

Fortune 399

Chapter 399: Sub-Immortal Artifact Gate of the Void, Void Realm! _2

...

Several hours later.

Jiang Fan finally returned to Seven Stars Peak and entered the quiet chamber.

None of the cultivators around Seven Stars Peak knew he had left here.

This was the result he wanted to see.

After all, he naturally didn't want what he did to be known by other cultivators.

This way, any trouble wouldn't involve him.

Because those demon cultivators are vengeful and cruel, if they know he killed those demon cultivators, he might face retaliation.

"By the way, what exactly is this Bronze Token?"

At this moment, Jiang Fan took out the Bronze Token he had just found.

He activated the power of his spiritual sense, trying to find the catch within it.

However, no matter how he used spiritual sense scanning, he couldn't detect what was wrong with this Bronze Token.

But since this is a Third-Grade Opportunity, it definitely isn't as simple as imagined.

"If common means don't work, then let's try the power of Destiny."

Jiang Fan clenched his fist.

Thinking of this, he immediately consumed a large amount of Luck Points from his body.

Ten thousand Luck Points, twenty thousand Luck Points, thirty thousand Luck Points...

A large amount of Destiny transformed into a mysterious energy, infusing into this Bronze Token.

At first, this Bronze Token showed no reaction.

But as the energy from Destiny increased, the runes on the Bronze Token seemed to light up, emitting golden light, extremely dazzling.

Boom~~

With a full infusion of a hundred thousand Luck Points, Jiang Fan didn't care about the heartache anymore, after all, this was just the Destiny he got earlier, he can obtain it again in the future.

Currently, the most important thing is to know what this Bronze Token actually is and why it is a Third-Grade Opportunity.

In the next second, every rune on the Bronze Token lit up as if the energy inside was fully activated, and a thread of soul power from Jiang Fan instantly entered deep inside the Token, easily refining the internal core.

Dong!

Immediately, the Bronze Token flew up, standing in the air, suddenly transforming into a Bronze Gate, with countless ancient talismans and inscriptions on the door frame, like an ancient portal existing for ages.

Gate of the Void!

Jiang Fan's eyes flashed with a trace of brilliance, and a message surged from the depths of his sea of consciousness, which was about this Bronze Token, no, it should be about the Bronze Gate.

Apparently, the Bronze Token was just its disguise previously.

Its true form is the Gate of the Void.

And its ability is simple, which is void teleportation.

It can teleport to any place through this portal, even crossing realms.

Unfortunately, this Gate of the Void suffered severe damage, and the artifact spirit inside has died.

Currently, it only retains basic functionality.

It can only perform random teleportation.

Meaning, after opening the Gate of the Void, the teleport location is uncertain.

It might only teleport a few hundred meters, a few kilometers, or possibly billions of kilometers, even to other worlds.

In short, everything is random.

However, once the teleportation is successful, a spatial coordinate can be left at the local site.

This way, it can perform fixed teleportation in the future.

But this also has a huge drawback, which is the need to consume a substantial amount of Spirit Stones.

Especially the first-time teleportation activation, the Spirit Stones needed are simply immeasurable.

To be honest, if the Gate of the Void were intact, it wouldn't just be a Third-Grade Opportunity.

It might be a First-Grade Opportunity or even more.

"No way, is this the legendary Gate of the Void?"

Just then, the Exquisite Tower exclaimed upon seeing this Bronze Gate, feeling very surprised, it never imagined it could see the Gate of the Void here.

"Do you recognize this Bronze Gate?"

Jiang Fan asked curiously.

"Of course I recognize it."

"This world is named Void Realm."

"Because the power that controlled this world was called Taixu Sect."

"And the sect treasure of Taixu Sect was the Gate of the Void."

"It is said that Taixu Sect relied on this Sub-Immortal Artifact to wage war across various worlds, plundering resources."

"Thus rapidly expanded, with countless disciples."

"Unfortunately, Taixu Sect perished due to a major catastrophe, and the Gate of the Void was breached."

"Afterward, this Sub-Immortal Artifact was lost."

"Countless cultivators have tried to find the Gate of the Void, wanting to restore the former glory of Taixu Sect, but none have succeeded."

"Master, your fortune is so defying that you even found the Gate of the Void?!"

The Exquisite Tower was dumbfounded.

Although it knew its current master's luck was extraordinary, it didn't expect it to be to such an extent that even the legendary Gate of the Void was found, truly unbelievable.

Originally, it felt somewhat wronged being refined by this person.

But now it seems, being refined by the other party might actually be its own fortune.

If this continues, its master may possibly recreate the glory of the Taixu Sect.

"Master, you are really too unbelievable."

"You even obtained the Gate of the Void."

"Perhaps the master is truly favored by heaven and earth."

"Legend has it, this Gate of the Void is a replica of the legendary Immortal Artifact Gate of the Void, merely of Sub-Immortal quality."

"But in the mortal world, it is already considered an invincible Magical Treasure."

"Even though it is in a damaged state now, it is incomparable to other Magical Treasures."

The Demon-Vibrating Bell didn't know what to say, it was completely speechless now.

Because the rank of the Gate of the Void is higher than itself.

When it saw this portal, it felt like a subject seeing an emperor, a natural suppression.

Seemingly inferior from the start.

"This."

The Ten Thousand Transformations Pill Furnace was also stunned.

Because its seniority is quite shallow, it's not very clear about the events that occurred during the Ancient Era.

It doesn't even know what the Gate of the Void is.

But judging from its two companions' tones, it seems to be something extraordinary.

"A replica of an Immortal Artifact?!"

Jiang Fan blinked, not expecting the Gate of the Void in his hand to be so powerful.

However, if it can traverse myriad worlds, having such a capability is indeed peculiar.

After all, in the vast Cultivation Realm, distant travel has hindered countless cultivators.

Even knowing the entire Cultivation Realm comprises four super continents, not many cultivators can reach another continent, most cultivators can only sigh in admiration.

Every time they traverse long distances, cultivators spend significant time and pay a heavy price.

If they can leverage the power of the Gate of the Void to cross regions, the benefits are self-evident.

That the Taixu Sect could become a dominator by relying on this great treasure is indeed reasonable.

"But master, you must be careful."

"You absolutely cannot let the information of the Gate of the Void be leaked."

"Otherwise, it will definitely become a huge trouble."

"It is said that some cultivators who obtained the Taixu Sect's legacy have vowed to restore the Taixu Sect's former glory."

"So they have always been searching for the Gate of the Void."

"If they find out that the master obtained the Gate of the Void, they will certainly come looking."

The Exquisite Tower reminded.

Though the Taixu Sect indeed was destroyed, it left behind quite a bit of legacy.

And the cultivators who obtained these legacies regard themselves as the true descendants of the Taixu Sect.

Naturally, they wish to restore the former glory of Taixu Sect.

But unfortunately, without the aid of the Gate of the Void, restoring the past glory is just a dream.

"I will naturally be careful about this."

"But aren't the strongest beings in the Cultivation Realm merely Divinity Transformation Cultivators?"

"Why does your tone suggest that the strongest back in the Cultivation Realm weren't just Divinity Transformation Cultivators?"

"Could there be even stronger cultivators?"

Jiang Fan asked curiously.

"As far as I know, the original Cultivation Realm was extremely formidable."

"The strength of Divinity Transformation Cultivators was indeed excellent, but far from being the strongest."

"In its heyday, there were even cultivators on the verge of becoming immortals."

"But due to a calamity, and drastic changes in heaven and earth, this world underwent changes."

"Over time, Divinity Transformation Cultivators became the limit of this world."

The Exquisite Tower explained.
