Chapter 407: Innate Divine Techniques: Shrinking Earth into Inches, Gaining Sixth-Grade Opportunity

Another day passed.

Celestial Thunder Valley Cave.

At this moment, after a day of hard cultivation, Jiang Fan has completely familiarized himself with the mysteries of the Celestial Spirit Root.

He has also initially mastered his Innate Divine Technique, the Divine Skill of Shrinking Earth into Inches.

Undoubtedly, this is an unprecedented gain for him.

Indeed, it is a symbol of great fortune, the benefits he received are truly plentiful.

"From now on, I am also considered a Celestial Spirit Root Cultivator."

Jiang Fan sits cross-legged on the ground, feeling very satisfied.

Although it has only been a day, he now understands how much help the Celestial Spirit Root is to him.

Firstly, it's the affinity for Spiritual Qi. As long as he slightly operates his Cultivation Technique, countless Spiritual Qi from between Heaven and Earth will swarm towards him, just like a peerless handsome man attracting innumerable female fans.

Secondly, the efficiency of refining Spiritual Power has improved several times compared to before, as if he possesses a cultivation accelerator on his body. His previous self cannot compare at all.

Lastly, there's the cultivation bottleneck. He has virtually no bottlenecks before promoting to Nascent Soul; as long as his cultivation is sufficient, he can promote naturally.

This is the strength of a Celestial Spirit Root Cultivator, completely unparalleled by other cultivators.

However, even this is just a normal Celestial Spirit Root Cultivator. It's said that the Cultivation Realm has some Celestial Spirit Root Cultivators with Spirit Bodies; such individuals are considered true peerless geniuses.

For ordinary cultivators possessing a Celestial Spirit Root is already being a top talent; having a special Spirit Body is nearly impossible, even among a billion cultivators, not even one might appear.

But if one were to appear, they would definitely become a Saintly Daoist and receive the cultivation of the entire sect.

"The Divine Skill of Shrinking Earth into Inches is indeed powerful."

"Though it's not suitable for travel, it's exceptionally effective in combat."

After a day, Jiang Fan has also become familiar with the Divine Skill of Shrinking Earth into Inches. While he's not very knowledgeable about the Space Law, through the Divine Power Seed, he can easily utilize the Power of Space.

Just like a fish that doesn't understand the principles of swimming, but can swim rapidly regardless.

This is the same principle.

However, this divine skill consumes a large amount of Spiritual Power, and the instant teleportation distance is not very far, only one kilometer, so it's not suitable for long-distance travel.

It's estimated that after using it a few times, the Spiritual Power within would be completely depleted.

So, it's still better to use the Light Body Talisman for traveling.

But if used for combat, it's excellent.

Because it can unexpectedly appear behind the enemy and initiate an attack.

In this way, the enemy doesn't know what happened and is slaughtered.

At the same time, it can also be used to escape.

With a few teleportations, not even a Golden Core Zhenren could catch up.

It can be said that this is considered a life-saving skill.

"Master, shall we explore this Secret Realm World?"

"This Secret Realm World surprisingly has Heavenly Flower, such a Heaven and Earth Spiritual Object, it's certainly extraordinary."

"If we head to other places, there might be other rare spiritual objects."

Ten Thousand Transformations Pill Furnace spoke.

It followed Daoist Wan Hua to many Secret Realm Worlds.

Though it has never been to the Spirit Moon Secret Realm before, with years of experience, it knows this place is not simple, certainly containing numerous opportunities.

"No need."

"Though this Secret Realm World has numerous opportunities, it also contains great dangers."

"Opportunities are indeed good, but one's life is more important."

"When the Gate of the Void is restored, we'll return to Seven Stars Peak."

"Anyway, the spatial coordinates have been left here already, we can return anytime, no need to rush."

Jiang Fan said lightly.

He naturally knows this Secret Realm World is certain to have countless opportunities.

Previously, the Fortune-Telling Talisman has already indicated this.

But opportunities must also accompany dangers, a slight carelessness may lead to death and the body's destruction.

The Fortune-Telling Talisman indicated many locations, only Celestial Thunder Valley was suitable for him.

If he went to other places, he might not be able to obtain any opportunities.

Therefore, he doesn't plan to continue taking risks.

Anyway, obtaining a Heavenly Flower is already a tremendous gain, he is very satisfied with that.

"Hmm."

Ten Thousand Transformations Pill Furnace agreed upon hearing this.

The reason to seek opportunities is nothing more than hoping to enhance one's cultivation.

If opportunities are easy to clutch, then well, they can be tried.

But if they are too dangerous, it's not worth it at all, completely unnecessary.

His master is now already a Celestial Spirit Root Cultivator, plentiful in resources; there's indeed no need to take risks.

Honestly, it is used to being poor, thinking of grabbing every opportunity.

But this is basically impossible and unrealistic.

Boom~~

At this moment, Jiang Fan sensed a vibration from the Fortune-Telling Talisman deep within the Elixir Field and Sea of Qi, a piece of information like a tide quickly submerged into the depths of his Sea of Consciousness.

"Demon Cultivator attacks, mutual losses, timing for a strike, adding insult to injury, the opportunity will come."

"Stay in the cave and cultivate, ignore outside matters, nothing gained, nothing obtained, neutral."

"Stir Celestial Thunder, kill Demon Cultivators, gain opportunity, auspicious."

"Kill Hundred Flowers Valley cultivators, possibly suffer retaliation from Demon Cultivators, minor inauspicious."

Sensing this information, Jiang Fan stroked his chin.

According to the fortune indicated by the Fortune-Telling Talisman, before long, Celestial Thunder Valley will welcome uninvited guests.
