

## **Fortune 381**

### Chapter 381: Escape from Yiling Island Group, Avoid the Calamity\_3

In short, once in the hands of a Nascent Soul, one's life and death are no longer in their own control.

Thinking of this, he felt immensely relieved.

Fortunately, the Fortune-Telling Talisman gave an early warning; otherwise, he would surely be in a life-and-death dilemma now.

No matter how many trump cards he had, it would still be difficult to resist the power of a Nascent Soul Cultivator.

After all, compared to Nascent Soul Cultivators, he was still far behind, unable to contend with them.

"Wait, the captured Foundation Establishment Cultivators aren't just from Red Whale Island."

"Foundation Establishment Pills and Golden Cores from other Golden Core Influences were also captured."

"What on earth does that Nascent Soul Cultivator intend to do? What is their origin?"

Jiang Fan's pupils contracted.

Evidently, the third message of the Fortune-Telling Talisman also came true.

If he had only left Fire Copper Island but not the Yiling Island Group, he would likely have been unable to avoid this disaster and would have been captured.

Only by escaping all the way to the territory of the Profound Celestial Sword Sect could he completely avoid this calamity.

It can only be said that fortunately, he ran fast and without any hesitation.

Otherwise, he too would have surely been captured by that Nascent Soul Cultivator.

"Husband, what happened?"

At this time, Su Weiwei noticed her husband's expression and asked.

She felt that something serious must have happened.

Otherwise, her husband wouldn't show such an expression.

"A major event occurred on Red Whale Island."

Jiang Fan didn't hide anything and recounted the incidents on Red Whale Island and the Yiling Island Group.

"What? A mysterious Nascent Soul abruptly descended on Red Whale Island?"

"Is the purpose to find the Red Whale Daoist?"

"Almost all Foundation Establishment Cultivators were captured?!"

"This is too dangerous."

"If we had left a moment later, we would likely have faced dire consequences."

Su Weiwei felt immense relief.

Even though she knew her husband could always avoid disasters ahead of time, it was the first time it was this perilous. Just one step off and they would have been doomed.

Moreover, there was no sign of such a calamity.

"Don't worry."

"Since we avoided this calamity, that Nascent Soul Cultivator can't do anything to us."

"But during this period, we need to stay within the territory of the Profound Celestial Sword Sect."

"It's probably safer to stay here."

Jiang Fan reassured.

It seemed extremely dangerous, but it was only a false alarm.

To the Nascent Soul Cultivator, he was just a minor Foundation Establishment.

Even though he had long escaped, the other party likely wouldn't pursue him relentlessly.

After all, he had no connection or enmity with the other party to begin with.

"But husband, they say the Profound Celestial Sword Sect is forcibly recruiting Loose Cultivators?"

"Is the recruitment over?"

Su Weiwei was worried about this point. She feared that after returning to the Seven Stars Peak, they would still be forcibly recruited by the Profound Celestial Sword Sect.

If that were the case, it would be like escaping the wolf's den only to enter the tiger's lair.

"So much time has passed."

"The recruitment by the Profound Celestial Sword Sect has likely ended."

"After all, the war between the two Nascent Soul Sects lasting too long is not good for either side."

"Of course, it's not something we can be 100% sure of."

"We can go to Xuanjian City first to gather some information before deciding."

Jiang Fan said in a solemn tone.

"Okay."

Su Weiwei nodded.

She also felt that they needed to gather information in advance, and if anything seemed off, they should escape immediately.

Boom~~

At this moment, a message arrived in the depths of Jiang Fan's sea of consciousness: "You timely left the Yiling Island Group, avoiding a life-and-death disaster and escaping the capture of a Nascent Soul Cultivator. You have gained fifty thousand Luck Points and a Seventh-Grade Opportunity."

Evidently, after passing this calamity, the reward immediately descended.

A massive amount of Destiny was once again infused into him.
