishment cultivators are alive for now, who knows what will happen next.
