

Fortune 385

Chapter 385: Once Again Seeking Fortune and Avoiding Evil, Continental Ley Line Tremors 2

[Realm: Seventh-Layer Foundation Establishment (80%)]

[Profession: Tier Two Upper Grade Talisman Master (30%)]

Without a doubt, over the past six months, all aspects of his abilities have seen significant improvement.

After cultivating the Earth Escape Talisman to the Perfection Level, his internal Primordial Spiritual Power also saw tremendous growth.

The progress of the Seventh-Layer Foundation Establishment has reached 80%.

The reason for such rapid progress naturally stems from the Tier Two Spirit Medicine, the Nine-Curled Spirit Ginseng, which he obtained earlier.

This Tier Two Spirit Medicine contains immense medicinal power.

After being devoured and digested by Jiang Fan, it quickly transformed into the Primordial Spiritual Power within his body.

Even though cultivating the Mixed Element Talisman Scripture requires more resources compared to the average Foundation Establishment Cultivator,

this Tier Two Spirit Medicine is enough to save him a lot of painstaking cultivation time.

This clearly shows the importance of cultivation resources for a cultivator.

With enough resources, even someone with a low-grade spirit root can progress rapidly.

The cultivation speed could even equal that of a Celestial Spirit Root cultivator without resource assistance.

"Unfortunately, raising the skill level of other Life Talismans is still difficult."

Jiang Fan stroked his chin.

Currently, he only has one hundred and ten thousand Luck Points left.

After all, he spent quite a lot of Luck Points to enhance the skill level of the Earth Escape Talisman.

Yet, for his other Life Talismans,

such as the Fortune-Telling Talisman, Five Elements Array-Breaking Talisman, Ten Thousand Swords Return to the Sect Talisman, and so on, raising their skill levels is not easy.

Among them, the Ice Talisman seems the easiest to enhance.

He believes that elevating the skill level of this Life Talisman to the Perfection Level is just a matter of time.

Rumble~~~

Suddenly, there's a strong tremor from the ground, affecting a radius of several thousand kilometers.

All cultivators up and down Seven Stars Peak can feel this vibration.

Even the ground is cracking, with fissures appearing everywhere.

More astonishingly, even the spirit vein is in disarray, making the spiritual qi extraordinarily fierce.

If anyone cultivates at this moment and absorbs this violent spiritual qi, they're bound to suffer injuries.

"What's going on?"

Jiang Fan sensed the anomaly and furrowed his brows.

He didn't know what was happening.

But such an earthquake and spirit vein disruption are quite unusual.

Whoosh whoosh whoosh!!!

Immediately, his figure flashed and he flew into the air.

Wei Song, Chang Lisheng, Yu Kelian, Lian Minglan, and other Foundation Establishment cultivators also flew out of their caves.

"This seems to be a spirit vein tremor."

"Opportunity, it's a huge opportunity."

Elder Alchemist Wei Song's face instantly lit up with joy, feeling incredibly delighted.

"What do you mean? Why is a spirit vein tremor a great opportunity?"

"Indeed, what is this so-called spirit vein tremor?"

Chang Lisheng and others were puzzled.

"It's normal for you not to understand."

"Spirit vein tremors seldom appear, sometimes occurring once every hundred years or even several hundred years."

"The cause of its appearance is unknown."

"But every occurrence causes intense tremors and can affect the entire Southern Continent, impacting every spirit vein on the continent, causing spiritual qi disruption."

"In severe cases, it may trigger spiritual qi storms, severely harming cultivators in seclusion, possibly leading to their death as fallen demons."

"After all, overly violent spiritual qi can easily destroy a cultivator's internal meridians."

"In some special forbidden grounds, similar conditions arise, making them unsuitable for cultivators."

Elder Alchemist Wei Song explained what a spirit vein tremor is, a massive spirit vein disturbance affecting the entire Southern Continent, with no known cause.

But each occurrence causes varying degrees of destruction.

"But why do you call it an opportunity?"

Yu Kelian couldn't help but ask, intrigued by the so-called opportunity.

Even the Elder Alchemist is so excited, indicating it's not an ordinary opportunity.

"It's because after a spirit vein tremor, the ground cracks open."

"Some hidden spiritual objects deep within the earth and spirit veins will automatically emerge."

"If luck is favorable, there's an opportunity to obtain these rare spiritual objects."

"Every time a spirit vein tremor occurs, many cultivators benefit."

"Even some loose cultivators can soar to great heights because of it."

"It's said that Daoist Yunlai, a Golden Core Zhenren from the Ten Thousand Beasts Mountain Range, gained a rare spiritual object from a spirit vein tremor, obtaining great benefits and laying the foundation for his Golden Core."

Elder Alchemist Wei Song exclaimed, showing a look of envy.

What?!

With these words, Yu Kelian and the others glanced at each other, utterly ecstatic.

They hadn't imagined a spirit vein tremor would present such an opportunity.

If they're lucky enough, wouldn't they also have a chance to soar to the skies?!

"But most cultivators can't gain any benefits."

"Because the location of the spiritual objects is random, nobody can capture the suddenly emerging items."

"Even if these items do emerge, they might be taken by nearby cultivators."

"Very few cultivators genuinely gain opportunities."

"But you can try your luck; who knows, the opportunity might fall on you."

Elder Alchemist Wei Song smiled slightly.

He believes this spirit vein tremor might bring some opportunities.

But the cultivators who genuinely receive opportunities are few and far between.

You can count them on one hand.

Honestly, this is his second encounter with a spirit vein tremor.

Problem is, during his first encounter, he didn't obtain any treasure.

Not only him, but most cultivators also returned empty-handed.

However, this doesn't prevent him from trying his luck.

After all, there's no cost involved.

Even if unsuccessful, nothing is lost.

"It certainly is an opportunity."

"Seems we need to wander nearby to see if any spiritual object appears."

Chang Lisheng and the others replied immediately.

They feel they shouldn't miss this opportunity.

If they miss it, they might regret it for life.

"A spirit vein tremor? Spiritual objects emerging?"

"Indeed, since returning to Seven Stars Peak, opportunities have come one after another."

Jiang Fan rubbed his chin.

He didn't think that shortly after returning to Seven Stars Peak, he'd encounter such an event.

Obviously, it's due to his massive amount of Luck Points.

Otherwise, if he were still at the Yiling Island Group, he might miss this opportunity.

Or perhaps, the Yiling Island Group doesn't have many opportunities in the short term.

Only by returning near Seven Stars Peak does he have a chance to obtain numerous treasures.

Thunder~~~

Instantly, he sensed the Fortune-Telling Talisman deep within his Elixir Field and Sea of Qi start to tremble, as a message instantly entered his Sea of Consciousness.

"With the spirit vein trembling, opportunity reveals itself, decide your path, fortune and danger lie with the individual."

"At sunset, arrive south-west at Cuiyun Peak; you will gain opportunity, experience no danger, and find great fortune."

"At sunset, arrive north-east at Xingyue River; you will gain opportunity but encounter hidden peril with minor fortune."

"At noon, arrive north-west at Spirit Smoke Valley; you will gain opportunity but with associated danger, it is greatly perilous."

"Traveling in other directions elsewhere brings no gains, it is average."

Immediately, a multitude of information from the Fortune-Telling Talisman was obtained by Jiang Fan.

He felt immense joy.

Truth be told, other cultivators seeking opportunities can only rely on luck.

But for him, with the help of the Fortune-Telling Talisman, he can easily find the spiritual objects about to emerge, and locate the opportunities soon to appear.

No need to wander aimlessly like a headless fly.

"So, three opportunities might appear nearby."

"One opportunity at Spirit Smoke Valley, but accompanied by danger, risking one's life."

"Such a place is naturally not to be visited."

"Though an opportunity can be gained at Xingyue River, the danger is also considerable, fraught with hidden perils."

"Seems only Cuiyun Peak remains to be visited."

"Visiting this place brings no danger, and it's a sign of great fortune."

Jiang Fan stroked his chin.

Without a doubt, these messages have already provided guidance for his future actions.

After all, he is just one person, unable to visit every location, limited in resources.

So for now, he can only head to Cuiyun Peak.

Going to this place brings no danger, while gaining a significant opportunity.

Other locations come with various risks.

There's no need for him to venture there.
