

Fortune 411

Chapter 411: Easily Crossing the Tribulation, Obtaining Tier Three Spirit Medicine_3

He also left a space coordinate in this cave in Celestial Thunder Valley.

In this way, he can enter this Secret Realm World at any time through the space coordinate.

Bang~~

In an instant, Jiang Fan moved with a thought and opened the Gate of the Void, and a portal appeared before him. Without hesitation, he stepped through the portal and returned to the meditation chamber on the Seven Stars Peak.

He felt that the Spirit Moon Secret Realm was still too dangerous at the moment, though it hosted many opportunities, the dangers were even more plentiful.

So, since he couldn't seize the opportunities, he might as well return to Seven Stars Peak.

After all, he already obtained the Purple Rhyme Spirit Ginseng.

With this Tier Three Spirit Medicine, his advancement to the Ninth-Layer Foundation Establishment was a certainty.

Therefore, he didn't need to continue risking in the Spirit Moon Secret Realm; returning to Seven Stars Peak was a bit safer.

"The Gate of the Void is truly wondrous beyond measure."

"To be able to traverse each place so effortlessly."

"Even reaching the Eastern Continent, countless miles away, is truly incredible."

Jiang Fan sat cross-legged on the ground, also withdrawing the Gate of the Void.

The amazing journeys of the past few days had left him exhilarated.

If he could leave space coordinates everywhere he went, then the world would be his oyster.

Although activating the Gate of the Void for the first time to travel to a new place required a significant consumption of Spirit Stones, it was all worth it.

Moreover, after going once, it wouldn't require as many Spirit Stones anymore.

Clearly, the next time he goes to the Spirit Moon Secret Realm, it would only cost ten thousand Spirit Stones.

Otherwise, if each activation cost millions of Spirit Stones, he would eventually go bankrupt and wouldn't be able to afford to use it.

"However, the Taixu Sect was able to use the Gate of the Void without consumption."

"That was because they had control over a high-level Spirit Vein."

"Placing the Gate of the Void at the Spirit Vein's depths, it devoured the Spiritual Qi from deep within."

"This naturally lowered the consumption significantly."

"Unfortunately, I don't have such a Spirit Vein, so I can only use Spirit Stones instead."

Jiang Fan clenched his fist, feeling quite regretful.

He felt that if he could have his own territory, the benefits would be immense.

No wonder those Golden Core Zhenren all want to establish their own factions.

Apart from hoping to have many subordinates to help make money, the more important thing is to gain a Tier Three Spirit Vein.

If they have their own dojo or cave dwelling, the cultivation of a Golden Core Zhenren would rapidly increase.

If they keep moving around without their own Tier Three Spirit Vein, then their cultivation would be stagnant.

So, apart from a few independent practitioner Golden Cores, most Golden Core Zhenren will have their own factions.

They will surely become the leader of a power group.

"Let's try this Purple Rhyme Spirit Ginseng first."

Thinking of this, Jiang Fan placed the spirit ginseng into the Ten Thousand Transformations Pill Furnace, then removed the impurities and quickly refined it.

In no time, the pill furnace produced a large amount of purple medicinal liquid, filled with a strong medicinal aroma.

Without saying a word, he swallowed a drop of the purple liquid.

Bang~~

This drop of purple liquid, containing a vast amount of medicinal power, transformed into a tremendous energy after entering his body, making his whole body hot as if he were in a furnace.

Subsequently, the Primordial Talisman deep within the Elixir Field and Sea of Qi continued to spin, transforming into drops of Primordial Spiritual Power.

The cultivation efficiency increased several times compared to before.

A large amount of Primordial Spiritual Power was condensed.
