Chapter 404: Spirit Root Transforms, Ascends to Celestial Spirit Root

"There are actually four Heavenly Flowers?"

Jiang Fan clenched his fist.

If he wanted his spirit root to advance to the Celestial Spirit Root level, three Heavenly Flowers would be sufficient.

As for Su Weiwei, with her current high-grade spirit root, she only needed one Heavenly Flower to elevate her to Earth Spirit Root talent.

The remaining Heavenly Flower could be planted in the Exquisite Tower.

If successful, in the future, Heavenly Flowers could be cultivated continuously.

By then, Heavenly Flowers would become a strategic resource controlled in his hands.

"How to use a Heavenly Flower to enhance spirit root talent?"

At this time, Jiang Fan asked the Ten Thousand Transformations Pill Furnace, as it was very knowledgeable about Heavenly Flowers and their uses.

"It's very simple. I can directly refine the Heavenly Flower completely into alchemical liquid."

"Merely consuming this liquid would naturally repair various defects on the master's body."

"Thereby making the master's spirit root talent increasingly perfect."

The Ten Thousand Transformations Pill Furnace said immediately.

It was also quite expectant because previously, the master only had Earth Spirit Root talent, yet his cultivation speed was already formidable.

If he advanced to Celestial Spirit Root talent, it would be extraordinary.

Of course, the effect of the Celestial Spirit Root is not just fast cultivation speed.

The key point is, before promoting to Nascent Soul, there is basically no bottleneck.

As long as the cultivation is sufficient, a breakthrough can naturally be achieved.

This is the terrifying aspect of Celestial Spirit Root cultivators, which cannot be compared to other spiritual root talents.

"I see."

Jiang Fan nodded, feeling quite satisfied.

He patrolled around the cave and found there were no other treasures here.

Clearly, these four Heavenly Flowers are the most precious Heaven and Earth Spiritual Objects in this place.

Moreover, this place is surrounded by celestial thunder, with abundant spiritual qi, making it an ideal place for seclusion cultivation.

If practicing here, there would be no worry of being disturbed by other cultivators.

At the same time, if he wanted to reopen the Gate of the Void, he would need to wait for three or four days.

So this place is quite suitable to become his temporary residence.

Thinking of this, Jiang Fan immediately took out an array plate from himself, the Five Elements Spirit Gathering Array.

This Tier Two array not only has formidable defensive power but also assists in gathering Heaven and Earth spiritual qi.

The only drawback is that it requires a large consumption of spirit stones.

But this is not a drawback of the Five Elements Spirit Gathering Array, but rather a drawback of the cultivator.

Boom~~~

Immediately, the Five Elements Spirit Gathering Array was set up.

A Five Elements Barrier enveloped the surroundings, easily covering this cave area.

Making this area an integral whole.

If enemies from outside wish to enter, they would need to break this barrier array.

Meanwhile, as the Five Elements Grand Array operates, the Five Elements Spiritual Qi from the depths of the spirit vein surges forth, enhancing the concentration of spiritual qi in this region, making Jiang Fan feel invigorated and immensely comfortable.

The next second, he also threw three Heavenly Flowers into the Ten Thousand Transformations Pill Furnace.

Two of them were placed into the internal world of the Exquisite Tower, temporarily for planting.

Then the Ten Thousand Transformations Pill Furnace swiftly refined these three Heavenly Flowers, expelling large amounts of impurities, and golden alchemical liquid appeared inside the furnace, emitting brilliant light and rich fragrance.

It seemed that just by inhaling this fragrance, many ailments on one's body could be eradicated, having the effect of prolonging one's life.

"I wonder what it tastes like?"

Jiang Fan sat cross-legged on the ground, feeling quite expectant.

Without further ado, he immediately swallowed the golden alchemical liquid transformed from the Heavenly Flowers into his stomach.

In an instant, as the golden alchemical liquid entered his stomach, it began to boil rapidly, being swiftly refined, and transformed into an incredible amount of scorching energy.

This scorching energy, in a flash, spread throughout his body.

Not only did it permeate every bit of muscle, every bone, every meridian, it even infused every cell within, continually repairing his flaws.

And this energy was simply sculpting his physique, making his body more perfect.

"So this is the Heavenly Flower?"

"It is a Heaven and Earth Spiritual Object capable of remedying bodily flaws."

"It's indeed an unparalleled treasure that even Nascent Soul cultivators would go crazy for."

Jiang Fan felt an overwhelming excitement.

He realized that Heavenly Flowers not only improved his spirit root talent but also served as a body tempering spirit medicine, perfecting his physique, and rectifying his deficiencies.

If a heavily injured cultivator consumed a Heavenly Flower, they would also recover swiftly.

Rumble~~~

As time passed, this golden energy flowed to the deepest parts of his body, entering his sea of consciousness, seemingly reaching his intrinsic spirit root.

Originally, his spirit root was already considered one of the top in the world.

But even so, it was not perfect.

Only the Celestial Spirit Root is considered truly perfect.

This golden energy infused into his spirit root, causing it to transform, appearing more crystalline, like a piece of crystal without any impurities.

...

In the blink of an eye, five or six days passed.

Jiang Fan stayed in the cave the whole time, refining the energy of the Heavenly Flowers. The energy from three Heavenly Flowers was so immense that his entire body sparkled golden, emanating golden light all over.
